reveals that the number of Christian books from this period is likely fewer than previously believed Bagnall explains why papyrus manuscripts have routinely been dated too early how the role of Christians in the history of the codex has been misrepresented and how the place of books in ancient society has been misunderstood The author offers a realistic reappraisal of the number of Christians in Egypt during early Christianity and provides a thorough picture of the economics of book production during the period in order to determine the number of Christian papyri likely to have existed Supporting a more conservative approach to dating surviving papyri Bagnall examines the dramatic consequences of these findings for the historical understanding of the Christian church in Egypt
