Maine De Biran Critique De Locke:

Maine de Biran's 'Of Immediate Apperception' Maine de Biran, 2020-01-23 Written when Maine de Biran was coming into his philosophical maturity in 1807 *Of Immediate Apperception* was the first complete statement of his own philosophy of the will It was the winning entry to a competition organised by the Berlin Académie des Sciences et Belles Lettres on the subject of self awareness and of the possibility of an immediate apperception of the self It contains the core of Biran's philosophy of effort as it is developed in dialogue with the tradition of British empiricism in particular Notably it is in this work that Biran first reflects on the lived body and it marks the moment in which he fully accomplishes his break away from Condillac and the Ideological school With enlightening critical apparatus including an editor's introduction glossary and bibliography the publication of this edition shows how Biran's work is pivotal for the development of French philosophy and makes clear his influence on the later writings of Ravaisson and Bergson De la physiologie mentale Marc Jeannerod, 1996-04 A peine n e la psychologie suscita la rivalité de deux sciences la philosophie et la biologie Ce long conflit entre matérialisme et spiritualisme qui se poursuit aujourd'hui sous d'autres formes a sans doute été le principal moteur de ses progrès Ce que nous savons aujourd'hui de l'esprit résulte de cette histoire Biologie et psychologie s'y sont mutuellement façonnées Il est impossible de saisir l'imbrication actuelle de ces deux disciplines ni ce que l'on sait aujourd'hui du cerveau et de l'esprit sans comprendre cette genèse commune Marc Jeannerod retrace ici ce long affrontement Avec rigueur et clarté il nous montre comment des questions comme celles de la nature des réflexes de l'unicité de l'esprit de la localisation de l'intelligence ou pour la biologie de la localisation des facultés du développement de la pensée ou encore du statut des déviations et des pathologies se sont constituées travers cette querelle On verra dans ce livre s'affronter les savants et les disciplines rapporter des questions qui semblaient résolues mais se déplacent ou sont reformulées dans d'autres contextes On verra surtout comment après deux siècles de cette querelle de l'esprit est rendue possible la tentative moderne d'instauration d'une véritable physiologie du mental Marc Jeannerod est professeur de physiologie à l'Université Claude Bernard et directeur Lyon d'une unité de recherche Inserm en neurophysiologie Il est l'auteur du *Cerveau machine* et avec Jacques Hochman de *Esprit et sensations* Odile Jacob 1991 *Metaphysics and the Sciences in Nineteenth-Century France*, 2025-07-22 This volume is the first systematic study of the style of reasoning specific to the field of philosophy in nineteenth century France The chapters analyze the often dispersed responses to the fundamental question of the division of the sciences based on the reciprocal relationships of inclusion or exclusion of adversity or sorority between metaphysics and the positive sciences In line with the arrhythmic progress of the different forms of knowledge these responses renew the Condillacian criticisms of the Cartesian order of the relationships between metaphysics and physics Between a pronounced divorce and a successful marriage this volume traces the philosophical history of the various attempts at divorce or union which as the century progressed resulted in original hybridizations that aspired to define a new and ever problematic French philosophy The

Power of the Metaphysical Artifact Obed Frausto, 2023-02-06 In the nineteenth century French and Mexican intellectuals had a common interest in providing a groundwork for educating better citizens in response to social crises There were political and philosophical controversies regarding science and technology in this environment between spiritualists humanists and positivists scientists Power and knowledge were intertwined in these controversies Another objective of the book is to show that controversies can be seen as a dispute between two cultures between those in favor of science and technology and those in favor of philosophy and the humanities Their continuous arguments articulated a third culture based on an intertwining of power and knowledge This articulation had an implicit dimension in which philosophy science and technology had to interact to enrich the political potential of the human experience of thinking They were able to grasp a mix or a synthesis that conceptualized the power of a metaphysical artifact in which philosophy science and technology belong to the same culture where politics helps invite dialogue between different cultural religious and political perspectives **Maine de Biran, critique de Locke** Lucien Even, 1983 Peeters 1983 U t videam Werner Abraham, 1975-01-01 *Les Idéologues* Winfried Busse, Jürgen Trabant, 1986-01-01 Le présent volume réunit les contributions d'un colloque sur la pensée sémiotique et linguistique des Idéologues qui s'est tenu Berlin du 3 au 5 octobre 1983 Ce recueil d'articles fait suite à un fascicule de la revue Histoire Epistémologie Langage qui avait consacré au même sujet et dont il complète et amplifie les perspectives en ce qui concerne la portée européenne de la discussion Le volume manifeste l'intérêt que beaucoup d'entre nous portent surtout dans les sciences du langage ces philosophes longtemps négligés par l'histoire de la pensée *Philosophie Et Culture* Venant Cauchy, 1988 *The Postmodernist Critique of the Project of Enlightenment* Sven-Eric Liedman, 2023-12-14 The principal task of the book series Poznań Studies in the Philosophy of the Sciences and the Humanities is to promote those developments in philosophy that respect the tradition of great philosophical ideas on the one hand and the manner of philosophical thinking introduced by analytical philosophy on the other One of the standing aims of the series in the past has been to provide a forum of exchange of ideas between philosophers of both sides of the Iron Curtain The series publishes guest edited volumes devoted to the philosophy of the natural sciences the social sciences and the humanities as well as to foundational topics in metaphysics epistemology and social philosophy The Sciences of the Soul Fernando Vidal, 2024-05-31 Fernando Vidal's trailblazing text on the origins of psychology traces the development of the discipline from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth Originally published in 2011 The Sciences of the Soul continues to be of wide importance in the history and philosophy of psychology the history of the human sciences more generally and in the social and intellectual history of eighteenth century Europe *The Origins of Life* Anna-Teresa Tymieniecka, 2013-03-09 Life appears ungraspable yet its understanding lies at the heart of current preoccupations In our attempt to understand life through its origins the ambition of the present collection is to unravel the network of the origin of the various spheres of sense that carry it onwards The

primogenital matrix of generation Tymieniecka elaborated as the fulcrum of this collection elucidates the main riddles of the scientific philosophical controversies concerning the status of various spheres that seek to make sense of life

The History and Philosophy of Materialism Charles T. Wolfe, John Symons, 2024-11-26 Materialism the view that facts are dependent upon or reducible to physical processes is one of the most long standing and controversial of all philosophical theories Originating in antiquity its proponents include Epicurus Hobbes Diderot Darwin and Marx whilst its impact on modern physics and consciousness debates reverberates strongly today It is also an important yet generally overlooked feature of Indian Chinese and Islamic thought This major collection the first of its kind explores the fascinating philosophical history of materialism from the ancient world to the twenty first century Comprising thirty one chapters by an international team of contributors the volume is divided into six clear parts Ancient Non Western and Medieval Philosophy Renaissance and Early Modern Philosophy Enlightenment Materialisms Nineteenth Century Philosophy Twentieth Century Philosophy Contemporary Philosophy Philosophy of Mind Metaphysics and Critique Within these sections key topics are covered including materialism in classical Greece India and China and Aztec metaphysics Renaissance materialism and anti materialism materialism and Islamic philosophy materialism in the French and German Enlightenment atheism and materialism nineteenth century materialist controversies and debates in physics Marxism and materialism physicalism and the new materialism The History and Philosophy of Materialism is ideal for those studying and researching the history of this vital philosophical movement especially those with an interest in the history and philosophy of science ancient and early modern philosophy and the Enlightenment It will also be valuable reading for those in related disciplines such as history sociology and religion

Joseph de Maistre's Life, Thought, and Influence Richard A. Lebrun, 2001-10-08 Joseph de Maistre 1753-1821 was an extraordinarily gifted and insightful commentator on foundational developments that have shaped our modern world His reaction to the Enlightenment and the French Revolution though hostile was remarkably open and included innovative and still valuable theorizing about such human phenomena as violence and unreason The political and theoretical issues he addressed continue to challenge us today In Joseph de Maistre's Life Thought and Influence leading Maistre scholars offer interpretations of his thought and make available in English recent French scholarship on his life and work They provide a portrait of Maistre as a significant thinker in numerous fields upsetting the image of him as a backward looking reactionary a reinterpretation furthered by contemporary interest in Counter Enlightenment thought in general Joseph de Maistre's Life Thought and Influence is a valuable resource providing not only a cross section of current Maistre scholarship but also notes and biographical suggestions for further study Contributors include Owen Bradley University of Tennessee Jean Louis Darcel Universit de Savoie Jean Dinezet former OECD director general Graeme Garrard University of Wales Richard A Lebrun Vera Miltchyna Writer's Union Moscow Jean Yves Pranchère independent scholar W Jay Reedy Bryant College and Benjamin Thurston D Phil candidate Oxford

Bibliographia Cartesiana Gregor Sebba, 2012-12-06 This

book offers a new type of working tool for Cartesian studies It presents the literature of the last 160 years in alphabetical order Part Two combined with a systematic analytical survey Part One and a detailed topical index to the whole Part Three This organization makes it possible to turn bibliogra phy from a repository of references into a workshop of research The system atic survey of Part One and the topical index of Part Three together offer a mise au point of Descartes studies over their full historical and topical range The results have often been surprising and illuminating to the author and if his experience is any guide the reader too will begin to wonder about certain seemingly well settled points or marvel at the Protean shapes which our elusive philosopher assumes when mighty commentators force him to reveal his true nature A work which has been in the making for fifteen years must show the traces of expansion in scope and changes in evaluation Bibliographia cartesiana amends my Descartes chapter in A Critical Bibliography of French Literature v 3 1961 see no I9a and supersedes an earlier version of Parts One and Two published in 1959 under the main title Descartes and his Philosophy v 1 set no I8a Part I Introduction to Descartes Studies divides the field into eleven broad areas

The New Werner Twentieth Century Edition of the Encyclopaedia Britannica ,1907 **Méditations critiques; ou examen approfondi de plusieurs doctrines sur l'homme et sur Dieu** Louis Auguste Jean François Philippe GRUYER,1847 *The Encyclopaedia Britannica* ,1894 **The Eighteenth Century** ,1990 **Being Inclined** Mark Sinclair,2019-10-24 Being Inclined is the first book length study in English of the work of F lix Ravaisson France s most influential philosopher in the second half of the nineteenth century Mark Sinclair shows how Ravaisson in his great work Of Habit 1838 understands habit as tendency and inclination in a way that provides the basis for a philosophy of nature and a general metaphysics In examining Ravaisson s ideas against the background of the history of philosophy and in the light of later developments in French thought Sinclair shows how Ravaisson gives an original account of the nature of habit as inclination within a metaphysical framework quite different to those of his predecessors in the philosophical tradition Being Inclined sheds new light on the history of modern French philosophy and argues for the importance of the neglected nineteenth century French spiritualist tradition It also shows that Ravaisson s philosophy of inclination of being inclined is of great import for contemporary philosophy and particularly for the contemporary metaphysics of powers given that ideas about tendency have recently come to prominence in discussions concerning dispositions laws and the nature of causation Being Inclined therefore offers a detailed and faithful contextualist study of Ravaisson s masterpiece demonstrating its continued importance for contemporary thought
