Mainstreaming The Prelingually Deaf Child

Phillip S. Strain, Mary Margaret Kerr

Mainstreaming The Prelingually Deaf Child:

Mainstreaming the Prelingually Deaf Child, 1978 Deaf Children in Public Schools Claire L. Ramsey, 1997 In this pioneering book Ramsey assesses the progress of three second grade deaf students by first pointing out that they were placed in two different environments with the general population of hearing students and separately with other deaf and hard of hearing children Her study reveals that although both settings were ostensibly educational inclusion in the general population was done to comply with the law not to establish specific goals for the deaf children In contrast self contained classes for deaf and hard of hearing children were designed especially to concentrate upon their particular learning needs This cohesive book offers educators scholars and parents a remarkable stage for assessing and enhancing the educational context for the deaf children within their purview Language, Cognition, and Deafness Michael Rodda, Carl Grove, 2013-08-21 First published in 1987 This book is intended as an introduction to the field of communication and deafness with particular reference to cognition and the various forms of language used by hearing impaired people It is aimed at an audience comprising teachers and student teachers of the deaf speech pathologists and students of speech pathology social workers and students of social work psychologists and students of psychology and to some extent the parents of deaf children and deaf people themselves It attempts to provide a concise summary of the topic and indeed as well as being for the audience just described it will be useful to anyone with an interest in the psychological sociological and linguistic ramifications of hearing loss *Hearing in Children* Jerry L. Northern, Marion P. Downs, 2002 This edition provides a reference and description of the current state of knowledge on hearing and auditory disorders in infants toddlers and young children *Communication Disorders in the Classroom* William O. Handicapped Children Act, 1977 United States. Congress. Senate. Committee on Human Resources. Subcommittee on the Handicapped,1977 Deaf Identities Irene W. Leigh,Catherine A. O'Brien,2020 Much has been written about deaf identities however no single book has focused specifically on how different academic disciplines conceptualize deaf identities in one fell swoop This book *Deaf Identities Exploring New Frontiers* does exactly that It is a unique compilation of multidisciplinary perspectives on the lens of deaf identities written by scholars representing a variety of disciplines including anthropology counseling education literary criticism practical religion philosophy psychology sociology social work and Deaf Studies

Nowhere else can one find careful scrutiny of the meaning of deaf identities within for example the disciplines of philosophy and religion Where else can one find a sense of identity in passing as a deaf person instead of almost passing as a hearing person Where else can one examine mutating identities in progressing from Spiderman to the Incredible Hulk The book focuses on how the contributors perceive what deaf identities represent how these identities develop and the societal influences that shape these identities Intersectionality examination of medical educational and family systems linguistic deprivation the role of oppressive influences what the deaf body is about strategies to facilitate positive deaf identity development and how ethical values are interpreted are among the multiple topics examined in the search to better understand how deaf identities come into being In presenting their deaf identity paradigms contributors have endeavored to intertwine both scholarly and personal perspectives in their efforts to personalize academic content The result is a book that reinforces the multiple ways in which deaf identities are manifested
