The Romantic Ethic and the Spirit of Modern Consumerism Colin Campbell, 2005 The Romantic Ethic and the Spirit of Modern Consumerism was first published by Basil Blackwell of Oxford in 1987 A paperback edition appeared two years later while in the following five years it was reprinted four times However although the intervening years have seen the appearance of Italian Portuguese Slovenian and Chinese editions no copies have been available in English since 1998 This Alcuin Academic edition has therefore been published in order to fill this gap and more specifically to meet the needs of those academics and students who have contacted me over the past six or seven years in search of an English language version of the book Naturally I have considered writing a revised edition which indeed some critics as well as a few friends have suggested is long overdue Amazon com

Easternization of the West Colin Campbell, 2015-11-17 In this provocative and groundbreaking book Colin Campbell shows that the civilization of the West is undergoing a revolutionary process of change one in which features that have characterized the West for two thousand years are in the process of being marginalized to be replaced by those more often associated with the civilizations of the East Moving far beyond popular trends Campbell assembles a powerful range of evidence to show how Easternization has been building throughout the last century especially since the 1960s Campbell demonstrates how it was largely in the 1960s that new interpretations in theology political thought and science were widely adopted by a new generation of young culture carriers This highly original and wide ranging book advances a thesis that will be of interest to scholars in many disciplines in the humanities and social sciences

Supraconscience of Humanity Edward H. Strauch, 2010-05-25 Humankind evolved through three psychological stages subconsciousness conscience and supraconscience Ritual and myth cosmology and theism marked phases of psychic integration initiating our supraconscience evolution Four archetypes temperance the great chain of being Biblical interpretation and Divinity became the Cosmic consciousness of secular man Study of Scripture developed a communal supraconscience Mystics dedication showed us the deeper meaning of a life purpose Yet heretics taught man faith in the superior power of the free mind Heresy helped evolve humanity's secular supraconscience Indeed the exponential growth of psyche's powers and the continuous revelation of new secular knowledge seems the fulfillment of Revelation Finally the enlightened understood that when God created the earth he included evolution so that our kind would evolve a superior nature Hence religious and scientific secular and humanistic developments reveal themselves to be the primary powers accelerating human evolution Together they have nurtured humankind's ever evolving supraconscience *Heroism and the Supernatural in the African Epic* Mariam Konaté Deme, 2010-09-13 Western criticism has largely failed to acknowledge the distinctiveness of African literary aesthetics This book revises traditional literary canons in examining the social cultural and emotional specificity of African epics and highlighting distinguishing features such as the significance of the fantastic and its use in the epic dramatic structure

Predestination and Free Will Omer Atilla Ergi, 2025-07-01 The concepts of predestination and free will have been and continue to be two of the most difficult problems of classical and contemporary theology and philosophy The debate on the perplexing coexistence of predestination and free will has been the focal point of discourse among theologians and philosophers since antiquity The deliberations on determinism also played an important role in the formation of Islamic theology as the creedal statements of Islamic doctrines define belief in predestination as one of the essential articles of creed while asserting that human agents possess some form of will defined as *irada al juz' iyya* the minor will in the Arabic lexicon Evidently the creed of mainstream Islam necessitates that the two concepts are reconciled or at least a conceivable argument is provided to support the notion that predestination could indeed coexist with free will Arguments for

coexistence constructed on scriptural revelation and Prophetic tradition were proposed by various Muslim theologians from the formative period to contemporary times during which several theological schools emerged due to a number of significant differences in views This book is primarily based on an examination and analysis of the theological arguments proposed by mainstream Islamic theologians and Fethullah G len a contemporary Muslim scholar and his theoretical framework on the reconciliation of predestination and free will The methodology of this project includes comparative and detailed analysis of arguments put forward by formative classical and contemporary Islamic scholars and examination of arguments proposed by Western theologians and philosophers with an objective to establish the similarities and differences in the theoretical frameworks of scholars from different schools traditions and faiths The main argument of this book is based on the theological premises proposed by Fethullah G len and mainstream Sunni theologians that support the coexistence of predestination and free will

The Tragedy of Almightyness Sybe Schaap,2016-01-06 The Tragedy of Almightyness encircles the theme of human yearning for omnipotence as expressed in religion and various ideologies The central question revolves around the matter of what in pursuing such an extreme power of the will man seeks to achieve While exploring the question a thought provoking link is made between religion and atheism between the Biblical longing for God s promise and the Marxist appeal for man to realize that same promise Omnipotence must vouch for the fulfilling of the promise for justice and for man s dream of redemption However that is not where it ends The longing for salvation turns out to have a dangerous reverse side to it because it encourages a turning away from the actual world and the all pervading evil Omnipotence also facilitates the avenging of such evil History has shown what this kind of yearning can lead to The book demonstrates how modernity translates Biblical longings into ideologically justified revengefulness The description of this process leads to a plea for renewed ethical purpose in life It is a challenge that also extends to religion Hence the reason that it is necessary to depart from the idea of omnipotence
