Looking At Sweden Looking At Other Countries:

Looking at Violence in the Nordic Countries Jukka-Pekka Takala, Yaira Obstbaum, Nordic Council of Ministers, 2009
This report reviews and discusses violence statistics and their problems and possible improvements from various angles. The report is based on the work of the statistical subproject of the Nordic Project on Violence Violence and its reduction in the Nordic countries V ld och v ldsreducering i Norden financed by the Nordic Council of Ministers and carried out by the Nordic councils for crime prevention and the Scandinavian Research Council for Criminology. The Statistics Subproject was to look at three related but originally separate subprojects of the original overall plan: 1 To describe and compare violence with the help of extant statistics; 2 To chart variations in violence in the Nordic countries; 3 To develop instruments of measuring violence in intimate relations including violence in the family. With the resources available, the subproject was unable to carry out any of these tasks in a truly systematic and comprehensive manner. However, we hope that the variable material we were able to produce on all these themes can contribute to better accounting for violence and be of help when devising methods for preventing violence. The report describes levels and trends in violence. It touches on problems and solutions in their measurement. Some suggestions are tentative, others are more firmly established, and the reader can turn to the research and web pages that are referred to in the reports.

Sweden's Grand Strategy Douglas Brommesson, Ann-Marie Ekengren, Anna Michalski, 2025-05-22. This is an open access title available under the terms of a CC BY-NC-ND 4.0 International licence. It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations. Using the example of Sweden, the authors reassess the grand strategies of small states in international politics from the end of World War II until its new membership in NATO in 2024. Utilizing role theory, they identify a small state's grand strategy through specific national foreign policy roles which at certain times coalesce into master roles. Four foreign policy action strategies building on domestic agency and the influence of systemic structures depict this domestic process of role adaptation. Sweden's foreign policy roles were shaped according to the degree of autonomy and integration deemed necessary for security, economic development, and social cohesion as perceived by the domestic political elite. The ensuing empirical analysis identifies this set of evolving roles in an increasingly unstable international security environment. The authors thus explore how a small state can develop certain roles over time and how the dominant roles can coalesce into an overarching grand strategy. The Oxford Studies in Grand Strategy is a major new series of cutting edge monographs that examine the grand strategies of states and those intergovernmental organizations and nonstate actors who credibly aspire to sovereignty. Books concentrate on the contemporary aspects of grand strategy while paying due respect to the historical antecedents of a nation's grand strategy and their relevance for a leadership's current choices. The series is pluralistic in terms of theory and method and maintains a broad view of the ways, means, and ends that undergird a grand strategy. Analytical and explanatory in contribution, books in the series feature a rigorous analysis of the interaction between domestic

factors and global forces and provide a clear understanding of how that interaction shapes a grand strategy's formulation, codification and implementation. Series Editors: Thierry Balzacq (Sciences Po Paris), Peter Dombrowski (US Naval War College) and Simon Reich (Rutgers University Newark).

Gender Equality and Nation Branding in the Nordic Region Eirinn Larsen, Sigrun Marie Moss, Inger Skjelsbæk, 2021-05-25. This book explores how gender equality, a central part of the Nordic imaginary, is used in the political communication of Nordic states. The analyses presented move beyond conventional images and discourses of Nordic gender and women friendliness by critically investigating how and to what extent gender equality serves nation branding in the Nordic region. Nation branding is an unescapable part of globalisation which is a market oriented process dominated by the West and predicated on the creation of winners and losers. Hence efforts to strengthen the national brand or reputation of specific Nordic countries with the aid of gender equality as a political and symbolic value inevitably help to reinforce already established global hierarchies where the Nordics play the role of moral superpower. This book comprises scholars from various fields of specialisation and provides evidence and understanding for the growing interaction between gender equality policies and nation branding in all five Nordic countries. It does so by exploring a variety of policy fields and issues including women's rights, foreign policy, rape and legislation, female quotas and business policies in addition to the index industry. The rise of the global indexes has reproduced forceful images of the Nordic countries as frontrunners of gender equality which indeed help the Nordic countries to further position themselves as best at being good. This book will be of great interest to students and scholars of Nordic gender equality in political science, sociology, law, criminology, political psychology and history as well as those interested in nation branding, Nordic studies and exceptionalism. International Macroeconomics in the Wake of the Global Financial Crisis Laurent Ferrara,Ignacio Hernando,Daniela Marconi,2018-06-13 This book collects selected articles addressing several currently debated issues in the field of international macroeconomics They focus on the role of the central banks in the debate on how to come to terms with the long term decline in productivity growth insufficient aggregate demand high economic uncertainty and growing inequalities following the global financial crisis Central banks are of considerable importance in this debate since understanding the sluggishness of the recovery process as well as its implications for the natural interest rate are key to assessing output gaps and the monetary policy stance The authors argue that a more dynamic domestic and external aggregate demand helps to raise the inflation rate easing the constraint deriving from the zero lower bound and allowing monetary policy to depart from its current ultra accommodative position Beyond macroeconomic factors the book also discusses a supportive financial environment as a precondition for the rebound of global economic activity stressing that understanding capital flows is a prerequisite for economic policy decisions
