Old World Archaeology ,1972 *Old World Archaeology* ,1972 *Old World Archaeology- Foundations of Civilization - Readings from Scientific American.*, with Introductions by C.C. Lamberg-Karlovsky ,1972 Diseases and Human Evolution Ethne Barnes,2007-02-16 Urgent interest in new diseases such as the coronavirus and the resurgence of older diseases like tuberculosis has fostered questions about the history of human infectious diseases How did they evolve Where did they originate What natural factors have stalled the progression of diseases or made them possible How does a microorganism become a pathogen How have infectious diseases changed through time What can we do to control their occurrence Ethne Barnes offers answers to these questions using information from history and medicine as well as from anthropology She focuses on changes in the patterns of human behavior through cultural evolution and how they have affected the development of human diseases Writing in a clear lively style Barnes offers general overviews of every variety of disease and their carriers from insects and worms through rodent vectors to household pets and farm animals She devotes whole chapters to major infectious diseases such as leprosy syphilis smallpox and influenza Other chapters concentrate on categories of diseases gut bugs for example including cholera typhus and salmonella The final chapters cover diseases that have made headlines in recent years among them mad cow disease West Nile virus and Lyme disease In the tradition of Berton Rouech Hans Zinsser and Sherwin Nuland Ethne Barnes answers questions you never knew you had about the germs that have threatened us throughout human history The Ancient Near East Amélie Kuhrt,2020-11-25 The Ancient Near East embraces a vast geographical area from the borders of Iran and Afghanistan in the east to the Levant and Anatolia and from the Black Sea in the north to Egypt in the south It was a region of enormous cultural political and linguistic diversity In this authoritative new study Amélie Kuhrt examines its history from the earliest written documents to the conquest of Alexander the Great c 3000-330 BC This work dispels many of the misapprehensions which have surrounded the study of the region It provides a lucid up to date narrative which takes into account the latest archaeological and textual discoveries and deals with the complex problems of interpretation and methodology The Ancient Near East is an essential text for all students of history of this region and a valuable introduction for students and scholars working in related subjects Winner of the AHO s 1997 James Henry Breasted Award **The Emergence of Civilization** Charles Keith Maisels,2003-12-16 The Emergence of Civilization is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region Charles Maisels argues that our present assumptions about state formation based on nineteenth century speculations are wrong His investigation illuminates the changes in scale complexity and hierarchy which accompany the development of civilisation The book draws conclusions about the dynamics of social change and the processes of social evolution in general applying those concepts to the rise of Greece and Rome and to the collapse of the classical Mediterranean world *The Ancient Near East, C. 3000-330 BC* Amélie Kuhrt,1995 A single authored two volume

work which makes no claims to comprehensiveness but selectively treats periods and areas usually studied in universities treatment of Egypt is brief because of the availability of studies of Egyptian history at all levels It is intended as an introduction to ancient Near Eastern history to the main sources used for reconstructing societies and political systems and to some historical problems and scholarly debates The area discussed extends from Turkey Anatolia and Egypt in the west through the Levant which includes Israel Lebanon Jordan and Syria west of the Euphrates to Mesopotamia into Iran Volume I covers c 3000 BC to c 1200 BC volume II 1200 BC to 330 BC The author is a Reader in Ancient History at University College London Annotation copyright by Book News Inc Portland OR

Thales of Miletus Patricia F. O'Grady, 2017-03-02 What is the basic building block of the universe Thales of Miletus was the first to ask this fundamental yet to be answered question in the sixth century B C This book offers an in depth account of the answers he gave and of his adventure into many areas of learning philosophy science mathematics and astronomy Thales proved that the events of nature were comprehensible to man and could be explained without the intervention of mythological beings Henceforth they became subject to investigation experiment questioning and discussion Presenting for the first time in the English language a comprehensive study of Thales of Miletus Patricia O Grady brings Thales out of pre Socratic shadows into historical illumination and explores why this historical figure has proved to be of lasting significance

Placemaking David Stea, Mete Turan, 2024-11-07 Originally published in 1993 as part of the Ethnoscapes Current Challenges in the Environmental Social Sciences series reissued now with a new series introduction Placemaking Production of Built Environment in Two Cultures is a book about the context of placemaking the production of vernacular architecture and settlement It is an attempt at prototheory the formation of a perspective with which to view built environment produced by traditional societies Focusing on two examples carved dwellings and other masonry structures of Anatolian Turkey and pre and post conquest Southwestern pueblos in the US Architectural and settlement phenomena are analyzed primarily in terms of the social forces that gave rise to them rather than their formal properties

Asceticism and Healing in Ancient India Kenneth G. Zysk, 1998-01-01 The rich Indian medical tradition is usually traced back to Sanskrit sources the earliest of which cannot much antedate the common era In this book Kenneth Zysk shows that Buddhist scriptures some centuries older than this contain abundant information about medical practice and are our earliest evidence for a rational approach to medicine in India He argues that Buddhism and the medical tradition were mutually supportive that Buddhist monks and people associated with them contributed to the development of medicine while their skills as physical as well as spiritual healers enhanced their reputation and popular support Drawing on a wide range of textual

archaeological and secondary sources Zysk first presents an overview of the history of Indian Medicine in its religious context He then examines primary literature from the Pali Buddhist Canon and from the Sanskrit treatises of Bhela Caraka and susruta By close comparison of these two bodies of literature Zysk convincingly shows how the theories delineated in the medical classics actually became practice

Flintknapping John C. Whittaker, 2010-06-25 A detailed practical guide to the ancient craft of making stone tools featuring an archaeological analysis Flintknapping is an ancient craft enjoying a resurgence of interest among both amateur and professional students of prehistoric cultures In this guide John C Whittaker offers the most detailed handbook on flintknapping currently available and the only one written from the archaeological perspective of interpreting stone tools as well as making them Flintknapping contains detailed practical information on making stone tools Whittaker starts at the beginner level and progresses to discussion of a wide range of techniques He includes information on necessary tools and materials as well as step by step instructions for making several basic stone tool types Numerous diagrams allow the reader to visualize the flintknapping process and drawings of many stone tools illustrate the discussions and serve as models for beginning knappers Written for a wide amateur and professional audience Flintknapping will be essential for practicing knappers as well as for teachers of the history of technology experimental archaeology and stone tool analysis A mid range user s guide to flintknapping is long overdue There have been some admirable attempts to produce such a volume but these have been targeted at specific fairly narrow audiences Not so with Flintknapping Whittaker s clear aim is to reach professional archaeologists as well as hobbyists I believe he achieves this goal with incredible skill and humor I highly recommend this book to everyone interested in flintknapping Plains Anthropologist Very attractive to readers interested in ancient crafts survival skills or the history of technology Far superior to anything currently available James C Woods director The Herrett Museum College of Southern Idaho

TRADE AND THE DEVELOPMENT OF COMPLEX SOCIETIES IN THE PREHISTORY OF THE CENTRAL PHILIPPINES: THE CEBU CENTRAL SETTLEMENT CASE. (VOLUMES I-III). MASAO. NISHIMURA,1992

the period in question *African Social Institutions* C. Onyeka Nwanunobi,1992 **The Indus River** Azra Meadows,P. S. Meadows,1999

The Indus River is one of the world's greatest rivers extending from the Himalayas to the Arabian Sea. It has a unique range of geographical and geological features among them mountains, plains and deltas. The river and its surrounding lands affect the living standards of the entire population of Pakistan. In fact, recent economic developments such as agriculture, forests, fisheries, oil, gas and hydroelectricity are all dependent on the river. However, problems such as deforestation, waterlogging, pollution and desertification will no doubt affect the river as they continue to grow in magnitude around the world. This book looks at the interaction between the Indus River and its landscape, biodiversity, resources and people as well as its future.

World authorities recommend interdisciplinary programs for management, conservation and future development of this unique water system and important resources. This book is essential reading for all those involved in environmental studies and geography. A Source-book of Indian Archaeology: Settlements, technology and trade Frank Raymond Allchin,Dilip K.

Chakrabarti,1979. Illustrations Numerous. B w Illustrations Maps. Description: The articles selected for this anthology are meant to act as a guide to the changing ramifications and some major foci of Indian archaeology up to the mid eighties. The subsequent publications are still too close to us for a clear historical assessment. Although published some eighteen years later than the first volume compiled with the same intention, this is a definitive source book in its own right and will further help people to turn to some major studies which have become over the years difficult of access. Like archaeology elsewhere, Indian archaeology too is getting increasingly complex and perhaps polarized. In a sense, the articles incorporated in the present volume serve as a reminder of some of the issues which confronted Indian archaeology before the current phase of complexity and politicization. The relevant literature right from the beginning of Indian archaeological studies was carefully scrutinized in its entirety before the present volume was compiled. The Bipoint in the Settlement of North America Wm

Jack Hranicky,2020. This 378 page archaeological publication covers the development, definition, classification and world wide deployment of the lithic bipoint and includes numerous photographs, drawings and maps. The bipoint is a legacy implement from the Old World that is found through time/space all over America. It was brought into the U.S. on both coasts: the Pacific Coast introduction was around 17,000 years ago and the Atlantic Coast was 23,000 years ago. The basic bipoint is defined and its manufacturing processes are presented along with bipoint properties, shape, form, resharpening and cultural associations. This publication illustrates numerous bipoints from the Atlantic and Pacific states and within the U.S. and presents some of their inferred chronologies which are the oldest in the New World. Several morphologies between American and Iberian bipoints are compared, namely the famous Virginia Cinnabar bipoint. It concludes that a Solutrean occupation did occur on the U.S. Atlantic coastal plain. The bipoint is the most misclassified artifact in American archaeology. The book is indexed and has
