Forecasting William S. Mallios, 2013-03-09 Given the magnitude of currency speculation and sports gambling it is surprising that the literature contains mostly negative forecasting results Majority opinion still holds that short term fluctuations in financial markets follow random walk In this non random walk through financial and sports gambling markets parallels are drawn between modeling short term currency movements and modeling outcomes of athletic encounters The forecasting concepts and methodologies are identical only the variables change names If in fact these markets are driven by mechanisms of non random walk there must be some explanation for the negative forecasting results The Analysis of Sports Forecasting Modeling Parallels Between Sports Gambling and Financial Markets examines this issue *Who Shot Sports* Gail

Edelstein,2013-11-05 Total Propaganda moves the study

of propaganda out of the exclusive realm of world politics into the more inclusive study of popular culture media and politics. All the participatory functioning elements of the society are aspects of membership in the popular culture. Thus the values of popular music, media, politics, debates over social issues, and even international trade become everyday propaganda to which everyone may relate. To emphasize the necessity for new thinking about propaganda, Edelstein creates the concepts of the new propaganda and the old, and he devises a language of unonyms to convey their meanings more quickly. Oldprop is characteristic of mass cultures and utilizes totalitarian methods of conflict, hegemony, minimization, demonization, and exclusiveness to achieve its goals. By contrast, newprop is created by members of the popular culture to allow them to engage in accommodation, enhance the individual, and promote inclusiveness. Shifts in the old and the new propaganda are tracked across social issues such as race, religion, sexuality, gender, gun control, and the environment, as well as in fashion, politics, advertising, sports, media, and politics. Central to the concept of total propaganda is that it is not simply additive; it is the product of new energies that are produced by the fusing of propaganda in such related forums as music, art, advertising, sports, and politics. It is these synergies and their production of new energies that make total propaganda greater than the sum of its parts. Edelstein concludes that the most important distinction that should be drawn between mass culture and popular culture is its text, i.e., its propaganda. In a popular culture, everyone creates and consumes propaganda; in a mass culture, almost everyone consumes it, but only a few create it. This formulation offers new ways to discuss power and ideology in media texts. As an example, where once the least informed and the least educated were the most subject to propaganda, now the most informed and most educated often are the first to create propaganda and the first to consume it. **The 50**
