Philosophical Manuscripts David Lewis, 2023-09-28 David Lewis 1941–2001 was a celebrated and influential figure in analytic philosophy When Lewis died he left behind a large body of unpublished notes manuscripts and letters This volume contains two longer manuscripts which Lewis had originally intended to turn into books and thirty one shorter items The longer manuscripts are *The Paradoxes of Time Travel* his David Gavin Young Lectures at the University of Adelaide and *Confirmation Theory* which is based on a graduate course on probability and logic that he gave at UCLA Lewis's described his purposes in *The Paradoxes of Time Travel* as being 1 to solve a philosophical problem hitherto largely ignored or casually mis solved by philosophers 2 to introduce the layman to various topics in metaphysics since our problem turns out to connect with many more familiar ones and 3 to show of several of my favorite doctrines and methods in metaphysics By contrast *Confirmation Theory* is a technical work in which Lewis aimed to present in a unified fashion what he considered to be the best from competing theories of confirmation Lewis described the work as Mathematically self contained with proofs for the major theorems but the mathematics is kept down to hairy high school algebra The thirty one shorter items cover such topics as causation freedom of the will probability counterparts reference logic value and divine evil They are included here both for their intrinsic philosophical interest and their historical value This volume also contains an intellectual biography of the young David Lewis by the editors

Carnap's Construction of the World Alan W. Richardson, 1998 The first detailed and comprehensive study of Rudolf Carnap an influential figure in twentieth century philosophy **The Young Carnap's Unknown Master** Guillermo E. Rosado Haddock, 2016-02-17 Examining the scholarly interest of the last two decades in the origins of logical empiricism and especially the roots of Rudolf Carnap's *Der logische Aufbau der Welt* The Logical Structure of the World Rosado Haddock challenges the received view according to which that book should be inserted in the empiricist tradition In *The Young Carnap's Unknown Master* Rosado Haddock builds on the interpretations of *Aufbau* propounded by Verena Mayer and of Carnap's earlier thesis *Der Raum* propounded by Sahotra Sarkar and offers instead the most detailed and complete argument on behalf of an Husserlian interpretation of both of these early works of Carnap as well as offering a refutation of the rival Machian Kantian Neo Kantian and other more eclectic interpretations of the influences on the work of the young Carnap The book concludes with an assessment of Quine's critique of Carnap's analytic-synthetic distinction and a criticism of the direction that analytic philosophy has taken in following in the footsteps of Quine's views **Integrated History and**

Philosophy of Science Friedrich Stadler, 2017-06-07 This book features papers on the history and philosophy of science It also includes related reviews of recent research literature on Rudolf Carnap Eino Kaila Ernst Mach and Otto Neurath The central idea behind this volume is that this distinctive field is both historical and philosophical at the same time Good history and philosophy of science is not just history of science into which some philosophy of science may enter On the other hand it is neither philosophy of science into which some history of science may enter The founding insight of this modern research discipline is that history and philosophy have a special affinity and one can effectively advance both simultaneously The selection of contributions collected in this volume are good examples and best practices for these claims In addition it includes illuminating case studies It will appeal to scholars in the history of and philosophy of science especially history and philosophy of physics and biology as well as economics extended evolution and the history of knowledge Friedrich

Waismann - Causality and Logical Positivism B.F. McGuinness, 2011-06-02 Friedrich Waismann 1896-1959 was one of the most gifted students and collaborators of Moritz Schlick Accepted as a discussion partner by Wittgenstein from 1927 on he functioned as spokesman for the latter's ideas in the Schlick Circle until Wittgenstein's contact with this most faithful interpreter was broken off in 1935 and not renewed when exile took Waismann to Cambridge Nonetheless at Oxford where he went in 1939 and eventually became Reader in Philosophy of Mathematics changing later to Philosophy of Science Waismann made important and independent contributions to analytic philosophy and philosophy of science for example in relation to probability causality and linguistic analysis The full extent of these only became evident later when the larger

unpublished part of his writings could be studied His first posthumous work *The Principles of Linguistic Philosophy* 1965 2nd edn 1997 German 1976 and his earlier *Einführung in das mathematische Denken* 1936 have recently proved of fresh interest to the scientific community This late flowering and new understanding of Waismann's position is connected with the fact that he somewhat unfairly fell under the shadow of Wittgenstein his mentor and predecessor Central to this book about a life and work familiar to few is unpublished and unknown works on causality and probability These are commented on in this volume which will also include a publication of new or previously scattered material and an overview of Waismann's life

The Book of Evidence Peter Achinstein, 2001-09-20 What is required for something to be evidence for a hypothesis In this fascinating elegantly written work distinguished philosopher of science Peter Achinstein explores this question rejecting typical philosophical and statistical theories of evidence He claims these theories are much too weak to give scientists what they want a good reason to believe and in some cases they furnish concepts that mistakenly make all evidential claims a priori Achinstein introduces four concepts of evidence defines three of them by reference to potential evidence and characterizes the latter using a novel epistemic interpretation of probability The resulting theory is then applied to philosophical and historical issues Solutions are provided to the grue ravens lottery and old evidence paradoxes and to a series of questions These include whether explanations or predictions furnish more evidential weight whether individual hypotheses or entire theoretical systems can receive evidential support what counts as a scientific discovery and what sort of evidence is required for it The historical questions include whether Jean Perrin had non circular evidence for the existence of molecules what type of evidence J J Thomson offered for the existence of the electron and whether as is usually supposed he really discovered the electron Achinstein proposes answers in terms of the concepts of evidence introduced As the premier book in the fabulous new series *Oxford Studies in Philosophy of Science* this volume is essential for philosophers of science and historians of science as well as for statisticians scientists with philosophical interests and anyone curious about scientific reasoning

Alfred Tarski and the Vienna Circle Jan Wolenski, Eckehart Köhler, 2013-03-09 The larger part of Yearbook 6 of the Institute Vienna Circle constitutes the proceedings of a symposium on Alfred Tarski and his influence on and interchanges with the Vienna Circle especially those on and with Rudolf Carnap and Kurt G del It is the first time that this topic has been treated on such a scale and in such depth Attention is mainly paid to the origins development and subsequent role of Tarski s definition of truth Some contributions are primarily historical others analyze logical aspects of the concept of truth Contributors include Anita and Saul Feferman Jan Wolenski Jan Tarski and Hans Sluga Several Polish logicians contributed Gzegorczyk W jicki Murawski and Rojszczak The volume presents entirely new biographical material on Tarski both from his Polish period and on his influential career in the United States at Harvard in Princeton at Hunter and at the University of California at Berkeley The high point of the analysis involves Tarski s influence on Carnap s evolution from a narrow syntactical view of language to the ontologically more sophisticated but more controversial semantical view Another highlight involves the interchange between Tarski and G del on the connection between truth and proof and on the nature of metalanguages The concluding part of Yearbook 6 includes documentation book reviews and a summary of current activities of the Institute Vienna Circle Jan Tarski introduces letters written by his father to G del Paolo Parrini reports on the Vienna Circle s influence in Italy several reviews cover recent books on logical empiricism on G del on cosmology on holistic approaches in Germany and on

Cambridge and Vienna Maria C. Galavotti, 2006-07-10 The Institute Vienna Circle held a conference in Vienna in 2003 Cambridge and Vienna Frank P Ramsey and the Vienna Circle to commemorate the philosophical and scientific work of Frank Plumpton Ramsey 1903 1930 This Ramsey conference provided not only historical and biographical perspectives on one of the most gifted thinkers of the Twentieth Century but also new impulses for further research on at least some of the topics pioneered by Ramsey whose interest and potential are greater than ever Ramsey did pioneering work in several fields practitioners of which rarely know of his important work in other fields philosophy of logic and theory of language foundations of mathematics mathematics probability theory methodology of science philosophy of psychology and economics There was a focus on the one topic which was of strongest mutual concern to Ramsey and the Vienna Circle namely the question of foundations of mathematics in particular the status of logicism Although the major scientific connection linking Ramsey with Austria is his work on logic to which the Vienna Circle dedicated several meetings certainly the connection which is of greater general interest concerns Ramsey's visits and discussions with Wittgenstein Ramsey was the only important thinker to actually visit Wittgenstein during his school teaching career in Puchberg and Ottertal in the 1920s in Lower Austria and later Ramsey was instrumental in getting Wittgenstein positions at Cambridge

The Vienna Circle and Religion Esther Ramharter, 2022-03-08 This book is the first systematic and historical account of the Vienna Circle that deals with the relation of logical empiricists with religion as well as theology Given the standard image of the Vienna Circle as a strong anti metaphysical group and non religious philosophical and intellectual movement this book draws a surprising conclusion namely that several members of the famous Moritz Schlick Circle e g the left wing with Rudolf Carnap Otto Neurath Philipp Frank Edgar Zilsel but also Schlick himself dealt with the dualisms of faith belief and knowledge religion and science despite or because of their non cognitivist commitment to the values of Enlightenment One remarkable exception was the philosopher and Rabbi Joseph Schachter who wrote explicitly on religion and philosophy after the linguistic turn The book also covers another puzzling figure the famous logician Kurt Godel who wrote on theology and the ontological proof of God in his so far unpublished notebooks The book opens up new perspectives on the Vienna Circle with its internal

philosophical and political pluralism and is of value to philosophers historians and anybody who is interested in the relation between science and religion

Theories of Intensionality David Parsons, 2016-09-16 This book offers a comprehensive primer for the study of intensionality It explores and assesses those key theories of intensionality which have been developed in the twentieth and early twenty first centuries Each of the examined theories is tested as to whether it can account for the problems associated with A the intersubstitution salva veritate of co extensional expressions and B existential generalisation All of these theories are subsequently compared so as to determine which of them comes closest to successfully solving these problems The book examines four kinds of intensionalist approaches the Fregean approach including Church's formalisation of Frege's theory the possible worlds approaches of Carnap Montague and Cresswell the theory of properties relations and propositions devised by Bealer and the Meinongian approaches put forward by Zalta and Priest The book also proposes an alternative to intensionalism sententialism Sententialists argue that the problems of intensionality could be solved by appealing to linguistic items usually sentences rather than intensional entities Drawing on the works of Quine Davidson Scheffler and R M Martin it explores the viability and value of sententialism as an alternative to intensionalism
