Judaism Christianity and Islam each incorporated many aspects of ancient Near Eastern and Graeco Roman religion into their own prayers rituals and conceptions Even if they no longer conceived of the sun moon and the stars as eternal or divine Christians Jews and Muslims often continued to study the movements of the heavens as a map on which divine power could be read The reader already familiar with studies of ancient religion will find in *Prayer Magic and the Stars* both old friends and new faces Contributors include Gideon Bohak Nicola Denzey Jacco Dieleman Radcliffe Edmonds Marvin Meyer Michael G Morony Ian Moyer Francesca Rochberg Jonathan Z Smith Mark S Smith Peter Struck Michael Swartz and Kasia Szpakowska Published as part of Penn State s Magic in History series *Prayer Magic and the Stars* appears at a time of renewed interest in divination and occult practices in the ancient world It will interest a wide audience in the field of comparative religion as well as students of the ancient world and late antiquity

Naming the Witch Kimberly B. Stratton, 2022-05-03 Kimberly B Stratton investigates the cultural and ideological motivations behind early imaginings of the magician the sorceress and the witch in the ancient world Accusations of magic could carry the death penalty or at the very least marginalize the person or group they targeted But Stratton moves beyond the popular view of these accusations as mere slander In her view representations and accusations of sorcery mirror the complex struggle of ancient societies to define authority legitimacy and Otherness Stratton argues that the concept magic first emerged as a discourse in ancient Athens where it operated part and parcel of the struggle to define Greek identity in opposition to the uncivilized barbarian following the Persian Wars The idea of magic then spread throughout the Hellenized world and Rome reflecting and adapting to political forces values and social concerns in each society Stratton considers the portrayal of witches and magicians in the literature of four related periods and cultures classical Athens early imperial Rome pre Constantine Christianity and rabbinic Judaism She compares patterns in their representations of magic and analyzes the relationship between these stereotypes and the social factors that shaped them Stratton s comparative approach illuminates the degree to which magic was and still is a cultural construct that depended upon and reflected particular social contexts Unlike most previous studies of magic which treated the classical world separately from antique Judaism *Naming the Witch* highlights the degree to which these ancient cultures shared ideas about power and legitimate authority even while constructing and deploying those ideas in different ways The book also interrogates the common association of women with magic denaturalizing the gendered stereotype in the process Drawing on Michel Foucault s notion of discourse as well as the work of other contemporary theorists such as Homi K Bhabha and Bruce Lincoln Stratton s bewitching study presents a more nuanced ideologically sensitive approach to understanding the witch in Western history
