The Social Meaning of Midwifery Sheila C. Hunt,Anthea Symonds,1995-11-11 Many books exist illustrating the power structure of the medical professional which is male gendered and its significance for women within this No study has so far tackled the relationship between women as child birth professionals and women as mothers The attitude of the midwife towards the labour ward is examined How the mother is marginalised by the managerial role taken on by the midwife towards the production process childbirth and the object of production child is the main focus of this book The stream of feminist orientation which is said to run through a section of the midwifery profession is examined *Failure to Progress* Rosemary Mander,Valerie Fleming,2013-10-11 The book provides an up to date picture of contemporary midwifery in the UK

It analyses the profession's strengths and weaknesses and discusses current opportunities and threats to the midwife's role. The statutory organisations that control midwifery are currently being overhauled and the issues raised in the book are relevant to that process. All the contributors are actively involved in the provision of care to the childbearing woman and most are practising midwives. The book considers the development of midwifery in the UK and in the context of different forms of development in other countries notably Germany and New Zealand.

Midwifery and the Medicalization of Childbirth

Edwin R. Van Teijlingen, 2004. This book provides an introduction to the sociological study of midwifery. The readings have been selected to highlight the interplay between midwifery and medicine reflecting the medicalization of childbirth. It highlights the major themes in both a historical and a current context as well as western and non-western societies. Two major themes underlie the organization of this book: that the conception of midwifery must be broadened to encompass a sociological perspective and that the ongoing trend toward the medicalization of midwifery is crucial to an understanding of the historical, current and future status of midwifery. By medicalization of childbirth and midwifery, the author means the increasing tendency for women to prefer a hospital delivery to a home delivery, the increasing trend toward the use of technology and clinical intervention in childbirth and the determination of medical practitioners to confine the role played by midwives in pregnancy and childbirth if any to a purely subordinate one.

Health Promotion in Midwifery: Principles and practice Jan Bowden, Vicky Manning, 2017-07-27. An expanded and updated new edition of *Health Promotion in Midwifery*, this book explores the principles of health promotion within the practical context of midwifery. RCM Midwives Journal, 2001

Community-based Maternity Care Geoffrey Marsh, Mary Renfrew, 1998-10-22. This important book makes the case for placing maternity care in the community. It has been written by a multidisciplinary group. The first section considers the role and function of the participants in community-based maternity care: the woman, the midwife and the GP. The second section discusses four major contemporary issues: the radically changing social background, the economics of care, audit and education of the carers. Next, the major clinical challenges in maternity care are tackled: how to reduce the differences in morbidity and mortality which are associated with differences in age, social class and ethnicity; the care of disadvantaged groups; prematurity and low birth weight; and their prevention. Technology used in childbirth and the fetal origins of adult disease. Finally, all aspects of the clinical care carried out by GPs and midwives are covered. The editors hope that after reading this book, midwives, GPs and obstetricians should find the theory underpinning their work has been sharply defined and that their work will be more effective and evidence-based. The editors, a GP and a midwife, anticipate the resolution of the current tensions between midwife, GP and obstetrician and look forward to a responsive, effective and sensitive service for mothers and babies in the next millennium.

The Politics of Maternity Rosemary Mander,Jo Murphy-Lawless,2013-04-12 The evidence surrounding the skills and approaches to support good birth has grown exponentially over the last two decades but so too have the obstacles facing women and midwives who strive to achieve good birth This new book critically explores the complex issues surrounding contemporary childbirth practices in a climate which is ever more medicalised amidst greater insecurity at broad social and political levels The authors offer a rigorous and thought provoking analysis of current clinical managerial and policy making environments and how they have prevented sustaining the kind of progress we need The Politics of Maternity explores the most hopeful developments such as the abundant evidence for one to one care for women and sets these accounts against the background of changes in health service organisation and provision that block these approaches from becoming an everyday occurrence for women giving birth The book sets out the case for renewed attention to the politics of childbirth and what this politics must entail if we are to give birth back to women Designed to help professionals cope with the transition from education to the reality of the system within which they learn and practise this inspiring book will help to assist them to function and care effectively in a changing health care environment
