Building Walls, Constructing Identities Marie-Eve Loiselle,2024-11-19 States are erecting walls at their borders at a pace unmatched in history and the wall between the United States and Mexico stands as an icon among these dividing structures Much has been said about the US Mexico border wall in the last few decades yet American walling projects have a much longer history dating back almost a century Building Walls Constructing Identities offers a rich account of this legal history informed by two episodes of wall building the Act of August 19 1935 and the Secure Fence Act of 2006 These two legislative periods illustrate that today's wall imprints onto the landscape a grammar of racial inequality underpinned by a settler colonial rationality Marie Eve Loiselle argues in favor of an account of the law that considers its material translation into space and identifies discursive processes by which the law and the wall come together to communicate legal knowledge about territory and identity *Comparative Hungarian Cultural Studies* Steven Tötösy de Zepetnek,Louise O. The Symptom and the Subject Brooke Holmes,2010-04-19 *The Symptom and the Subject* takes an in depth look at how the physical body first emerged in the West as both an object of knowledge and a mysterious part of the self Beginning with Homer moving through classical era medical treatises and closing with studies of early ethical philosophy and Euripidean tragedy this book rewrites the traditional story of the rise of body soul dualism in ancient Greece Brooke Holmes demonstrates that as the body s ma became a subject of physical inquiry it decisively changed ancient Greek ideas about the meaning of suffering the soul and human nature By undertaking a new examination of biological and medical evidence from the sixth through fourth centuries BCE Holmes argues that it was in large part through changing interpretations of symptoms that people began to perceive the physical body with the senses and the mind Once attributed primarily to social agents like gods and daemons symptoms began to be explained by physicians in terms of the physical substances hidden inside the person Imagining a daemonic space inside the person but largely below the threshold of feeling these physicians helped to radically transform what it meant for human beings to be vulnerable and ushered in a new ethics centered on the responsibility of taking care of the self *The Symptom and the Subject* highlights with fresh importance how classical Greek discoveries made possible new and deeply influential ways of thinking about the human subject

Embodiment Justin E.H. Smith,2017-06-02 *Embodiment* defined as having being in or being associated with a body is a feature of the existence of many entities perhaps even of all entities Why entities should find themselves in this condition is the central concern of the present volume The problem includes but also goes beyond the philosophical problem of body that is what the essence of a body is and how if at all it differs from matter On some understandings there may exist bodies such as stones or asteroids that are not the bodies of any particular subjects To speak of embodiment by contrast is always to speak of a subject that variously inhabits or captains or

is coextensive with or even is imprisoned within a body The subject may in the end be identical to or an emergent product of the body That is a materialist account of embodied subjects may be the correct one But insofar as there is a philosophical problem of embodiment the identity of the embodied subject with the body stands in need of an argument and cannot simply be assumed The reasons nature and consequences of the embodiment of subjects as conceived in the long history of philosophy in Europe as well as in the broader Mediterranean region and in South and East Asia with forays into religion art medicine and other domains of culture form the focus of these essays More precisely the contributors to this volume shine light on a number of questions that have driven reflection on embodiment throughout the history of philosophy What is the historical and conceptual relationship between the idea of embodiment and the idea of subjecthood Am I who I am principally in virtue of the fact that I have the body I have Relatedly what is the relationship of embodiment to being and to individuality Is embodiment a necessary condition of being Of being an individual What are the theological dimensions of embodiment To what extent has the concept of embodiment been deployed in the history of philosophy to contrast the created world with the state of existence enjoyed by God What are the normative dimensions of theories of embodiment To what extent is the problem of embodiment a distinctly western preoccupation Is it the result of a particular local and contingent history or does it impose itself as a universal problem wherever and whenever human beings begin to reflect on the conditions of their existence Ultimately to what extent can natural science help us to resolve philosophical questions about embodiment many of which are vastly older than the particular scientific research programs we now believe to hold the greatest promise for revealing to us the bodily basis or the ultimate physical causes of who we really are *Temporary Marriage in Iran* Claudia Yaghoobi, 2020-01-30 An examination of temporary marriage or sigheh in Iran through the representation of women within modern novels short stories and cinema
