## Old World And The New:

Della Cruscan Poetry, Women and the Fashionable Newspaper Claire Knowles, 2023-09-15 This book explores Della Cruscan poetry in the late eighteenth century literary scene A sociable ornate and deeply theatrical type of poetry Della Cruscanism was associated with writers like Robert Merry Mary Robinson and Hannah Cowley While Merry is the poet most commonly associated with the Della Cruscan school this book argues that Della Cruscanism was a movement dominated by female poets and that this was one of the key reasons for the later disavowal and downgrading of its poetic accomplishments It offers a close examination of these women writers and their role in shaping the poetic culture of the fashionable newspaper In doing so this study offers the first account of the feminization of the fashionable newspaper and of popular literary culture in the final years of the eighteenth century

Manipulative Monkeys Susan Perry, 2011-03-11 With their tonsured heads white faces and striking cowls the monkeys might vaguely resemble the Capuchin monks for whom they were named How they act is something else entirely They climb onto each other's shoulders four deep to frighten enemies They test friendship by sticking their fingers up one another's noses They often nurse but sometimes kill each other's offspring They use sex as a means of communicating And they negotiate a remarkably intricate network of alliances simian politics and social intrigue Not monkish perhaps but as we see in this downright ethnographic account of the capuchins of Lomas Barbudal their world is as complex ritualistic and structured as any society Manipulative Monkeys takes us into a Costa Rican forest teeming with simian drama where since 1990 primatologists Susan Perry and Joseph H Manson have followed the lives of four generations of capuchins What the authors describe is behavior as entertaining and occasionally as alarming as it is recognizable the competition and cooperation the jockeying for position and status the peaceful years under an alpha male devolving into bloody chaos and the complex traditions passed from one generation to the next Interspersed with their observations of the monkeys lives are the authors colorful tales of the challenges of tropical fieldwork a mixture so rich that by the book's end we know what it is to be a wild capuchin monkey or a field primatologist And we are left with a clear sense of the importance of these endangered monkeys for understanding human behavioral evolution

**The Advocate of Peace**, 1910 **Molecular Biology and Evolution of Blood Group and MHC Antigens in Primates** Antoine Blancher, Jan Klein, Wladyslaw W. Socha, 2012-12-06 Zoologists have categorized primates into a single order and no one doubts today that they share a common ancestry Humans and Old and New World non human primate species from the lemurs of Madagascar to the African anthropoid apes represent diverging branches of an evolutionary common trunk Along with species specific characters all primates have retained a number of ancestral traits relics of their common origin The comparative study of these species specific and ancestral traits makes it possible to reconstruct the evolutionary pathways of humans and nonhuman primates The discovery of the human blood groups and later of the Major Histocompatibility Complex MHC had a seminal effect on the field of human genetics providing the first sound examples of Mendelian polymorphisms The use of blood group and

MHC alleles as genetic markers in biological anthropology generated a conceptual revolution and persuaded researchers to begin to think in terms of populations and not only in terms of typology. The counterparts of these human red and white cell antigens were found and studied in nonhuman primates and progress in this field is summarized in this book. *Rabies* Anthony R. Fooks, Alan C.
