On A Starry Night:

See You on a Starry Night Lisa Schroeder, 2018-06-26 From the author of *My Secret Guide to Paris Sealed with a Secret* and *Keys to the City* comes a new novel about the power and magic of friendship Juliet has just moved to a beachside town with her newly separated mother and her moody older sister When she meets their new neighbor Emma the girls form an instant bond Emma's big family takes Juliet in and the girls have fun together starting with the night they throw bottles with secret messages into the sea Then someone writes back to Juliet's message An email arrives inviting her to join the Starry Beach Club All she has to do is make someone else's wish come true So Juliet and Emma set off to help as many other people as they can It's fun But as Juliet spends more and more time away from home enjoying her new town and Emma's family more than her own mom and sister she starts feeling lost It's been easy to find others to help But maybe her star would shine a little brighter if she brought it closer to home

Make the World a Better Place Robert Kozma, 2023-04-05 This book is a must read for all with an interest in the future of design. Jim Spohrer PhD, Retired Industry executive, International Society of Service Innovation Professionals. The world is in need of better design and Kozma's book shows us how to get there. Mark Guzdial, Director Program in Computing for the Arts and Sciences, College of Literature Science and the Arts, Professor of Electrical Engineering and Computer Science, College of Engineering, University of Michigan. Design services products experiences and places that transform the world for the better. Make the World a Better Place. Design with Passion, Purpose and Values presents an insightful and hands-on discussion of design as a profoundly human activity and challenges us all to use design to transform the world for the better. The book explains how and why the design industry lost its way and how to re-ignite the idealism that once made it a force for good. Make the World a Better Place describes a set of moral principles based on our shared humanity that can be used to create good designs, designs that reduce harm, increase well-being, advance knowledge, promote equality, address injustice, and build supportive, compassionate relationships and communities. Dr. Kozma applies philosophy, psychology, sociology, and history to the world of design, including Examples and case studies of designs both good and bad. Seven principles of good design based on the impact designs have on people. An approach to design as a moral dialog among co-creators in which the seven principles can be applied to intentionally improve the world. Comprehensive explorations of a person resource activity model that explains how technology shapes designs. Detailed analyses of the strengths and pitfalls of five design traditions which include the scientific, technical, analytic, human-centered, aesthetic, and social movement traditions.

7th EAI International Conference on Robotic Sensor Networks Ömer Melih Gül, Paolo Fiorini, Seifedine Nimer Kadry, 2024-08-19 This book presents the proceedings of the 7th EAI International Conference on Robotics and Networks 2023. EAI ROSENET 2023. The conference explores the integration of networks, communications, and robotic technologies, which has become a topic of increasing interest for both researchers and developers from academic fields and industries worldwide. The authors posit that big networks will be the main approach to the next generation of robotic research, with the explosive number of communications and networks models and increasing computational power of computers significantly extending the number of potential applications for robotic technologies while also bringing new challenges to the communications and networking community. The conference provided a platform for researchers to share up-to-date scientific achievements in this field. The conference takes place at Bahcesehir University, Istanbul, Turkey on 15-16 December 2023.

Light Pollution Handbook

Kohei Narisada, Duco Schreuder, 2013-06-05 This book deals with light pollution and about the ways to reduce it Light pollution is one of the negative side effects of artificial outdoor lighting The term light pollution is an unhappy one but as no better alternative seems to exist it will be used throughout this book The function of all outdoor lighting is to enhance the visibility or the aesthetics in the nighttime environment The light should come where it is needed If not it is spilled causing economic and environmental losses as well as disturbance and discomfort The overall effects are termed light pollution a major form of light pollution is the glow extending over the night sky Sky glow is discussed in many astronomical textbooks and in many popular brochures The present book is primarily aimed at those responsible for outdoor lighting installations Thus an engineering approach has been chosen The level of the book is that of college or University level The book is organized in two parts The first seven chapters cover the areas of general interest and conclude with recommendations The second part deals with the scientific and engineering elaboration of the first part A number of examples are included that refer to specific outdoor lighting installations and projects that are directly related to the reduction of light pollution Finally some information is given about the authors

Celestial Sleuth Donald W. Olson, 2013-10-02 For a general audience interested in solving mysteries in art history and literature using the methods of science forensic astronomy is a thrilling new field of exploration Astronomical calculations are the basis of the studies which have the advantage of bringing to readers both evocative images and a better understanding of the skies Weather facts volcano studies topography tides historical letters and diaries famous paintings military records and the friendly assistance of experts in related fields add variety depth and interest to the work The chosen topics are selected for their wide public recognition and intrigue involving artists such as Vincent van Gogh Claude Monet Edvard Munch and Ansel Adams historical events such as the Battle of Marathon the death of Julius Caesar the American Revolution and World War II and literary authors such as Chaucer Shakespeare Joyce and Mary Shelley This book sets out to answer these mysteries indicated with the means and expertise of astronomy opening the door to a richer experience of human culture and its relationship with nature Each subject is carefully analyzed As an example using the study of sky paintings by Vincent van Gogh the analytical method would include computer calculations of historical skies above France in the 19th century finding and quoting the clues found in translations of original letters by Van Gogh making site visits to France to determine the precise locations when Van Gogh set up his easel and what celestial objects are depicted For each historical event influenced by astronomy there would be a different kind of mystery to be solved As an example How can the phase of the Moon and time of moonrise help to explain a turning point of the American Civil War the fatal wounding of Stonewall Jackson at Chancellorsville in 1863 For each literary reference to astronomy it was determined which celestial objects were being described and making an argument that the author is describing an actual event For example what was the date of the moonlit scene when Mary Shelley first had the idea for her novel *Frankenstein* These and more fun riddles will enchant and delight the fan of art and astronomy

Cosmological Aesthetics through the Kantian Sublime and Nietzschean Dionysian Erman Kaplama, 2013-12-12 Erman Kaplama explores the principle of transition *bergang* from metaphysics to physics developed by Kant in his unfinished magnum opus *Opus Postumum* Drawing on the Heraclitean *logos* and Kant's notions of sense intuition *Anschauung* and reflective judgment Kaplama interprets transition as an aesthetic principle He revises the idea of nature *physis* as the principle of motion referring to Heraclitus cosmology as well as Heidegger's and Nietzsche's lectures on the pre-Socratics Kaplama compares the Kantian sublime and Nietzschean Dionysian as aesthetic theories representing the transition from the sensible to supersensible and as cosmological theories that consider human nature *ethos* as an extension of nature In light of such Nietzschean notions as the eternal recurrence and will to power the Dionysian is shown to trigger the transition by which nature and art are redefined Finally *Cosmological Aesthetics* employs the principles of transition and motion to analyze Van Gogh's *Starry Night* in an excursus
