## **On Being Human And Pleasure And Pain Two Humanistic Works:**

**On Being Human and Pleasure and Pain** Marian G. Kinget, 1999-06-24 In this volume G Marian Kinget's classic work *On Being Human* can be read for the first time in light of a second previously unpublished work *Pleasure And Pain Taken* together these two works offer a new generation of readers a comprehensive picture of the insights principles and goals of humanistic psychology *On Being Human* Kinget's pioneering work which arose from the original humanistic revolution in psychology systematically describes the characteristics that make human beings different from all other forms of life In this work Kinget explores man in his full nature not solely as a biological organism modified by experience and culture She presents a person as a symbolic entity capable of pondering his existence and lending it meaning and direction Man is the only animal who knowingly exists in space and time manifesting transcendental and metaphysical concern throughout history and culture *On Being Human* presents the fundamentals of any valid approach to psychology as well as to other fields concerned with the individuality of the human being It describes the specific human capacities for reflective thought and declarative language and it discusses the unique ability of humans to devise culture and question origins *Pleasure and Pain* considers the interdependence of human pleasure and pain This idea which leads to unnecessary fears and unwarranted expectations goes unrecognized in a contemporary western society focused on the accumulation of pleasure without any awareness of the duality of the pleasure pain experience Kinget refutes the widespread fallacy that fun lies in the means when it actually lies in the subject and she discusses the human potential for autonomous management of the pleasure pain dimension of human existence

*The Master-Myth of Modern Society* Marian G. Kinget, 2000-01-10 *The Master Myth of Modern Society* extends the late Dr Kinget's life work as professor psychotherapist and author Defining myth as a perennial psycho social phenomenon that expresses an internal compulsion towards understanding the unknown Kinget one of the original humanistic psychologists argues that the rhetoric ideology and mystique surrounding modern science constitutes the master myth of our times She evaluates science as myth in terms of both its beneficial effects and its debilitating qualities Along these lines Kinget views the notion of objectivity as an essential element of this myth noting that the questions we ask and the answers we seek are constantly being reconstructed according to spiritual need With a bibliography of time honored authors this short work can serve as a springboard for further exploration of human beings traditional and modern mentality as expressed in myths society religion and psychological queries Relevant for understanding contemporary society this book will be of value to students of psychology sociology anthropology and integrated social sciences

**Bibliographic Index**, 2001 **Humanistic Perspectives in Happiness Research** Luísa Magalhães, Maria José Ferreira Lopes, Bruno Nobre, João Carlos Onofre Pinto, 2024-05-31 This volume provides innovative perspectives on the scholarly connection between the humanities and happiness and considers the narrative expressions of happiness and recent

investigations about happiness its metrics and objective insights about human wellbeing This volume relates intemporal humanistic values to views across social and behavioural sciences and thereby covers a broad interdisciplinary frame from philosophy psychology literary studies to the communication sciences The philosophers in this volume discuss the achievement of happiness through the cultivation of virtue as well as the logic of the gift as an experience of personal fulfilment and the fact that happiness is inextricably linked to hope Their chapters take on the approach of the permanent human struggle to generate global horizons of happiness and thus attain eternal bliss Scholars from other fields of the humanities and communication sciences consider the positive messages of environmental happiness in virtual platforms where the Homo digitalis finds happiness at the click of a button often under the endorsement of celebrities or under the visual fruition of playful objects They also present the intertextual memory of happiness as a condition for humanistic research Finally this volume considers the sphere of education as the best place in which to apply the results of sustainable happiness measurement and research and to realize this complementary humanistic perspective on happiness research

**The Lublin Lectures and Works on Max Scheler** Karol Wojtyła, 2023-04-28 The Catholic University of America Press is honored to publish the English Critical Edition of the Works of Karol Wojtyła a John Paul II Under the auspices of an international editorial board the English Critical Edition will comprise more than 20 volumes covering all of John Paul's writings and correspondence in the years before and during his papacy This collection is essential for several reasons For one thing gaining access to the saint's writings has posed a significant challenge Except for official papal addresses and documents preserved and disseminated by the Vatican St John Paul's works have been scattered and limited Many documents need a new translation Finally English language audiences have faced the challenge even in the case of published texts of dealing with several languages various translations and textual idiosyncrasies The second volume of the series presents Wojtyła's lectures at the Catholic University of Lublin and his works on Max Scheler This volume consists of three parts Karol Wojtyła's lectures at the Lublin University from 1954 to 1957 during three academic years Wojtyła's articles related to the ethical issues discussed in the Lublin lectures and his habilitation thesis on Max Scheler from 1953 with other essays related more closely to Scheler's thought As was the case with Volume 1 Volume 2 also relies on the original manuscripts and typescripts of Wojtyła's works These original texts were compared with the Polish published editions and the significant differences between them were marked in the scholarly apparatus Some of the essays in this volume were never published in English others were never published before Dignity in the Workplace Matthijs Bal, 2017-08-01 Introducing a theory of workplace dignity into the field of management studies this innovative new book presents an alternative paradigm based on principles of human dignity which is integrated into a theoretical approach to the topic The author addresses and analyses the causes and consequences of the dominant political economic paradigm within management studies Further it presents a theoretical alternative which can constitute a foundation for a new way of thinking

about organisations management and leadership Dignity in the Workplace offers scholars ideas for how research in the field of management studies may be enriched by a dignity paradigm and goes further to explore the role of a dignity paradigm in the function of HR managers and organisational leaders Thus the book aims to contribute to the need for alternative conceptualisations of how contemporary organisations can be managed     The Self-Overcoming of Nihilism Keiji Nishitani,1990-10-02 Translation of an important work by the contemporary Japanese philosopher Keiji Nishitani     **Revista portuguesa de filosofia** ,2001     *Humanistic Wellbeing* Joar Vittersø,2025-02-12 This open access book seeks to change the way we think about happiness and the good life It starts ambitiously by exploring how the biological question What is life can be integrated with the philosophical question What is good It ends with a radical idea for how scientific reasoning can include a value based theory of the good life Anchored in basic knowledge about human nature the new humanistic theory of wellbeing suggests that a life is good to the extent that it allows us to perform our humanness well The theory further defines a well performed humanness as the fulfilment of three universal human needs the need for stability the need for change and the need to and for care To reach this standpoint the author critically examines major concepts in the wellbeing literature such as values happiness life satisfaction affect hedonia eudaimonia and the good life Based on these reviews the author argues that a science of wellbeing cannot be strictly descriptive and value free A life should not be considered good only because it feels good or is thought of as good for the person living it A good life must also be committed to a universal morality Therefore the humanistic theory of wellbeing suggests that it is good to like one s life but even better to like it for the right reasons     **The Impact of Music on Human Development and Well-Being** Michele Biasutti,Graham F. Welch,Jennifer MacRitchie,Gary E. McPherson,Evangelos Himonides,2020-07-17 Music is one of the most universal ways of expression and communication in human life and is present in the everyday lives of people of all ages and from all cultures around the world Music represents an enjoyable activity in and of itself but its influence goes beyond simple amusement Listening to music singing playing composing and improvising individually and collectively are common activities for many people these activities not only allow the expression of personal inner states and feelings but also can bring many positive effects to those who engage in them There is an increasing wealth of literature concerning the wider benefits of musical activity and research in the sciences associated with music suggests that there are many dimensions of human life physical social psychological including cognitive and emotional which can be affected positively by music The impact that musical activity has on human life can be found in different processes including a transfer of learning from the musical to another cognitive domain Abilities that have been developed through music education and training may also be effectively applied in other cognitive tasks Engagement in successful music activity may also have a positive impact on social skills and social inclusion thus supporting the participation of the individual in collective and collaborative musical events The promotion of social participation through music can foster many kinds of inclusion including intercultural intergenerational and support

for those who are differently abled The aim of this Research Topic is to present a diverse range of original articles that investigate and discuss in different ways the crucial role that musical activity can play in human development and well being

serve as the cornerstone of palliative care education      *The Art and Science of Psychotherapy* Piero Ferrucci, 2025-05-23

This book identifies fifty crucial themes with which every therapist or counsellor of any school should be conversant. Its purpose is to offer students and professionals a strong theoretical outline and practical directions for renewing their work. The author writes in the perspective of Psychosynthesis, an open approach created by the Italian psychiatrist Roberto Assagioli. In this orientation, all living is relationship and the rapport between therapist and client is central. Body states, breathing posture, and the voice reveal the client's emotional state. Metaphors and imagery are the language of the unconscious. Traumas are tackled with a view to recovery and renewal. Meditation, writing, and visualisation help clients explore the inner world and give shape to their existence. Will and the sense of agency are essential to wellbeing. Expansion of consciousness and peak experiences are pointers to healing and freedom. Even in the roughest times, it is possible to find one's own centre.

How Do Emotions and Feelings Regulate Physical Activity? Darko Jekauc, Ralf Brand, 2017-09-12

Up to date, the scientific discussion about how frequency and regularity of physical activity can be increased is dominated by social cognitive models. However, increasing evidence suggests that emotions and feelings have greater influence on physical activity than originally assumed. Rhodes, Fiala, Conner, 2009. Generally speaking, humans possess an evaluative system with a basic action tendency to approach pleasurable events and to avoid aversive ones. Cacioppo, Berntson, 1999. Evaluative responses to a behavior and associated emotional states may influence a decision regarding whether or not to repeat being physically active. Generally, behavior associated with positive evaluations has a higher probability of being repeated than behaviors without such an association. On the contrary, an association with negative evaluations tends to decrease the probability of repeating to be physically active. Hence, evaluative responses to physical activity or the related situation can be an important aspect in the process of physical activity maintenance. McAuley et al, 2007. Several social cognitive models of behavior change and maintenance were recently extended to take the influence of affective responses into account in a way that variables already included in the models, e.g., outcome expectancies or attitudes, were more clearly articulated into their cognitive and affective components. For example, with regard to Social Cognitive Theory, Gellert, Ziegelmann, and Schwarzer, 2012, proposed to distinguish between affective and health-related outcome expectancies and in the Theory of Planned Behavior, researchers suggested to differentiate between cognitive and affective attitudes. Lawton, Conner, McEachan, 2009. The results of these and other studies suggest that affective components make a unique contribution to the explanation of the physical activity behavior. Brand, 2006. Other examples come from social cognition research where it was shown that automatic evaluative responses are part of our everyday life and that they decisively influence health behavior. Hofmann, Friese, Wiers, 2008. Accordingly, there is evidence that people who exercise regularly hold more positive automatic evaluations with exercise than non-exercisers. Bluemke, Brand, Schweizer, Kahlert, 2010. Although significant progress has been made in showing that evaluative responses to physical activity and associated emotional states are important predictors of physical

activity underlying psychological processes are far from being fully understood Some important issues still remain to be resolved Which role play affective states compared to concrete emotions when influencing physical activity How do affective states and emotions interact with cognitive variables such as intentions Are evaluative processes before during or after physical activity important to predict future physical activity Do negative and positive evaluations interact antagonistically or rather synergistically when physical activity as a new behavior shall be adopted Future research will help us to resolve these and a lot of other so far unresolved issues      **Dexter and Philosophy** Richard Greene, George A. Reisch, Rachel Robison-Greene, 2011 In Dexter and Philosophy an elite team of philosophers don their rubber gloves and put Dexters deeds under the microscope
