## **On Human Conduct:**

**On Human Conduct** Michael Oakeshott, 1975 *On Human Conduct* is composed of three connected essays. Each has its own concern: the first with theoretical understanding and with human conduct in general; the second with an ideal mode of human relationship which the author has called civil association; and the third with that ambiguous historic association commonly called a modern European state. Running through the work is Professor Oakshott's belief in philosophical reflection as an adventure: the adventure of one who seeks to understand in other terms what he already understands and where the understanding is sought is a disclosure of the conditions of the understanding enjoyed and not a substitute for it. Its most appropriate expression is an essay which he writes does not dissemble the conditionality of the conclusions it throws up and although it may enlighten it does not instruct.

**Population: Its Consequences, and Its Bearing upon Human Conduct and Morals** Annie Besant, 2020-12-08 Annie Besant's *The Law of Population: Its Consequences and Its Bearing upon Human Conduct and Morals* delves into the intricate interplay of population growth, ethical considerations, and societal structure in the late 19th century. Through a critical lens, Besant employs a blend of sociological inquiry and philosophical discourse to examine how demographic expansion affects moral frameworks and human behavior. The book artfully navigates the complexities of contemporary debates surrounding reproductive rights, social responsibility, and the future of civilization, grounding her analysis in both empirical data and critical theory that resonates with the evolutionary ideals of her time. An esteemed theosophist, social reformer, and activist, Annie Besant was profoundly influenced by the socio-economic challenges of her era. Her upbringing in Victorian England, alongside her active involvement in socialist movements and women's rights advocacy, provided her with a unique perspective on the pressing issues of population dynamics. Besant's intellectual and spiritual pursuits were rooted in a desire to harmonize ethical conduct with societal progress, which is clearly reflected in this work. For readers seeking an insightful exploration of how population issues intersect with ethics and morality, Besant's work serves as both a historical document and a timeless reflection on human values. Her rigorous analysis challenges us to consider our own societal choices and the potential consequences for future generations.

**Human Conduct** John Hospers, 1963      *Perspectives on Human Conducts* Nātān Rōtenštraik, 1988      *The Sociogenesis of Language and Human Conduct* Bruce Bain, 2013-11-11 Michael Cole To the unwary reader, even the table of contents of this book will appear incongruous. What notion, let alone set of principles, could bring coherence to the following concepts: playing peekaboo with small children; aging; human alienation; conversations with Uzbeki peasants; toolmaking; sexism; the world of the deaf; the ecology of hunting groups. After she has had a chance to scan the entire set, the reader can see that this book seems to center on language. But it clearly is not a book about linguistics. It is about a notion that combines two other notions that we usually find located in very different kinds of books.

language and human nature There is no widely accepted term for this combined notion It does not fit into those ways of thinking of the world that have gotten us where we are Walker Percy philosopher novelist succinctly nails the source of our problem The importance of a study of language as opposed to a scientific study of a space time event like a solar eclipse or rat behavior is that as soon as one scratches the surface of the familiar and comes face to face with the nature of language one also finds himself face to face with the nature of man 1975 p 10 Once we reinvent this insight its implications begin to work into our lives our central problem becomes to figure out how to deal with the dilemmas it implies

**The Poetic Character of Human Activity** Wendell John Coats Jr., Chor-yung Cheung, 2012-07-21 The Poetic Character of Human Activity is a collection of essays by two Oakeshott scholars most of which explores the meaning of Oakeshott's pregnant phrase the poetic character of human activity by comparing and contrasting this idea with similar and opposing ones in particular those of the Taoist thinker Zhuangzi Chuang Tzu and his Western interpreter A C Graham Oakeshott's deep appreciation of the poetic and non instrumental character of human activity led him to develop an interest in the works of Zhuangzi and Confucius Comparison of shared themes between Oakeshott and these two Chinese thinkers facilitates appreciation of his elegant analytic style and his resort to use of metaphors and story telling when conveying some of his most profound insights The collection also contains essays contrasting Oakeshott's idea of the creative in human experience with views of among others Plato Leo Strauss and Eric Voegelin Oakeshott used the phrase the poetic character of human activity arguably the animating center of his entire thought to refer to the creative character of human experiential reality that is to the fact that the form the how and content the what of all human experience and activity arise simultaneously and fluidly and can be separated only at the expense of theoretical coherence and practical skill The various essays in this collection explore the meaning of this claim and its ramifications for the proper role of critical intellect in especially philosophy morality learning and governance There is also some brief contrast of Oakeshott with John Rawls Alasdair MacIntyre Charles Taylor and Quentin Skinner

*George Herbert Mead and Human Conduct* Herbert Blumer, 2004 In this posthumous volume renowned sociologist Herbert Blumer analyzes George Herbert Mead's position in the study of human conduct Engaged with Mead's work for over half a century Blumer explored Mead's ideas for developing the theoretical and methodological position of symbolic interactionism a term that Blumer would later introduce Although Blumer focused on the sociological and social psychological implications of Mead's pragmatism his objective was to explore social processes embodied in and formed through social action Envisioning individual and collective social action as ongoing accomplishments achieved through symbolic interaction Blumer insisted on grounding scholarly knowledge about the human condition in the empirical world of people's experiences Organized and introduced by Thomas J Morrione a colleague and friend to whom Blumer entrusted his unpublished papers the volume also includes Blumer's correspondence with David L Miller about Mead's theories and other related correspondence For a greater understanding of both Mead's philosophies and Blumer's

**Human Psychology** Prof. Dr. Bilal Semih Bozdemir, The Limits of Liberalism Mark T. Mitchell, 2018-11-30 In The Limits of Liberalism Mark T Mitchell argues that a rejection of tradition is both philosophically incoherent and politically harmful The Limits of Liberalism identifies why most modern thinkers have denied the essential role of tradition and explains how tradition can be restored to its proper place Mitchell demonstrates that the rejection of tradition as an epistemic necessity has produced a false conception of the human person the liberal self which in turn has produced a false conception of freedom Together these false conceptions have facilitated both liberal cosmopolitanism and identity politics Mitchell uses the philosophies of Michael Oakeshott Alasdair MacIntyre and Michael Polanyi to construct a compelling argument for a reconstructed view of tradition and as a result a reconstructed view of freedom The Limits of Liberalism reveals that only by finding an alternative to the liberal self can we escape the incoherencies and pathologies inherent therein **The**
