Stars on the Earth Richard Leviton, 2006-08 Discover the wonderful secret the Earth holds for us that the stars of the galaxy live on our planet Holograms of high magnitude stars over holy mountains Physical travel to other planets through stargates on the Earth's surface Near instantaneous transportation across the planet through quick way portals Outrageous science fiction or sober geomantic fact Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us Stars on the Earth combines scholarship clairvoyance and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet Our planet was precisely designed and implemented for us and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens Why are so many of the Earth's mountains said to be holy producing visions and encounters with the gods They all have canopies of light called domes each transmitting the presence of a galactic star What is the geomantic origin of the Bermuda Triangle Two dysfunctional stargates If working properly they and the Earth's other two million stargates could transport us rapidly to other planets Is there a way to travel quickly across the planet without using cars airplanes boats or trains Yes and it's called a traversable wormhole and the Earth has thousands of them awaiting our discovery and use Come join the tour of a planet you've never seen before our own star infused Earth

1491 Charles C. Mann, 2005-08-09 A groundbreaking study that radically alters our understanding of the Americas before the arrival of the Europeans in 1492 Traditionally Americans learned in school that the ancestors of the people who inhabited the Western Hemisphere at the time of Columbus's landing had crossed the Bering Strait twelve thousand years ago existed mainly in small nomadic bands and lived so lightly on the land that the Americas was for all practical purposes still a vast wilderness But as Charles C Mann now makes clear archaeologists and anthropologists have spent the last thirty years proving these and many other long held assumptions wrong In a book that startles and persuades Mann reveals how a new generation of researchers equipped with novel scientific techniques came to previously unheard of conclusions Among them In 1491 there were probably more people living in the Americas than in

Europe Certain cities such as Tenochtitl n the Aztec capital were far greater in population than any contemporary European city Furthermore Tenochtitl n unlike any capital in Europe at that time had running water beautiful botanical gardens and immaculately clean streets The earliest cities in the Western Hemisphere were thriving before the Egyptians built the great pyramids Pre Columbian Indians in Mexico developed corn by a breeding process so sophisticated that the journal Science recently described it as man s first and perhaps the greatest feat of genetic engineering Amazonian Indians learned how to farm the rain forest without destroying it a process scientists are studying today in the hope of regaining this lost knowledge Native Americans transformed their land so completely that Europeans arrived in a hemisphere already massively landscaped by human beings Mann sheds clarifying light on the methods used to arrive at these new visions of the pre Columbian Americas and how they have affected our understanding of our history and our thinking about the environment His book is an exciting and learned account of scientific inquiry and revelation [The Gospel of Mary Magdalena And Me](#) Rethy Devi,2021-08-31 I m pleased to introduce my novel I have invested last 10 years of my life researching writing and rewriting this book More than 500 books I have read before I wrote this novel Born out of diversity each of these women lived apart for centuries without any meeting finally provides a context and a narrative style unique to this novel And it unravels a freshness of spirit The tug of war between the ideologies of the east and west the interplay of similarities in human nature spread over a vast expanse of time help interpret and understand herself The story draws its inspiration from my interest in the intriguing nature of feminist ideas alongside spirituality and sexuality It was a sincere effort to highlight my passion for feminist philosophies psychology and politics I chose to write a fiction as I enjoy telling stories and found it a good medium to weave in my other interests in sociology history metaphysics and quantum physics The first part of the novel deals with the recital of life experiences of Mary Magdalene who lived nearly two thousand years ago there was a noble woman called Lexmi who lived in modern era In the second part Lexmi relates to Mary Magdalene her woes as a philosopher and her frustrations reflective of life in today s world War is just like terrorism 20 million people died in the two world Wars and 10 million people vanished at the time of partition of India My novel is seriously discussing these issues [Bomb, Book and Compass](#) Simon Winchester,2008-09-25 Before fate intervened Joseph Needham was a distinguished biochemist at Cambridge University married to a fellow scientist In 1937 he was asked to supervise a young Chinese student named Lu Gwei Djen and in that moment began the two greatest love affairs of his life Miss Lu and China Miss Lu inspired Needham to travel to China where he initially spent three dangerous years as a wartime diplomat He established himself as the pre eminent China scholar of all time firm in his belief that China would one day achieve world prominence By the end of his life Needham had become a truly global figure travelling endlessly and honoured by all though banned from America because of his politics And in 1989 after a fifty two year affair he finally married the woman who had first inspired his passion The Magnificent Barbarian is Simon Winchester at his best at once a magnificent portrait of one man s remarkable life and a

The Invention of Yesterday Tamim Ansary, 2019-10-01 From language to culture to cultural collision the story of how humans invented history from the Stone Age to the Virtual Age Traveling across millennia weaving the experiences and world views of cultures both extinct and extant The Invention of Yesterday shows that the engine of history is not so much heroic battles won geographic farmers thrive or anthropogenic humans change the planet as it is narrative Many thousands of years ago when we existed only as countless small autonomous bands of hunter gatherers widely distributed through the wilderness we began inventing stories to organize for survival to find purpose and meaning to explain the unfathomable Ultimately these became the basis for empires civilizations and cultures And when various narratives began to collide and overlap the encounters produced everything from confusion chaos and war to cultural efflorescence religious awakenings and intellectual breakthroughs Through vivid stories studded with insights Tamim Ansary illuminates the world historical consequences of the unique human capacity to invent and communicate abstract ideas In doing so he also explains our ever more intertwined present the narratives now shaping us the reasons we still battle one another and the future we may yet create

Poiesis Peter Acton, 2014-10-15 Poiesis brings together archaeological finds ancient texts and inscriptions recent scholarly analysis and the expertise of modern craftsmen to investigate every known facet of Athens manufacturing activities Despite the fact that Athenians consumed great quantities of manufactured goods and around half of the residents of classical Athens can be shown to have been dependent for survival on manufacturing in some form the subject has been almost completely neglected by historians The book draws on the analytical techniques of contemporary business economics supply and demand competition theory and risk return analysis to explain events and choices Manufacturing operations are classified in an original framework that explains why certain segments were suited to the sole craftsman and others to teams of slaves and deduces earnings potential based upon barriers to entry and competitive differentiation The result is a new and refreshing angle on how Athenian society operated that complements political military and literary perspectives with important and often surprising implications Among other insights the analysis shows how fragmented industry structures were fundamental to the workings of Athenian democracy by enabling citizens to supplement their income through casual manufacturing activity

From Bharata to India M. K. Agarwal, 2012-05 The origin of world civilization can be traced to the Sindhu and Sarasvati river valleys located in present day Pakistan as early as 8 000 BC Here innovation and originality in every aspect of human endeavor from mathematics and science to art and sports flourished Yet the importance of this civilization known as the Vedic period has been deliberately downplayed Thoroughly researched and including an extensive bibliography From Bharata to India rectifies this mistake in the perspective of world history and seeks to offer a comprehensive reference source Author M K Agarwal shows how this early culture where ideation by enlightened philosopher Brahmin kings brought material and spiritual wealth that was to remain unchallenged until the colonial era This Vedic Hindu Buddhist legacy subsequently influenced peoples and paradigms around the globe ushering in an era of peace and plenty thousands of years before the Europeans By using original sources in Sanskrit as well as regional literature Agarwal compares corresponding situations in other civilizations within the context of their own literary traditions and records to prove that Bharata forms the basis of world civilization This is in direct contrast to the Greek or Arab miracle hypothesis put forth by numerous scholars The first of two volumes in this series From Bharata to India offers a fascinating in depth glimpse into ancient India s contribution to the modern world
