The Strange Death of Moral Britain Christie Davies, In the last half of the twentieth century a once respectable and religious Britain became a seriously violent and dishonest society one in which person and property were at risk family breakdown was ubiquitous and drug and alcohol abuse was rising The Strange Death of Moral Britain demonstrates in detail the roots of Britain s decline It also shows how a society strongly Protestant in both morality and identity became one of the most secular societies in the world The culture wars about abortion capital punishment and homosexuality which have convulsed the United States have little meaning in Britain where there is neither a moral majority nor any indigenous emphasis on rights In the period when Britain had a strong national and religious identity defense of this identity led to legal persecution of male homosexuals As Britain s identity crumbled homosexuality ceased to be an important issue for most people Similarly all the pressing questions on abortion capital punishment and homosexuality were settled permanently on a purely utilitarian basis in Britain where all sources of moral argument are weak The ending of the death penalty marked the decline of the influence of the official hierarchies of church and state the Church of England the armed forces and their representative the Conservative Party The Strange Death of Moral Britain is a study of moral change secularization loss of identity and the growth of deviant behavior in Britain in the twentieth century Based on detailed scholarship it is tightly argued and clearly written with a minimum of jargon It will be of interest to scholars in religious studies and British social history and to a general reading public concerned with timely moral controversies Christie Davies was for eighteen years a professor at the University of Reading England and has been a visiting lecturer in the United States and India He is the author of several books including The Mirth of Nations available from Transaction and his articles have appeared in leading academic journals in sociology criminology social history and religious studies among others

Autonomy, Gender, Politics Marilyn Friedman, 2003-01-09 Women have historically been prevented from living autonomously by systematic injustice subordination and oppression The lingering effects of these practices have prompted many feminists to view autonomy with suspicion Here Marilyn Friedman defends the ideal of feminist autonomy In her eyes behavior is autonomous if it accords with the wants cares values or commitments that the actor has reaffirmed and is able to sustain in the face of opposition By her account autonomy is socially grounded yet also individualizing and sometimes socially disruptive qualities that can be ultimately advantageous for women Friedman applies the concept of autonomy to domains of special interest to women She defends the importance of autonomy in romantic love considers how social institutions should respond to women who choose to remain in abusive relationships and argues that liberal societies should tolerate minority cultural practices that violate women s rights so long as the women in question have chosen autonomously to live according to those practices

A New Moral Vision Andrea L. Turpin, 2016-08-25 In *A New Moral Vision* Andrea L. Turpin explores how the entrance of women into U S colleges and universities shaped changing ideas about the moral and religious purposes of higher education in unexpected ways and in turn profoundly shaped American culture In the decades before the Civil War evangelical Protestantism provided the main impetus for opening the highest levels of American education to women Between the Civil War and World War I however shifting theological beliefs a growing cultural pluralism and a new emphasis on university research led educators to reevaluate how colleges should inculcate an ethical outlook in students just as the proportion of female collegians swelled In this environment Turpin argues educational leaders articulated a new moral vision

for their institutions by positioning them within the new landscape of competing men's women's and coeducational colleges and universities. In place of fostering evangelical conversion, religiously liberal educators sought to foster in students a surprisingly more gendered ideal of character and service than had earlier evangelical educators. Because of this moral reorientation, the widespread entrance of women into higher education did not shift the social order in as egalitarian a direction as we might expect. Instead, college graduates who formed a disproportionate number of the leaders and reformers of the Progressive Era contributed to the creation of separate male and female cultures within Progressive Era public life and beyond. Drawing on extensive archival research at ten trend-setting men's women's and coeducational colleges and universities, *A New Moral Vision* illuminates the historical intersection of gender ideals, religious beliefs, educational theories, and social change in ways that offer insight into the nature and cultural consequences of the moral messages communicated by institutions of higher education today.

The *Journal of Business Ethics* was founded by Alex C. Michalos and Deborah C. Poff and published its first issue in March 1982. It is the most frequently cited business ethics journal in the world. The Journal has always offered a multi-disciplinary and international public forum for the discussion of issues concerning the interaction of successful business and moral virtue. Its authors and readers are primarily scholars and students in social sciences and philosophy with special interests in the interaction of these disciplines with business or corporate responsibility. Since the field of business ethics grew simultaneously with the growth of the Journal, a collection of its most cited articles is tantamount to a collection of the articles that had the greatest influence in defining the field over its first 30 years of development. In this anniversary volume, an overview of citation classics from the Journal is presented. The 33 most frequently cited articles are reproduced, and brief reflections on the impact of the Journal on the field are given from over 100 scholars who authored citation classics and/or distinguished papers as well as those who served on the Editorial Board and/or are recognized as leaders in the field.
