the endless cycle of poverty hunger and war that defines most of history If democracy individualism and the free market were humankind s destiny they should have appeared and taken hold a bit earlier in the evolutionary record The emergence of freedom and prosperity was nothing short of a miracle As Americans we are doubly blessed because the radical ideas that made the miracle possible were written not just into the Constitution but in our hearts laying the groundwork for our uniquely prosperous society Those ideas are Our rights come from God not from the government The government belongs to us we do not belong to it The individual is sovereign We are all captains of our own souls not bound by the circumstances of our birth The fruits of our labors belong to us In the last few decades these political virtues have been turned into vices As we are increasingly taught to view our traditions as a system of oppression exploitation and privilege the principles of liberty and the rule of law are under attack from left and right For the West to survive we must renew our sense of gratitude for what our civilization has given us and rediscover the ideals and habits of the heart that led us out of the bloody muck of the past or back to the muck we will go *God, Science and the Universe* John Swanson, 2010-03 No religion that claims to be relevant in today s world can ignore the truths that science teaches us Nor can it ignore the spiritual values and teachings of past generations The deep religious heritage of humanity is like a pirate s buried treasure chest The ancient chest decays into rotten wood and rusty iron but the precious jewels inside remain as fresh as the day they were buried They need only to be reclaimed and then placed in a fresh container The same is true for our religious heritage Religion today is undergoing a radical transformation that is affecting all aspects of our lives This book presents a synthesis between traditional values and our changing understanding of the universe We live in an age of science and technology that profoundly affects the way we see things *God Science and the Universe* presents the outline for a new faith grounded in the natural world
