Maginot Line None Shall Pass:

The Maginot Line J.E Kaufmann,H.W Kaufmann,1997-10-28 After a history of the development of lines of fortifications in Europe and especially France chapters detail the planning design and building of the Maginot Line during the WWII era and describe its role in the war Includes a glossary c Book News Inc *The Maginot Line 1928-45* William Allcorn,2012-07-20 The Maginot Line the massive series of fortifications built by France in the 1930s to defend its borders with Germany and Italy is perhaps the most maligned collection of fortifications ever built Despite being a technological marvel and the most sophisticated and complex set of fortifications built up to that time it failed to save France from crushing defeat in 1940 Yet there are those who argue that it accomplished exactly what it was designed to do This book provides a concise and informative treatment of the Maginot Line from North East France to the Mediterranean Packed with plans contemporary and modern images plus digital artwork it presents a detailed visual exploration of this famous fortification system

Nonstate Warfare Stephen Biddle,2021-04-06 How nonstate military strategies overturn traditional perspectives on warfare Since September 11th 2001 armed nonstate actors have received increased attention and discussion from scholars policymakers and the military Underlying debates about nonstate warfare and how it should be countered is one crucial assumption that state and nonstate actors fight very differently In *Nonstate Warfare* Stephen Biddle upturns this distinction arguing that there is actually nothing intrinsic separating state or nonstate military behavior Through an in depth look at nonstate military conduct Biddle shows that many nonstate armies now fight more conventionally than many state armies and that the internal politics of nonstate actors their institutional maturity and wartime stakes rather than their material weapons or equipment determines tactics and strategies Biddle frames nonstate and state methods along a continuum spanning Fabian style irregular warfare to Napoleonic style warfare involving massed armies and he presents a systematic theory to explain any given nonstate actor s position on this spectrum Showing that most warfare for at least a century has kept to the blended middle of the spectrum Biddle argues that material and tribal culture explanations for nonstate warfare methods do not adequately explain observed patterns of warmaking Investigating a range of historical examples from Lebanon and Iraq to Somalia Croatia and the Vietcong Biddle demonstrates that viewing state and nonstate warfighting as mutually exclusive can lead to errors in policy and scholarship A comprehensive account of combat methods and military rationale *Nonstate Warfare* offers a new understanding for wartime military behavior *The Soviets, the Munich Crisis, and the Coming of World War II* Hugh Ragsdale,2004-01-22 The Munich crisis is everywhere acknowledged as the prelude to World War II If Hitler had been stopped at Munich then World War II as we know it could not have happened The subject has been thoroughly studied in British French and German documents and consequently we know that the weakness in the Western position at Munich consisted in the Anglo French opinion that the Soviet commitment to its allies France and Czechoslovakia was utterly unreliable What has never been seriously studied in the Western literature is the whole spectrum of East

European documentation This book targets precisely this dimension of the problem The Romanians were at one time prepared to admit the transfer of the Red Army across their territory The Red Army mobilised on a massive scale was informed that its destination was Czechoslovakia The Polish consul in Lodavia reported the entrance of the Red Army into the country In the meantime Moscow focused especially on the Polish rail network All of these findings are new and they contribute to a considerable shift in the conventional wisdom on the subject

The Maginot Line J. E. Kaufmann, H. W. Kaufmann, Aleksander Potocnik, Patrice Lange, 2011-03-23 The Maginot Line the complex system of strongpoints constructed between the world wars by the French to protect against attack from Germany is one of the most famous extensive and controversial defensive schemes in all military history It stretched from Belgium to Switzerland and from Switzerland to the Mediterranean and it represented the most advanced and ambitious system of static defenses of its time Yet it failed to deter German aggression or to halt the invasion of France in May 1940 Much of this historic line with its fortresses artillery positions tank traps blockhouses concrete bunkers has survived and can be visited today This invaluable handbook which has been written and compiled by the foremost experts in the field is a guide to the history of the line and all the major sites concerned

Tides of Fortune Zack Cooper, 2025-02-25 An ambitious look at how the twentieth century's great powers devised their military strategies and what their implications mean for military competition between the United States and China How will the United States and China evolve militarily in the years ahead Many experts believe the answer to this question is largely unknowable But Zack Cooper argues that the American and Chinese militaries are following a well trodden path For centuries the world's most powerful militaries have adhered to a remarkably consistent pattern of behavior determined largely by their leaders' perceptions of relative power shifts By uncovering these trends this book places the evolving military competition between the United States and China in historical context Drawing on a decade of research and on his experience at the White House and the Pentagon Cooper outlines a novel explanation for how militaries change as they rise and decline Tides of Fortune examines the paths of six great powers of the twentieth century tracking how national leaders adjusted their defense objectives strategies and investments in response to perceived shifts in relative power All these militaries followed a common pattern and their experiences shed new light on both China's recent military modernization and America's potential responses

Military Intelligence Professional Bulletin, 1999 *Mussolini's Army in the French Riviera* Emanuele Sica, 2015-12-30 In contrast to its brutal seizure of the Balkans the Italian Army's 1940-1943 relatively mild occupation of the French Riviera and nearby alpine regions bred the myth of the Italian brava gente or good fellow an agreeable occupier who abstained from the savage wartime behaviors so common across Europe Employing a multi-tiered approach Emanuele Sica examines the simultaneously conflicting and symbiotic relationship between the French population and Italian soldiers At the grassroots level Sica asserts that the cultural proximity between the soldiers and the local population one quarter of which was Italian smoothed the sharp angles of miscommunication and cultural faux pas at a

time of great uncertainty At the same time it encouraged a laxness in discipline that manifested as fraternization and black marketeering Sica's examination of political tensions highlights how French prefects and mayors fought to keep the tatters of sovereignty in the face of military occupation In addition he reveals the tense relationship between Fascist civilian authorities eager to fulfil imperial dreams of annexation and army leaders desperate to prevent any action that might provoke French insurrection Finally he completes the tableau with detailed accounts of how food shortages and French Resistance attacks brought sterner Italian methods why the Fascists attempted Italianization of the French border city of Menton failed and the ways the occupation zone became an unlikely haven for Jews

Victory in War William C. Martel, 2011-06-13 War demands that scholars and policy makers use victory in precise and coherent terms to communicate what the state seeks to achieve in war The failure historically to define victory in consistent terms has contributed to confused debates when societies consider whether to wage war This volume explores the development of a theoretical narrative or language of victory to help scholars and policy makers define carefully and precisely what they mean by victory in war in order to achieve a deeper understanding of victory as the foundation of strategy in the modern world

The 2006 Lebanon Campaign and the Future of Warfare Stephen D. Biddle, Jeffrey Allan Friedman, 2008 Hezbollah's conduct of its 2006 campaign in southern Lebanon has become an increasingly important case for the U S defense debate Some see the future of warfare as one of nonstate opponents employing irregular methods and advocate a sweeping transformation of the U S military to meet such threats Others point to the 2006 campaign as an example of a nonstate actor nevertheless waging a state like conventional war and argue that a more traditional U S military posture is needed to deal with such enemies in the future This monograph seeks to inform this debate by examining in detail Hezbollah's conduct of the 2006 campaign The authors use evidence collected from a series of 36 primary source interviews with Israeli participants in the fighting who were in a position to observe Hezbollah's actual behavior in the field in 2006 coupled with deductive inference from observable Hezbollah behavior in the field to findings for their larger strategic intent for the campaign

Do Good Fences Make Good Neighbors? Brent L. Sterling, 2009-10-30 A number of nations conspicuously Israel and the United States have been increasingly attracted to the use of strategic barriers to promote national defense In *Do Good Fences Make Good Neighbors* defense analyst Brent Sterling examines the historical use of strategic defenses such as walls or fortifications to evaluate their effectiveness and consider their implications for modern security Sterling studies six famous defenses spanning 2 500 years representing both democratic and authoritarian regimes the Long Walls of Athens Hadrian's Wall in Roman Britain the Ming Great Wall of China Louis XIV's Pr Carr France's Maginot Line and Israel's Bar Lev Line Although many of these barriers were effective in the short term they also affected the states that created them in terms of cost strategic outlook military readiness and relations with neighbors Sterling assesses how modern barriers against ground and air threats could influence threat perceptions alter the military balance and influence the builder's subsequent policy choices Advocates and critics of

strategic defenses often bolster their arguments by selectively distorting history Sterling emphasizes the need for an impartial examination of what past experience can teach us His study yields nuanced lessons about strategic barriers and international security and yields findings that are relevant for security scholars and compelling to general readers

Twilight of the Titans Paul K. MacDonald,Joseph M. Parent,2018-04-15 In *Twilight of the Titans* Paul K MacDonald and Joseph M Parent examine great power transitions since 1870 to determine how declining powers choose to behave identifying the strong incentives to moderate their behavior when the hierarchy of great powers is shifting Challenging the conventional wisdom that such transitions push declining great powers to extreme measures this book argues that intimidation provocation and preventive war are not the only alternatives to the loss of relative power and prestige Using numerous case studies MacDonald and Parent show how declining states tend to behave the policy options they have how rising states respond to those in decline and what conditions reward particular strategic choices

The Earth Remains Forever Rob Jackson, 2010-07-05 Writing especially for people who've tuned out the environmental debate, Rob Jackson persuasively argues that we're at a crucial turning point in environmental history where choices we make now will determine the quality of life into the unforeseeable future. Laying out the scientific facts in plain language and with flashes of humor, he shows how the escalation of population growth and resource consumption in the twentieth century caused problems from ozone depletion to global warming, habitat destruction, and biodiversity loss. At the same time, however, he highlights ongoing solutions to these problems and ways in which we can create a sustainable future for subsequent generations and all life on earth. His urgent message is not that we've already failed, but that we can succeed.
