On Argentina And The Southern Cone:

The United States and the Southern Cone Arthur Preston Whitaker, 1976 **On Argentina and the Southern Cone** Alejandro Grimson, Gabriel Kessler, 2014-04-23 This book considers how globalization is impacting contemporary Argentina via regional trading blocs through migrations across its borders and through the emerging transnational border regions that it shares with other Latin American nations Overshadowing all of these trends is the current crisis brought on by both international financial institutions possessing an increasing say over how the country is run and internal elites trying to use Argentina's integration into the world financial system to their own advantage Argentina has long imagined itself as a European nation qualitatively different from its Latin American neighbors But recent events are forcing it to change its perception of itself As the size of Argentina's transnational community continues to swell and as the nation continues its financial and social implosion Argentinians are being forced to re-imagine the nation as being Latin American replete with the histories and problems of that part of the world *The Southern Cone : Argentina, Chile, Uruguay and Paraguay* Canadian International Development Agency, 1996 *The Legacy of Human Rights Violations in the Southern Cone* Luis Roniger, Mario Sznajder, 1999-07-15 The new democracies of the Southern Cone have publicly professed to reject and condemn the uses of the state power in various forms against citizens under military rule thus dissociating themselves from their predecessors And yet the experiences of military rule have become a grim legacy raising major issues and dilemmas to the forefront of the public agenda *The Legacy of Human Rights Violations in the Southern Cone* Argentina Chile and Uruguay analyses in a systematic and comparative way the struggles and debates the institutional paths and crises that took place in these societies following redemocratization in the 1980s and 1990s as they confronted the legacy of violations committed under previous authoritarian governments and as the democratic administrations tried to balance normative principles and political contingency The book also traces how these trends affected the development of politics of oblivion and memory and the restructuring of collective identity and solidarity following redemocratization Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines The series will concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series will primarily be Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia *The Memory of State Terrorism in the Southern Cone* Francesca Lessa, Vincent Druliolle, 2011-04-11 Through various lenses and theoretical approaches this book explores the contested experiences meanings realms goals and challenges associated with the construction preservation and transmission of the memories of state repression in Argentina Chile and Uruguay *The Impact of Globalization on Argentina and Chile* Geoffrey Jones, Andrea Lluch, 2015-09-25 During the first global economy of the late nineteenth century and early twentieth century Argentina became one of the richest countries on earth while Chile was an economic backwater During the contemporary era of globalization liberalization and

institutional reforms in Chile provided a context in which business grew while in Argentina institutional dysfunction made productive business hard to sustain This book explores the complex relationships between corporate behavior institutions and economic growth through the contrasting experiences of Argentina and Chile In nine chapters written by prominent business historians the work addresses the role of business in these two eras of globalization examining the impact of multinationals the formation of business groups and relations between business and governments It places the regional experience within the context of the worldwide history of globalization
