Ceci, 2009-07-01 Ceci argues that traditional

conceptions of intelligence ignore the role of society in shaping intelligence and underestimate the intelligence of non Western societies He puts forth a bio ecological framework of individual differences in intellectual development that is intended to address some of the major deficiencies of extant theories of intelligence The focus is on alternative interpretations of phenomena that emerge when implicit assumptions of intelligence researchers are challenged *Social Representations of Intelligence* Gabriel Mugny, Felice Carugati, 1989-11-24 This book is a digital reprint of Gabriel Mugny s *Social Representations of Intelligence* Language, Intelligence, and Thought Robin Barrow, 2015-06-03 In this text first published in 1993 Barrow decisively rejects the traditional assumption that intelligence has no educational significance and contends instead that intelligence is developed by the enlargement of understanding Arguing that much educational research is driven by a concept of intelligence that has no obvious educational relevance Dr Barrow suggests that this is partly due to a widespread lack of understanding about the nature and point of philosophical analysis and partly due to a failure to face up to the value judgements that are necessarily involved in analysing a concept such as intelligence If intelligence is to be of educational significance it must be understood in terms that allow it to be educable Written by a philosopher of education this study offers a reasoned and extended argument in favour of an original view of philosophical analysis It focuses on the issue of intelligence from a philosophical perspective It should be of interest to students of education philosophy and the philosophy of education alike Women, Culture, and Development Martha C. Christianity and Extraterrestrials? Marie I. George, 2005-06-22 Does ETI existence spell the death of Christianity The increasingly popular answer is yes Marie George argues to the contrary that Christian belief is compatible with ETI existence by examining Roman Catholic teaching and Scripture She then makes a case that while Christian belief does not exclude ETI existence it does render it improbable George goes on to expose the faulty reasoning behind the common opinion that science indicates that the universe surely contains other intelligent life forms She closes with speculations on what the Catholic Church might eventually say about ETIs Central to her analysis is the cosmic role of Christ I appreciate arguments like those in Christianity and Extraterrestrials laid out carefully and investigated thoroughly If more writers proceeded with Dr George s care and courtesy there would be new hope for peace in the world John L Barger Ph D Publisher Sophia Institute Press Although some of Dr George s claims are controversial she is clearly an author seeking the truth and open to opposing arguments Moreover

she has sought out the best sources and used them wisely in short an admirable scholarly presentation Michael J Crowe

Internalizing Strengths: An Overlooked Way of Overcoming Weaknesses in Managers Robert Kaplan,1999-06-01
Because executives tend to be problem solvers they typically focus on weaknesses when they want to improve their performance This approach can be helpful but there is another that can be just as effective recognizing strengths A senior manager whom the author interviewed said this about a top person If he saw his own strengths and internalized them a lot of his weaknesses would go away In this report the author explains why it is critical to recognize strengths in order to improve performance and why it is often difficult to get that notion across to executives For practicing managers and those who develop them this report offers sound but often neglected developmental principles for overcoming weaknesses **The Complete Recruitment and Selection Toolkit** Glen Fox,Dean Taylor,2000 The hands on approach of this resource will ensure that your recruitment and assessment policies are strategically focused effective fair and based on best practice It covers the whole process deciding whether and why you need to recruit analysing what you need and who you want drawing up realistic selection criteria best ways of assessing candidates including interviewing and psychometric testing choosing candidates and evaluating the procedure and troubleshooting if necessary *The German Perfect* R.
