Bourgeois, 2025-04-28 *Debating Health Care Ethics Third Edition* explores contemporary moral challenges in health care through a unique debate format providing students with the essential tools to understand and critically evaluate the leading arguments in the field and to develop their own arguments on important moral problems in health care. The first three chapters explore the nature of arguments, philosophical methodology and a range of leading normative ethical theories. The remaining chapters introduce students to moral problems in health care through dramas that feature complex scenarios involving patients, family members and health care providers. Each drama is followed by a lively debate where the authors consider and evaluate rival arguments concerning the moral issues raised by the drama. The dramas encourage students to start thinking about ethical issues in health care. The debates then demonstrate how arguments are developed and criticized. These debates also encourage students to develop and defend their own arguments on these topics. This technique is more interactive and approachable than standard philosophical texts. This third edition contains updated chapters and dramas that reflect recent changes in health care in Canada. One such change is to the chapter on euthanasia which now includes a drama and a debate centred on the morality of legalizing Medical Assistance in Dying (MAiD). Other changes to the text are in response to the Covid 19 pandemic. These include updated chapters on the proper rules for prioritizing care in emergency situations, triage and the moral limits of medical doctors administering unproven alternative medications to patients who request them. The third edition also contains a drama and debate on autonomy and valid consent and a drama and updated debate on the justice of a two tier health care system where one level of health care is available to all regardless of means and another level of faster health care is available only to those with means. *Workers' Compensation Reports* New South Wales. Workers Compensation Commission, 1928. *Pollution at Sea* Baris Soyer, Andrew Tettenborn, 2013-06-07. A sharp informed and thoroughly practical guide to contemporary and developing issues relating to sea pollution prepared by leading academics and practitioners with everyday hands on experience. *Pollution at Sea* focuses on a number of the vital private law issues: compensation, insurance, contract and tort thrown up by contemporary developments in the law of pollution. The book also intends to offer a critical analysis on emerging public law concepts such as the legal position of seafarers from the perspective of criminal law in cases of pollution and the impact of port state control as a pollution control mechanism. *Pollution at Sea* is divided into three parts: 1. Private Law Liability Regimes; 2. Rights and Liabilities of Particular Parties; 3. The Impact of Public Law on the Actors Concerned. In part 1 various liability regimes are dissected including those which have been under the spotlight in recent years. This section has particular international appeal and many of the regimes discussed are based at least in part on international conventions, agreements or practices. In part 2 the impact of pollution at sea on third parties is considered with respect to the legal position of parties that might be perused either by the victims of pollution incidents or in some cases by the parties liable by way of a recourse action. Finally in part 3 recent relevant developments particularly in the realm of public law are covered. *Images of Occupational Prestige* Anthony P. M. Coxon, Charles L.
