and sulphur They all labour under disease he says except gold which is the one metal gifted with perfect health Therefore a preparation of it would dispel every ill which flesh is heir to as well as the maladies of plants We may excuse his extravagances however in consideration of the services he rendered to science by his discovery of corrosive sublimate red oxide of mercury white oxide of arsenic nitric acid oxide of copper and nitrate of silver all of which originally issued from Gebir s laboratory Briefly speaking the hypothesis assumed by the alchemists was this all the metals are compounds and the baser contain the same elements as gold contaminated indeed with various impurities but capable when these have been purged away of assuming all its properties and characters The substance which was to effect this purifying process they called the philosopher s stone lapis philosophorum though as a matter of fact it is always described as a powder a powder red coloured and smelling strongly Few of the alchemists however venture on a distinct statement that they had discovered or possessed this substance The arch quack Paracelsus makes the assertion of course unblushing mendacity was part of his stock in trade and he pretends even to define the methods by which it may be realized Unfortunately to ordinary mortals his description is absolutely unintelligible Others there are who affirm that they had seen it and seen it in operation transmuting lead quicksilver and other of the inferior metals into ruddy gold One wonders that they did not claim a share in a process which involved such boundless potentialities of wealth
