Lost World Rewriting Prehistory How New Science Is Tracing Americas Ice Age Mariners:

Lost World Tom Koppel, 2010-05-11 For decades the issue seemed moot The first settlers we were told were big game hunters who arrived from Asia at the end of the Ice Age some 12 000 years ago crossing a land bridge at the Bering Strait and migrating south through an ice free passage between two great glaciers blanketing the continent But after years of sifting through data from diverse and surprising sources the maverick scientists whose stories *Lost World* follows have found evidence to overthrow the big game hunter scenario and reach a new and startling and controversial conclusion The first people to arrive in North America did not come overland they came along the coast by water In this groundbreaking book award winning journalist Tom Koppel details these provocative discoveries as he accompanies the archaeologists geologists biologists and paleontologists on their intensive search *Lost World* takes readers under the sea into caves and out to the remote offshore islands of Alaska British Columbia and California to present detailed and growing evidence for ancient coastal migration By accompanying the key scientists on their intensive investigations Koppel brings to life the quest for that Holy Grail of New World prehistory the first peopling of the Americas

Canada and Arctic North America Graeme Wynn, 2006-11-10 This comprehensive treatment of the environmental history of northern North America offers a compelling account of the complex encounters of people technology culture and ecology that shaped modern day Canada and Alaska From the arrival of the earliest humans to the very latest scientific controversies the environmental history of Canada and Arctic North America is dramatic diverse and crucial for the very survival of the human race Packed with key facts and analysis this expert guide explores the complex interplay between human societies and the environment from the Aleutian Islands to the Grand Banks and from the Great Lakes to the Arctic Islands How has the challenging environment of America's most northerly regions with some areas still dominated by native peoples helped shape politics and trade What have been the consequences of European contact with this region and its indigenous inhabitants How did natives and newcomers cope with and change this vast and forbidding territory Can a perspective on the past help us in grappling with the conflict between oil exploration and wilderness preservation on the North Slope of Alaska Part of ABC-CLIO's Nature and Human Societies series this unique work charts the region's environmental history from prehistory to modern times and is essential reading for students and experts alike

1491 (Second Edition) Charles C. Mann, 2006-10-10 NATIONAL BESTSELLER A groundbreaking work of science history and archaeology that radically alters our understanding of the Americas before the arrival of Columbus in 1492 from a remarkably engaging writer The New York Times Book Review Contrary to what so many Americans learn in school the pre-Columbian Indians were not sparsely settled in a pristine wilderness rather there were huge numbers of Indians who actively molded and influenced the land around them The astonishing Aztec capital of Tenochtitlan had running water and immaculately clean streets and was larger than any contemporary European city Mexican cultures created corn in a specialized breeding process that it has been called man's first feat of genetic engineering

Indeed Indians were not living lightly on the land but were landscaping and manipulating their world in ways that we are only now beginning to understand Challenging and surprising this a transformative new look at a rich and fascinating world we only thought we knew *Haida Gwaii* Daryl W. Fedje, Rolf Mathewes, 2011-11-01 The most isolated archipelago on the west coast of the Americas inhabited for at least 10 500 years Haida Gwaii has fascinated scientists social scientists historians and inquisitive travellers for decades This book brings together the results of extensive and varied field research by both federal agencies and independent researchers and carefully integrates them with earlier archaeological ethnohistorical and paleoenvironmental work in the region It imparts significant new information about the natural history of Haida Gwaii also known as the Queen Charlotte Islands and the adjacent areas of Hecate Strait Chapters analyze new data on ice retreat shoreline and sea level change faunal communities and culture history providing a more comprehensive picture of the history of the islands from the late glacial through the prehistoric period to the time of European contact known to the Haida as the time of the Iron People Much of the archaeological work was conducted with the direct participation of members of the Haida Nation As a complement to the scientific approach of the research two chapters provide a Haida perspective explaining the value of traditional oral records and recounting several oral histories including that of Taadl the loon which takes us back to the beginning of time This volume is a veritable compendium of knowledge out of which emerges the human and environmental history of Haida Gwaii and its dynamic landscape Haida Gwaii will be of interest to scholars and students in archaeology and anthropology and those with an interest in the environmental and cultural history of Haida Gwaii *Yachting*, 2003-11 **The Living Shore** Rowan Jacobsen, 2009-07-01 In the 1990s a marine scientist named Brian Kingzett was commissioned to survey Canada's western coast He saw amazing sights from the wildest most breathtaking coasts to the smallest of marine creatures Along the western side of Vancouver Island Kingzett nosed into an isolated pocket beach where he found something unusual Amid the mussels barnacles and clams were round oysters Olympias Kingzett noted their presence and paddled on A decade later when he met Betsy Peabody executive director of the Puget Sound Restoration Fund PSRF he learned that this once ubiquitous native oyster was in steep decline and he knew that together they would return to this remote spot Rowan Jacobsen along with Kingzett Peabody and a small group of scientists from PSRF and the Nature Conservancy set out last July to see if the Olys were still surviving and if they were what they could learn from them The goal to use their pristine natural beds which have probably been around for millennia as blueprints for the habitat restoration efforts in Puget Sound The implications are vast If Peabody and her team can bring good health back to Puget Sound by restoring the intertidal zones the areas of land exposed during low tide and submerged during high tide where oysters live their research could serve as a model for saving the world's oceans During a time when the fate of the oceans seems uncertain Rowan Jacobsen has found hope in the form of a small shelled creature living in the lost world where all life began *26 Feet to the Charlottes*, 2011-03-01 When June Cameron and Paul Holsinger set out in 1983 in Paul's

ancient 26 foot wooden sloop Wood Duck to cross the perilous Hecate Strait and explore the weather beaten west coast of the Queen Charlotte Islands now known as Haida Gwaii they knew they would face danger But June had raced her own sailboat for years and Paul was a gifted mechanic so they put trepidation aside and answered the call to adventure 26 Feet to the Charlottes takes readers to remote beaches uninhabited First Nations villages abandoned mines and sheltered coves Compelling reading for sailors and armchair adventurers alike June s story conveys the joys and challenges of travelling by boat and living off the sea and recalls a coast that has changed dramatically in the last century Their journey taught them much about the challenges faced by the area s First Nations inhabitants and much about why skippers do not sail the outer coast of the Charlottes for pleasure There are no lighthouses and many rocks and reefs are uncharted June and Paul s survival would depend on cautious observant navigation and luck 26 Feet to the Charlottes takes readers to remote beaches uninhabited First Nations villages abandoned mines and sheltered coves Compelling reading for sailors and armchair adventurers alike June s story conveys the joys and challenges of travelling by boat and living off the sea and recalls a coast that has changed dramatically in the last century First Nations? Flanagan,2008 Over the last thirty years Canadian policy on aboriginal issues has come to be dominated by an ideology that sees aboriginal peoples as nations entitled to specific rights Indians and Inuit now enjoy legal privileges that include the inherent right to self government collective property rights immunity from taxation hunting and fishing rights without legal limits and free housing education and medical care Underpinning these privileges is what Tom Flanagan describes as aboriginal orthodoxy the belief that prior residence in North America is an entitlement to special treatment Flanagan shows that this orthodoxy enriches a small elite of activists politicians administrators and well connected entrepreneurs while bringing further misery to the very people it is supposed to help Controversial and thought provoking First Nations Second Thoughts dissects the prevailing ideology that determines public policy towards Canada s aboriginal peoples In this updated edition Flanagan analyzes the developments of the last ten years showing how a conflict of visions has led to a stalemate in aboriginal policy making He concludes that aboriginal success will be achieved not as the result of public policy changes in government but through the actions of the people themselves **Ancient Pathways, Ancestral Knowledge** Nancy J.

Turner,2014-07-20 Volume 1 The History and Practice of Indigenous Plant Knowledge Volume 2 The Place and Meaning of Plants in Indigenous Cultures and Worldviews Nancy Turner has studied Indigenous peoples knowledge of plants and environments in northwestern North America for over forty years In Ancient Pathways Ancestral Knowledge she integrates her research into a two volume ethnobotanical tour de force Drawing on information shared by Indigenous botanical experts and collaborators the ethnographic and historical record and from linguistics palaeobotany archaeology phytogeography and other fields Turner weaves together a complex understanding of the traditions of use and management of plant resources in this vast region She follows Indigenous inhabitants over time and through space showing how they actively participated in

their environments managed and cultivated valued plant resources and maintained key habitats that supported their dynamic cultures for thousands of years as well as how knowledge was passed on from generation to generation and from one community to another To understand the values and perspectives that have guided Indigenous ethnobotanical knowledge and practices Turner looks beyond the details of individual plant species and their uses to determine the overall patterns and processes of their development application and adaptation Volume 1 presents a historical overview of ethnobotanical knowledge in the region before and after European contact The ways in which Indigenous peoples used and interacted with plants for nutrition technologies and medicine are examined Drawing connections between similarities across languages Turner compares the names of over 250 plant species in more than fifty Indigenous languages and dialects to demonstrate the prominence of certain plants in various cultures and the sharing of goods and ideas between peoples She also examines the effects that introduced species and colonialism had on the region s Indigenous peoples and their ecologies Volume 2 provides a sweeping account of how Indigenous organizational systems developed to facilitate the harvesting use and cultivation of plants to establish economic connections across linguistic and cultural borders and to preserve and manage resources and habitats Turner describes the worldviews and philosophies that emerged from the interactions between peoples and plants and how these understandings are expressed through cultures stories and narratives Finally she explores the ways in which botanical and ecological knowledge can be and are being maintained as living adaptive systems that promote healthy cultures environments and indigenous plant populations Ancient Pathways Ancestral Knowledge both challenges and contributes to existing knowledge of Indigenous peoples land stewardship while preserving information that might otherwise have been lost Providing new and captivating insights into the anthropogenic systems of northwestern North America it will stand as an authoritative reference work and contribute to a fuller understanding of the interactions between cultures and ecological systems

Alaska Claus M. Naske,Herman E. Slotnick,2014-10-22 The largest by far of the fifty states Alaska is also the state of greatest mystery and diversity And as Claus M Naske and Herman E Slotnick show in this comprehensive survey the history of Alaska s peoples and the development of its economy have matched the diversity of its land and seascapes Alaska A History begins by examining the region s geography and the Native peoples who inhabited it for thousands of years before the first Europeans arrived The Russians claimed northern North America by right of discovery in 1741 During their occupation of Russian America the region was little more than an outpost for fur hunters and traders

When the czar sold the territory to the United States in 1867 nobody knew what to do with Seward's Folly. Mainland America paid little attention to the new acquisition until a rush of gold seekers flooded into the Yukon Territory. In 1906 Congress granted Alaska Territory a voteless delegate and in 1912 gave it a territorial legislature. Not until 1959 however was Alaska's long sought goal of statehood realized. During World War II Alaska's place along the great circle route from the United States to Asia firmly established its military importance which was underscored during the Cold War. The developing military garrison brought federal money and many new residents. Then the discovery of huge oil and natural gas deposits gave a measure of economic security to the state. Alaska A History provides a full chronological survey of the region's and state's history including the precedent setting Alaska Native Claims Settlement Act of 1971 which compensated Native Americans for their losses, the effect of the oil industry and the trans-Alaska pipeline on the economy, the Exxon Valdez oil spill and Alaska politics through the early 2000s.

Geology and Archaeology J. Harff, G. Bailey, F. Lüth, 2016-01-05 Sea level change has influenced human population globally since prehistoric times. Even in early phases of cultural development human populations were faced with marine regression and transgression as a result of changing climate and corresponding glacio-isostatic adjustment. Global marine regression during the last glaciation changed the palaeogeography of the continental shelf converting former marine environments to attractive terrestrial habitats for prehistoric humans. These areas of the shelf were used as hunting and gathering areas as migration routes between continents and most probably witnessed the earliest developments in seafaring and marine exploitation until the postglacial transgression re-submerged these palaeo-landscapes. Based on modern marine research technologies and the integration of large databases proxy data are increasingly available for the reconstruction of Quaternary submerged landscapes. Also prehistoric archaeological remains from the recent sea bottom are shedding new light on human prehistoric development driven by rapidly changing climate and environment. This publication contributes to the exchange of ideas and new results in this young and challenging field of underwater palaeoenvironmental investigation.

Teaching 360 : Effective Learning Through the Imagination, 2008-01-01 This book offers a detailed examination of imagination in learning. Teachers working with the ideas of Imaginative Education in their classrooms provide examples that cover multiple curricular areas and span elementary through secondary school contexts. Imagination has moved in recent years from being considered some kind of educational frill to a recognized main workhorse of teaching and learning. It is this new perspective that this book celebrates and exemplifies. The book is divided between teachers and researchers' voices both exploring a range of ways in which the imagination can be used in everyday classrooms to enhance learning and increase the satisfactions of teaching. This book demonstrates how engaging the imagination lies at the core of effective education.

Jochelson, Bogoras and Shternberg Erich Kasten, 2018-11-22 In this volume the authors discuss the fascinating and eventful biographies as well as the significant scientific work of Waldemar Jochelson, Waldemar Bogoras and Lev Shternberg. They investigate the question of how these

men became involved in ethnography towards the end of the 19th century when they had to spend many years as political exiles in remote parts of northeastern Siberia. This early revolutionary commitment shed light on their empathetic and pioneering methods during their later fieldwork with local people. At the same time they incorporated important ideas from American cultural anthropology gained from their close collaboration with Franz Boas. Their initial aims and methods were also reflected in the ambitious community oriented research programs that they later had conceptualized and launched together with other colleagues at Leningrad University.

The Koryak Waldemar Jochelson, 2016-04-26 Since the 18th century researchers and scientists have traveled the peninsula of Kamchatka in the Russian Far East. Many of them were of German origin and had been commissioned by the Russian government to perform specific tasks. Their exhaustive descriptions and detailed reports are still considered some of the most valuable documents on the ethnography of the indigenous peoples of that part of the world. These works inform us about living conditions and particular ways of natural resource use at various times and provide us with valuable background information for current assessment. As the first profound anthropological descriptions of that region, the publications of the Jesup North Pacific Expedition undertaken in the first years of the 20th century marked the beginning of a new era of research in Russia. They represented a shift of the already existing transnational research networks toward North America. Jochelson's work *The Koryak* was an important milestone for Russian and North American anthropology that provides to this day a unique contribution to thoroughly understanding the cultures of the North Pacific rim.

Stone by Stone Liz Bryan, 2015-06-24 *Stone by Stone* takes readers on a fascinating journey across the short grass prairie of southern Alberta and Saskatchewan in search of tangible evidence of the region's ancient past, a civilization dating back at least twelve thousand years. In this revised and updated edition of her one of a kind guidebook, author Liz Bryan explores archaeological sites that are accessible to today's inquisitive travellers and provides enough detailed information, striking photographs, maps and illustrations to satisfy any armchair archaeologist. With riveting insight and clarity, Bryan presents the stone effigies, cairns, medicine wheels, buffalo jumps, rock art and remains of settlements scattered across this vast prairie, creating an invaluable resource for anyone who wishes to navigate these ancient sites and understand their significance. *Canadian Geographic*, 2005

Bark Canoes John Jennings, Tappan Adney, Mariners' Museum (Newport News, Va.), 2004

The definitive reference to indigenous peoples' watercraft around the world. Tappan Adney (1868-1950) was an artist, writer, ethnographer, historian, and modelmaker of unparalleled ability. He tirelessly documented the cultures and languages of vanishing native cultures. His most enduring legacy is the extraordinary 110 birchbark canoe models he handbuilt to exacting standards. The models, now held at The Mariners Museum in Newport News, Virginia, were built to ensure future canoe builders had exact reproductions for reference. These historically accurate 1:5 scale models were meticulously researched and traditionally constructed using the identical materials of the originals. Many are based on canoes that were the last

example of their type Before such a canoe disintegrated Adney measured and recorded its dimensions consulted with native builders and studied historical photographs and paintings The canoe models are organized into eight distinct groups Maritimes Eastern Woodland Northwest Lower British Columbia Fur Trade Amur Valley Asia South America Each canoe model is beautifully photographed and accompanied by captions that outline the craft s origins uses and technical details Adney s amazing technical drawings for the models are also included An extensive introduction covers Adney s life and provides information about native model builders canoe decoration and fur trade heraldry Bark Canoes is the definitive reference to indigenous and ingenious watercraft used around the world
