The Cambridge Handbook of Linguistic Typology Alexandra Y. Aikhenvald, R. M. W. Dixon, 2017-03-30 Linguistic typology identifies both how languages vary and what they all have in common This Handbook provides a state of the art survey of the aims and methods of linguistic typology and the conclusions we can draw from them Part I covers phonological typology morphological typology sociolinguistic typology and the relationships between typology historical linguistics and grammaticalization It also addresses typological features of mixed languages creole languages sign languages and secret languages Part II features contributions on the typology of morphological processes noun categorization devices negation frustrative modality logophoricity switch reference and motion events Finally Part III focuses on typological profiles of the mainland South Asia area Australia Quechuan and Aymaran Eskimo Aleut Iroquoian the Kampa subgroup of Arawak Omotic Semitic Dravidian the Oceanic subgroup of Austronesian and the Awyu Ndumut family in West Papua Uniting the expertise of a stellar selection of scholars this Handbook highlights linguistic typology as a major discipline within the field of

linguistics *The World Atlas of Language Structures* Martin Haspelmath, 2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages. 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels, tone systems, gender, plurals, tense, word order and body part terminology. Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question. The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features. The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages. The Atlas will be especially valuable for linguistic typologists, grammatical theorists, historical and comparative linguists and for those studying a region such as Africa, Southeast Asia, North America, Australia and Europe. It will also interest anthropologists and geographers. More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics. No institution involved in language research can afford to be without it.

Hamito-Semitic Etymological Dictionary Vladimir E. Orel, Olga V. Stolbova, 2015-11-02 The Hamito-Semitic Etymological Dictionary, a project in the making since 1986, is the first dictionary to reflect the vocabulary of the extinct Proto Hamito-Semitic Proto Afro-Asiatic language. Reconstructed on the basis of Semitic, Ancient Egyptian, Berber, Chadic and Cushitic linguistic groups, the Dictionary plays an indispensable role in further research into the field of historical linguistics. It surpasses by far the only comparable work to date, M. Cohen's *Essai comparatif sur le vocabulaire et la phonétique du chamito sémitique* published in 1947, which contains much less material and is now outdated. The Dictionary comprises more than 2,500 lexical items and includes an introduction providing valuable information on the historical phonology of Hamito-Semitic as well as an index of meanings which supplies linguistics, archaeologists and scholars of ancient history with added insight into the culture of the ancient speakers of Proto Hamito-Semitic. An invaluable contribution to the field of Afro-Asiatic Studies, the Hamito-Semitic Etymological Dictionary will be used and discussed by scholars for years to come. *In Hot Pursuit of Language in Prehistory* John D. Bengtson, 2008-12-03 Compiled in honor and celebration of veteran anthropologist Harold C. Fleming, this book contains 23 articles by anthropologists in the general sense from the four main disciplines of prehistory: archaeology, biogenetics, paleoanthropology and genetic historical linguistics. Because of Professor Fleming's major focus on language, he founded the Association for the Study of Language in Prehistory and the journal *Mother Tongue*; the content of the book is heavily tilted toward the study of human language, its origins, historical development and taxonomy. Because of Fleming's extensive field experience in Africa, some of the articles deal with African topics. This volume is intended to exemplify the principle, in the words of Fleming himself, that each of the four disciplines is enriched when it combines with any one of the other four. The authors are representative of the cutting edge of their respective fields and this book is unusual.

in including contributions from a wide range of anthropological fields rather than concentrating in any one of them

Similative and Equative Constructions Yvonne Treis, Martine Vanhove, 2017-05-31 While comparative constructions have been extensively studied in the past decades the expression of equality and similarity has so far attracted little attention in the typological literature The fifteen contributions assembled in this volume study similative and equative constructions in typologically and genetically distant languages albeit with a focus on Africa and from a range of perspectives Purely synchronically oriented case studies are supplemented by contributions that also shed light on the diachronic development of similative and equative constructions in language contact situations Sources of similative morphemes and lexically expressed concepts of likeness are examined and little known multifunctionality patterns and grammaticalisation targets of similative morphemes such as purpose clause markers modality morphemes and markers of glottonyms are discussed Based on a sample of 119 languages worldwide a new typology of equative constructions is proposed The book should be of interest to typologists semanticists specialists of grammaticalization historical linguistics and syntax

Grammar from the Human Perspective Marja-Liisa Helasvuo, Lyle Campbell, 2006-10-19 The papers of this volume investigate how grammar codes the subjective viewpoint of human language users that is how grammar reflects human conceptualization Some of the articles deal with spatial relations and locations They discuss how basic attributes of human conceptualization are encoded in the grammatical expression of spatial relations Other articles concern embodiment in language showing how conceptualization is mediated by one's embodied experience of the world and ourselves Finally some of the articles discuss coding of person focusing on the subjectivity of conceptualization and how it is reflected in grammar The articles show that conceptualization reflects the speaker's construal of the situation and furthermore that it is intersubjective because it reflects the speaker's understanding of the relations between the speech act participants The papers deal with Finnish utilizing the rich resources of Finnish grammar to contribute to issues in contemporary linguistics and in particular to Cognitive Grammar

Etymological Dictionary of Egyptian, Volume 1 Gábor Takács, 2022-05-16 This is the introductory volume to the first dictionary on the etymological relations between ancient Egyptian and other Afro Asiatic languages Gábor Takács's new multi-volume Etymological Dictionary of Egyptian now to appear at regular intervals of about 12-18 months will be a hallmark in Egyptian and Afro Asiatic linguistics The amount of material offered the extensive treatment of scholarly discussions on each item and the insights into the connections of Egyptian with its related Afro Asiatic languages including many new lexical parallels will make it an indispensable tool for comparative and interpretative purposes and the unchallenged starting point for every linguist in the field Volume 1 the opening volume of the dictionary can rightly be called the key to the work it not only provides the users with a comprehensive analysis of the Afro Asiatic background of the Egyptian consonant system but also offers a critical appraisal of linguistic theories on Egyptian historical phonology the problems surrounding the origins of the Egyptian language and an extensive bibliography to the dictionary volumes to appear

Linguistic Change and

Reconstruction Methodology Philip Baldi, 1990 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing. **Time: Language, Cognition & Reality** Kasia M. Jaszczolt, Louis de Saussure, 2013-05-02 This book considers linguistic and mental representations of time. Prominent linguists and philosophers from all over the world examine and report on recent work on the representation of temporal reference, the interaction of the temporal information from tense, aspect, modality, temporal adverbials and context, and the representation of the temporal relations between events and states as well as between facts, propositions, sentences and utterances. They link this to current research on the cognitive processing of temporal reference, linguistic and philosophical semantics, psychology and anthropology. The book is divided into three parts: Time, Tense and Temporal Reference in Discourse; Time and Modality; and Cognition and Metaphysics of Time. It will interest scholars and advanced students of time and temporal reference in linguistics, philosophy, anthropology, psychology and cognitive science. **The Semitic Languages** Stefan Weninger, 2011-12-23 The handbook *The Semitic Languages* offers a comprehensive reference tool for Semitic Linguistics in its broad sense. It is not restricted to comparative Grammar, although it covers also comparative aspects including classification. By comprising a chapter on typology and sections with sociolinguistic focus and language contact, the conception of the book aims at a rather complete, unbiased description of the state of the art in Semitics. Articles on individual languages and dialects give basic facts as location, numbers of speakers, scripts, numbers of extant texts and their nature, attestation where appropriate, and salient features of the grammar and lexicon of the respective variety. The handbook is the most comprehensive treatment of the Semitic language family since many decades. **Studies in African Linguistic Typology** F. K. Erhard Voeltz, 2006-03-22 The twenty one papers that make up this volume reflect the broad perspective of African linguistic typology studies today. Where previous volumes would present language material from a very restricted area and perspective, the present contributions reflect the global interest and orientation of current African linguistic studies. The studies are nearly all implicational in nature. Based upon a detailed survey of a particular linguistic phenomenon in a given language or language area, conclusions are drawn about the general nature of this phenomenon in the languages of Africa and beyond. They represent as such a first step that may ultimately lead to a more thorough understanding of African

linguistic structures This approach is well justified Taking the other road attempting to pick out linguistic details from often fairly superficially documented languages runs the risk that the data and its implications for the structure investigated might be misunderstood Consequentially only very few studies of this nature giving the very broad perspective the overview of a particular structure type covering the whole African continent are represented here *Case in Africa* Christa König, 2008-06-12 This book provides a typological overview of the different manifestations of grammaticalized case systems in African languages In the course of thoroughly analyzing case in roughly 100 African languages Christa König reveals several features such as tone as a marker for case which are rare phenomena in other languages of the world
