The Routledge Introduction to American War Literature Jennifer Haytock, 2018-05-11 War and violence have arguably been some of the strongest influences on literature but the relation is complex more than just a subject for story telling war tends to reshape literature and culture. Modern war literature necessarily engages with national ideologies and this volume looks at the specificity of how American literature deals with the emotional intellectual social political and economic contradictions that evolve into and out of war. Raising questions about how American ideals of independence and gender affect representations of war while also considering how specifically American experiences of race and class interweave with representations of combat this book is a rich and coherent introduction to these texts and critical debates.

Cultural Ways of Worldmaking Vera Nünning, Ansgar Nünning, Birgit Neumann, 2010-06-29 Taking as its point of departure Nelson Goodman's theory of symbol systems as delineated in his seminal book *Ways of Worldmaking* this volume gauges the possibilities and perspectives offered by the worldmaking approach as a model for the study of culture. Its main objectives are to explore the usefulness and scope of the approach for the study of culture and to supplement Goodman's philosophy of worldmaking with a number of complementary disciplinary perspectives literary and cultural approaches and new questions and applications. It focuses on three key issues or concepts which illuminate ways of worldmaking and their interdisciplinary relevance and ramifications viz 1 theoretical approaches to ways of worldmaking 2 the impact of media on ways of worldmaking and 3 narratives as ways of worldmaking. The volume serves to demonstrate how specific media and narratives affect the worlds that are created and shows how these worlds are established as socially relevant. It also illustrates the extent to which ways of worldmaking are imbued with cultural values and thus inevitably implicated in power relations.
