L'Univers concentrationnaire David Rousset, 1946 Holocaust Literature: Lerner to Zychlinsky, index S. Lillian Kremer, 2003 Review This encyclopedia offers an authoritative and comprehensive survey of the important writers and works that form the literature about the Holocaust and its consequences The collection is alphabetically arranged and consists of high quality biocritical essays on 309 writers who are first second and third generation survivors or important thinkers and spokespersons on the Holocaust An essential literary reference work this publication is an important addition to the genre and a solid value for public and academic libraries The Top 20 Reference Titles of the Year American Libraries May 2004 *L'Univers Concentrationnaire. A World Apart ... Translated by Yvonne Moyse and Roger Senhouse* David Rousset, Yvonne MOYSE, Roger Senhouse, 1951 By Words Alone Sidra DeKoven Ezrahi, 2008-10-03 The creative literature that evolved from the Holocaust constitutes an unprecedented encounter between art and life Those who wrote about the Holocaust were forced to extend the limits of their imaginations to encompass unspeakably violent extremes of human behavior The result as Ezrahi shows in *By Words Alone* is a body of literature that transcends national and cultural boundaries and shares a spectrum of attitudes toward the concentration camps and the world beyond toward the past and the future **Political Survivors** Emma Kuby, 2019-03-15 In 1949 as Cold War tensions in Europe mounted French intellectual and former Buchenwald inmate David Rousset called upon fellow concentration camp survivors to denounce the Soviet Gulag as a hallucinatory repetition of Nazi Germany's most terrible crime In *Political Survivors* Emma Kuby tells the riveting story of what followed his appeal as prominent members of the wartime Resistance from throughout Western Europe united to campaign against the continued existence of inhumane internment systems around the world The International Commission against the Concentration Camp Regime brought together those originally deported for acts of anti Nazi political activity who believed that their unlikely survival incurred a duty to bear witness for other victims Over the course of the next decade these pioneering activists crusaded to expose political imprisonment forced labor and other crimes against humanity in Franco's Spain Maoist China French Algeria and beyond Until now the CIA's secret funding of Rousset's movement has remained in the shadows Kuby reveals this clandestine arrangement between European camp survivors and American intelligence agents She also brings to light how Jewish Holocaust victims were systematically excluded from Commission membership a choice that fueled the group's rise but also helped lead to its premature downfall The history that she unearths provides a striking new vision of how wartime memory shaped European intellectual life and ideological struggle after 1945 showing that the key lessons Western Europeans drew from the war centered on the camp imagined first and foremost as a site of political repression rather than ethnic genocide *Political Survivors* argues that Cold War dogma and acrimony tied to a distorted understanding of WWII's chief atrocities

Palimpsestic Memory Max Silverman,2013-02-01 The interconnections between histories and memories of the Holocaust colonialism and extreme violence in post war French and Francophone fiction and film provide the central focus of this book It proposes a new model of palimpsestic memory which the author defines as the condensation of different spatio temporal traces to describe these interconnections and defines the poetics and the politics of this composite form In doing so it is argued that a poetics dependent on tropes and techniques such as metaphor allegory and montage establishes connections across space and time which oblige us to perceive cultural memory not in terms of its singular attachment to a particular event or bound to specific ethno cultural or national communities but as a dynamic process of transfer between different moments of racialized violence and between different cultural communities The structure of the book allows for both the theoretical elaboration of this paradigm for cultural memory and individual case studies of novels and films *A Holocaust Controversy* Samuel Moyn,2005-08-22 A provocative study of a French Holocaust controversy of the 1960s and the dynamics of postwar memory Hannah Arendt and the Limits of Total Domination Michal Aharony,2015-03-05 Responding to the increasingly influential role of Hannah Arendt s political philosophy in recent years Hannah Arendt and the Limits of Total Domination The Holocaust Plurality and Resistance critically engages with Arendt s understanding of totalitarianism According to Arendt the main goal of totalitarianism was total domination namely the virtual eradication of human legality morality individuality and plurality This attempt in her view was most fully realized in the concentration camps which served as the major laboratories for the regime While Arendt focused on the perpetrators logic and drive Michal Aharony examines the perspectives and experiences of the victims and their ability to resist such an experiment The first book length study to juxtapose Arendt s concept of total domination with actual testimonies of Holocaust survivors this book calls for methodological pluralism and the integration of the voices and narratives of the actors in the construction of political concepts and theoretical systems To achieve this Aharony engages with both well known and non canonical intellectuals and writers who survived Auschwitz and Buchenwald concentration camps Additionally she analyzes the oral testimonies of survivors who are largely unknown drawing from interviews conducted in Israel and in the U S as well as from videotaped interviews from archives around the world Revealing various manifestations of unarmed resistance in the camps this study demonstrates the persistence of morality and free agency even under the most extreme and de humanizing conditions while cautiously suggesting that absolute domination is never as absolute as it claims or wishes to be Scholars of political

philosophy political science history and Holocaust studies will find this an original and compelling book

Concentrationary Memories Griselda Pollock, Max Silverman, 2015-08-25 *Concentrationary Memories* has as its premise the idea at the heart of Alain Resnais's film *Night and Fog* 1955 that the concentrationary plague unleashed on the world by the Nazis in the 1930s and 1940s is not simply confined to one place and one time but is now a permanent presence shadowing modern life. It further suggests that memory and indeed art in general must be invoked to show this haunting of the present by this menacing past so that we can read for the signs of terror and counter its deformation of the human. Through working with political and cultural theory on readings of film art photographic and literary practices *Concentrationary Memories* analyses different cultural responses to concentrationary terror in different sites in the post war period ranging from Auschwitz to Argentina. These readings show how those involved in the cultural production of memories of the horror of totalitarianism sought to find forms languages and image systems which could make sense of and resist the post war condition in which as Hannah Arendt famously stated everything is possible and human beings as human beings become superfluous. Authors include Nicholas Chare Isabelle de le Court Thomas Elsaesser Benjamin Hannavy Cousen Matthew John Claire Launchbury Sylvie Lindeperg Laura Malosetti Costa Griselda Pollock Max Silverman Glenn Sujo Annette Wieviorka and John Wolfe Ackerman. **Histories of the Aftermath** Frank Biess, Robert G. Moeller, 2010-07-01 In 1945 Europeans confronted a legacy of mass destruction and death millions of families had lost their homes and livelihoods millions of men in uniform had lost their lives and millions more had been displaced by the war's destruction and the genocidal policies of the Nazi regime. From a range of methodological historical perspectives military cultural and social to film and gender and sexuality studies this volume explores how Europeans came to terms with these multiple pasts. With a focus on distinctive national experiences in both Eastern and Western Europe it illuminates how postwar stabilization coexisted with persistent insecurities injuries and trauma. **Robert Antelme** Martin Crowley, 2017-12-02 Best known for his 1947 memoir *L'Espèce humaine* Robert Antelme 1917-1990 is a central figure in the history of the European response to the Nazi concentration camps. In this first study in any language to be devoted to Antelme's work Martin Crowley reveals the author's vital yet insufficiently recognized influence on recent thought in France and elsewhere about such questions as the nature of community and the indivisibility of humanity. He explores the conclusions Antelme drew from his deportation and his involvement with the post war French left and provides the first detailed textual criticism of *L'Espèce humaine*. Examining the responses to the author's writing by such figures as Blanchot Perec Agamben Nancy and Derrida Crowley demonstrates Antelme's key contribution to the development of modern European thought. **The Moral Witness** Carolyn J. Dean, 2019-04-15 *The Moral Witness* is the first cultural history of the witness to genocide in the West. Carolyn J. Dean shows how the witness became a protagonist of twentieth century moral culture by tracing the emergence of this figure in courtroom battles from the 1920s to the 1960s covering the Armenian genocide the Ukrainian pogroms the Soviet Gulag and

the trial of Adolf Eichmann In these trials witness testimonies differentiated the crime of genocide from war crimes and began to form our understanding of modern political and cultural murder By the turn of the twentieth century the witness to genocide became a pervasive icon of suffering humanity and a symbol of western moral conscience Dean sheds new light on the recent global focus on survivors trauma Only by placing the moral witness in a longer historical trajectory she demonstrates can we understand how the stories we tell about survivor testimony have shaped both our past and contemporary moral culture

Writing Against Expulsion in the Post-War World David Herd,2023 Herd tells a pre history of the Hostile Environment returning to a period following the Second World War when the brutal consequences of a politics of expulsion were visible The book is a deep defence of human rights at a moment when such rights are under attack It shows how we can resist and think beyond the politics of border and nation

Germany from the Outside Laurie Ruth Johnson,2022-09-08 The nation state is a European invention of the 18th and 19th centuries In the case of the German nation in particular this invention was tied closely to the idea of a homogeneous German culture with a strong normative function As a consequence histories of German culture and literature often are told from the inside as the unfolding of a canon of works representing certain core values with which every person who considers him or herself German necessarily must identify But what happens if we describe German culture and its history from the outside And as something heterogeneous shaped by multiple and diverse sources many of which are not obviously connected to things traditionally considered German Emphasizing current issues of migration displacement systemic injustice and belonging *Germany from the Outside* explores new opportunities for understanding and shaping community at a time when many are questioning the ability of cultural practices to effect structural change Located at the nexus of cultural political historiographical and philosophical discourses the essays in this volume inform discussions about next directions for German Studies and for the Humanities in a fraught era

Western Europe's Democratic Age Martin Conway,2022-06-14 A major new history of how democracy became the dominant political force in Europe in the second half of the twentieth century What happened in the years following World War II to create a democratic revolution in the western half of Europe In *Western Europe's Democratic Age* Martin Conway provides an innovative new account of how a stable durable and remarkably uniform model of parliamentary democracy emerged in Western Europe and how this democratic ascendancy held fast until the latter decades of the twentieth century Drawing on a wide range of sources Conway describes how Western Europe's postwar democratic order was built by elite intellectual and popular forces Much more than the consequence of the defeat of fascism and the rejection of Communism this democratic order rested on universal male and female suffrage but also on new forms of state authority and new political forces primarily Christian and social democratic that espoused democratic values Above all it gained the support of the people for whom democracy provided a new model of citizenship that reflected the aspirations of a more prosperous society This democratic order did not however endure Its hierarchies of class gender and race which initially gave it its strength as

well as the strains of decolonization and social change led to an explosion of demands for greater democratic freedoms in the 1960s and to the much more contested democratic politics of Europe in the late twentieth century Western Europe's Democratic Age is a compelling history that sheds new light not only on the past of European democracy but also on the unresolved question of its future
