Student presents a holistic approach to multicultural educational issues by viewing them in terms of the student as a physical psychosocial cognitive ethical and spiritual being Conversely these levels of a student s being cannot be seen apart from the student s cultural identities This unique book demonstrates that in a pluralistic democracy good teaching and deep learning must be multicultural and must look at the student as a whole being not just as a future worker in a transnational corporate economy as is currently the case with both neo liberal and neo conservative programs for reform The authors contend that good education is and must be multicultural in order to gain a deeper perspective on issues under analysis in the classroom through the sharing and negotiating of many different cultural perspectives
