Practices of Projection Gabriel Menotti, Virginia Crisp, 2020 To many the technological aspects of projection often go unnoticed only brought to attention during moments of crisis or malfunction For example when a movie theater projector falters the audience suddenly looks toward the back of the theater to see a sign of mechanical failure The history of cinema similarly shows that the attention to projection has been most focused when the whole medium is hanging in suspension During Hollywood s economic consolidation in the 30s projection defined the ways that sync sound technologies could be deployed within the medium Most recently the digitization of cinema repeated this process as technology was reworked to facilitate mobility These examples show how projection continually speaks to the rearrangement of media technology Projection therefore needs to be examined as a pivotal element in the future of visual media s technological transition In *Practices of Projection Histories and Technologies* volume editors Gabriel Menotti and Virginia Crisp address the cultural and

technological significance of projection Throughout the volume chapters reiterate that projection cannot and must not be reduced to its cinematic functions alone Borrowing media theorist Siegfried Zielinski's definition Menotti and Crisp refer to projection as the heterogeneous array of artefacts technical systems and particularly visual praxes of experimentation and of culture From this readers can understand the performative character of the moving image and the labor of the different actors involved in the utterance of the film text Projection is not the same everywhere nor equal all the time Its systems are in permanent interaction with environmental circumstances neighboring structures local cultures and social economies Thus the idea of projection as a universal fully autonomous operation cannot hold Each occurrence of projection adds nuance to a wider understanding of film screening technologies

Victorian Glassworlds Isobel Armstrong, 2008-04-24

Isobel Armstrong's startlingly original and beautifully illustrated book tells the stories that spring from the mass production of glass in nineteenth century England Moving across technology industry local history architecture literature print culture the visual arts optics and philosophy it will transform our understanding of the Victorian period The mass production of glass in the nineteenth century transformed an ancient material into a modern one at the same time transforming the environment and the nineteenth century imagination It created a new glass culture hitherto inconceivable Glass culture constituted Victorian modernity It was made from infinite variations of the prefabricated glass panel and the lens The mirror and the window became its formative elements both the texts and constituents of glass culture The glassworlds of the century are heterogeneous They manifest themselves in the technologies of the factory furnace in the myths of Cinderella and her glass slipper circulated in print media in the ideologies of the conservatory as building type in the fantasia of the shopfront in the production of chandeliers in the Crystal Palace and the lens made images of the magic lantern and microscope But they were nevertheless governed by two inescapable conditions First to look through glass was to look through the residues of the breath of an unknown artisan because glass was mass produced by incorporating glassblowing into the division of labour Second literally a new medium glass brought the ambiguity of transparency and the problems of mediation into the everyday It intervened between seer and seen incorporating a modern philosophical problem into bodily experience Thus for poets and novelists glass took on material and ontological political and aesthetic meanings Reading glass forwards into Bauhaus

modernism Walter Benjamin overlooked an early phase of glass culture where the languages of glass are different The book charts this phase in three parts Factory archives trade union records and periodicals document the individual manufacturers and artisans who founded glass culture the industrial tourists who described it and the systematic politics of window breaking Part Two culminating in glass under glass at the Crystal Palace reads the glassing of the environment including the mirror the window and controversy round the conservatory and their inscription in poems and novels Part Three explores the lens from optical toys to philosophical instruments as the telescope and microscope were known A meditation on its history and phenomenology Victorian Glassworlds is a poetics of glass for nineteenth century modernity **Journal of the Royal Society of Arts** Royal Society of Arts (Great Britain),1900 Playful Visions Meredith A. Bak,2020-03-17 The kaleidoscope the stereoscope and other nineteenth century optical toys analyzed as new media of their era provoking anxieties similar to our own about children and screens In the nineteenth century the kaleidoscope the thaumatrope the zoetrope the stereoscope and other optical toys were standard accessories of a middle class childhood used both at home and at school In Playful Visions Meredith Bak argues that the optical toys of the nineteenth century were the new media of their era teaching children to be discerning consumers of media and also provoking anxieties similar to contemporary worries about children s screen time Bak shows that optical toys which produced visual effects ranging from a moving image to the illusion of depth established and reinforced a new understanding of vision as an interpretive process At the same time the expansion of the middle class as well as education and labor reforms contributed to a new notion of childhood as a time of innocence and play Modern media culture and the emergence of modern Western childhood are thus deeply interconnected Drawing on extensive archival research Bak discusses among other things the circulation of optical toys and the wide visibility gained by their appearance as printed templates and textual descriptions in periodicals expanding conceptions of literacy which came to include visual acuity and how optical play allowed children to exercise a sense of visual mastery She examines optical toys alongside related visual technologies including chromolithography which inspired both chromatic delight and chromophobia Finally considering the contemporary use of optical toys in advertising education and art Bak analyzes the endurance of nineteenth century visual paradigms *Film – An International Bibliography* Malte Hagener,Michael Töteberg,2016-12-16 Kommentierte Bibliografie Sie gibt Wissenschaftlern Studierenden und Journalisten zuverlässig Auskunft über rund 6000 internationale Veröffentlichungen zum Thema Film und Medien Die vorgestellten Rubriken reichen von Nachschlagewerk über Filmgeschichte bis hin zu Fernsehen Video Multimedia **Shakespeare Survey: Volume 62, Close Encounters with Shakespeare's Text** Peter Holland,2009-10-22 Shakespeare Survey is a yearbook of Shakespeare studies and production Since 1948 Survey has published the best international scholarship in English and many of its essays have become classics of Shakespeare criticism Each volume is devoted to a theme or play or group of plays each also contains a section of reviews of that year s textual and critical studies and of the year s major British performances The theme for volume 62 is Close
