On Land and Sea Lee A. Newsom, Elizabeth S. Wing, 2004-05-03 During the vast stretches of early geologic time the islands of the Caribbean archipelago separated from continental land masses rose and sank many times merged with and broke from other land masses and then by the mid Cenozoic period settled into the current pattern known today By the time Native Americans arrived the islands had developed complex stable ecosystems The actions these first colonists took on the landscape timber clearing cultivation animal hunting and domestication fishing and exploitation of reef species affected fragile land and sea biotic communities in both beneficial and harmful ways *On Land and Sea* examines the condition of biosystems on Caribbean islands at the time of colonization human interactions with those systems through time and the current state of biological resources in the West Indies Drawing on a massive data set collected from long term archaeological research the study reconstructs past lifeways on these small tropical islands The work presents a wide range of information including types of fuel and construction timber used by inhabitants cooking techniques for various shellfish availability and use of medicinal and ritual plants the effects on native plants and animals of cultivation and domestication and diet and nutrition of native populations The islands of the Caribbean basin continue to be actively excavated and studied in the quest to understand the earliest human inhabitants of the New World This comprehensive work will ground current and future studies and will be valuable to archaeologists anthropologists botanists ecologists Caribbeanists Latin American historians and anyone studying similar island environments

*An Archaeological History of Montserrat in the West Indies* John F. Cherry, Krysta Ryzewski, 2020-02-28 Montserrat is a small island in the Leeward islands of the eastern Caribbean and at present a British Overseas Territory It has suffered greatly in recent times first from the devastations of Hurricane Hugo in 1989 and since 1995 from the still ongoing eruption of the Soufriere Hills volcano that has caused two thirds of the island's population to emigrate and left half the island a dangerous exclusion zone Archaeological research here began only in the late 1970s but work over the past four decades has now made it possible to present an archaeological history of Montserrat from the earliest known traces of human activity on the island about 5 000 years ago to the present This book draws on all the available archaeological evidence including that from the co authors own island wide survey and excavation project since 2010 as well as newly available archival documents to trace this little island's long history and heritage This is not the story of an isolated and remote island Montserrat is shown rather to be a place intricately connected to the flows of people and goods that have travelled between islands and across the Atlantic at various points in time both Amerindian and historical Despite its small size and seeming irrelevance Montserrat has in fact always been networked into regional and global systems of connectivity An underlying theme of this volume is resilience It presents insights from the archaeological and documentary evidence on how the island's inhabitants have coped with often adverse conditions throughout the course of its history hurricanes volcanic eruptions slavery disease invasions and impoverishment all while remaining proudly connected to

heritage that celebrates the accomplishments of island residents      *Zooarchaeology in Practice* Christina M. Giovas, Michelle J. LeFebvre, 2017-11-24 *Zooarchaeology in Practice* unites depth of treatment with broad topical coverage to advance methodological discussion and development in archaeofaunal analysis Through case studies historical accounts and technical reviews authored by leading figures in the field the volume examines how zooarchaeological data and interpretation are shaped by its methods of practice and explores the impact of these effects at varying levels of investigation Contributing authors draw on geographically and taxonomically diverse datasets providing instructive approaches to problems in traditional and emerging areas of methodological concern Readers from specialists to students will gain an extensive sophisticated look at important disciplinary issues that are sure to provoke critical reflection on the nature and importance of sound methodology With implications for how archaeologists reconstruct human behavior and paleoecology and broader relevance to fields such as paleontology and conservation biology *Zooarchaeology in Practice* makes an enduring contribution to the methodological advancement of the discipline      *Jungle* Patrick Roberts, 2021-09-14 A bold ambitious and truly wonderful history of the world Peter Wohlleben author of *The Hidden Life of Trees* From the age of dinosaurs to the first human cities a groundbreaking new history of the planet that tropical forests made To many of us tropical forests are the domain of movies and novels These dense primordial wildernesses are beautiful to picture but irrelevant to our lives *Jungle* tells a different story Archaeologist Patrick Roberts argues that tropical forests have shaped nearly every aspect of life on earth They made the planet habitable enabled the rise of dinosaurs and mammals and spread flowering plants around the globe New evidence also shows that humans evolved in jungles developing agriculture and infrastructure unlike anything found elsewhere Humanity's fate is tied to the fate of tropical forests and by understanding how earlier societies managed these habitats we can learn to live more sustainably and equitably today Blending cutting edge research and incisive social commentary *Jungle* is a bold new vision of who we are and where we come from      *The Archaeology of Island Colonization* Matthew F. Napolitano, Jessica H. Stone, Robert J. DiNapoli, 2021-05-25 This volume details how new theories and methods have recently advanced the archaeological study of initial human colonization of islands around the world including in the southwest Pacific the Mediterranean the Caribbean and Southeast Asia This global perspective brings into comparison the wide variety of approaches used to study these early migrations and illuminates current debates in island archaeology Evidence of island colonization is often difficult to find especially in areas impacted by sea level rise and these essays demonstrate how researchers have tackled this and other issues Contributors show the potential of computer simulations of voyaging in determining the range of timing and origin points that were possible in the past They discuss how Bayesian modeling helps address uncertainties and controversies surrounding radiocarbon dating Additionally advances in biomolecular techniques such as ancient DNA aDNA paleoproteomics analysis of human microbiota and improved resolution in isotopic analyses are providing more refined information on the homelands of initial settlers on individual life courses and

on population level migrations Islands offer rich opportunities to examine the exploratory nature of the human species providing insights into the evolution of watercraft technologies and wayfinding the impact of humans on their new environments and the motivations for their journeys The Archaeology of Island Colonization represents the innovative ways today s archaeologists are reconstructing these unique paleolandscapes Contributors Nasullah Aziz David Ball Todd J Braje Richard Callaghan John F Cherry Ethan Cochrane Robert J DiNapoli Andrew Dugmore Jon M Erlandson Scott M Fitzpatrick Amy E Gusick Derek Hamilton Terry L Hunt Thomas P Leppard Carl P Lipo Jillian Maloney Matthew F Napolitano Anthony Newton Maria A Nieves Col n Rintaro Ono Adhi Agus Oktaviana Timothy Rieth Curtis Runnels Magdalena M E Schmid Alexander J Smith Harry Octavianus Sofian Sriwigati Jessica H Stone Orri V steinsson A volume in the series Society and Ecology in Island and Coastal Archaeology edited by Victor D Thompson

**The Archaeology of Caribbean and Circum-Caribbean Farmers (6000 BC - AD 1500)** Basil Reid,2018-05-16 Comprising 17 chapters and with a wide geographic reach stretching from the Florida Keys in the north to the Guianas in the south this volume places a well needed academic spotlight on what is generally considered an integral topic in Caribbean and circum Caribbean archaeology The book explores a variety of issues including the introduction and dispersal of early cultivars plant manipulation animal domestication dietary profiles and landscape modifications Tried and true and novel analytical techniques are used to tease out aspects of the Caribbean and circum Caribbean database that inform the complex and often subtle processes of domestication under varying socio environmental conditions Contributors discuss their findings within multiple constructs such as neolithisation social interaction trade mobility social complexity migration colonisation and historical ecology Multiple data sources are used which include but are not restricted to rock art cooking pits and pots stable isotopes dental calculus and pathologies starch grains and proxies for past environmental conditions Given its multi disciplinary approaches this volume should be of immense value to both researchers and students of Caribbean archaeology biogeography ethnobotany zooarchaeology historical ecology agriculture environmental studies history and other related fields

**The Oxford Handbook of Caribbean Archaeology** William F. Keegan,Corinne L. Hofman,Reniel Rodriguez Ramos,2013-02-07 The Oxford Handbook of Caribbean Archaeology provides an overview of archaeological investigations in the insular Caribbean understood here as the islands whose shores surround the Caribbean Sea and the islands of the Bahama Archipelago Though these islands were never isolated from the surrounding mainland their histories are sufficiently diverse to warrant their identification as distinct areas of culture Over the past 20 years Caribbean archaeology has been transformed from a focus on reconstructing culture histories to one on the mobility and exchange expressed in cultural and social dynamics This Handbook brings together for the first time examples of the best research conducted by scholars from across the globe to address the complexity of the Caribbean past The Handbook is divided into five sections Part I Islands of History and the Precolonial History of the Caribbean Islands provides an introduction to Caribbean Archaeology and its

history The papers in the following Ethnohistory section address the diversity of cultural practices expressed in the insular Caribbean and develop historical descriptions in concert with archaeological evidence in order to place language social organization and the native Ta nos and Island Caribs in perspective The following section Culture History provides the latest research on specific geographical locations and cross cultural engagements from Jamaica and the Bahama archipelago to the Saladoid and the Isthmo Antillean Engagements Creating History the fourth section includes papers on specific issues related to the field such as Zooarchaeology Rock Art and DNA analysis among others The final section World History centers on the consequences of European colonization

**Island Shores, Distant Pasts** Scott M. Fitzpatrick, Ann H. Ross, 2017-05-09 An excellent compilation of new methods and theories in Caribbean archaeology Not only materialize s the methodological advance in Caribbean archaeology but also signifies the strong theoretical progression that this discipline is experiencing Journal of Caribbean Archaeology Looks beyond the field of archaeology to include new techniques from genetics computer simulation and physical anthropology Unquestionably moves our understanding of the settling of the Caribbean forward and provides several new provocative avenues for further exploration New West Indian Guide Demonstrate s various methods that introduce new insights into the investigation of Caribbean prehistory revealing the complexity of pre Columbian cultures peoples and their movements and contributes to a totalizing view of the colonization process in the Caribbean Caribbean Quarterly Can be considered as a real starting point for a biological approach of the pre Columbian settlement of the Caribbean Benoit Berard Universite des Antilles For more than a century archaeologists and anthropologists have searched for evidence of when and how peoples first settled the Caribbean islands Research on this area is pivotal for understanding the migration of peoples in the New World and how small and large populations develop biologically and culturally through time This unique collection synthesizes our archaeological and biological knowledge about the pre Columbian settlement of the Caribbean and highlights the various techniques we can use to analyze human migration and settlement patterns throughout history Newer and well established techniques like computer simulations of seafaring radiocarbon dating three dimensional and traditional craniometrics stable isotopes and ancient and modern DNA analysis show great promise for helping us better understand pre Columbian Caribbean population expansions while demonstrating the utility of integrating and comparing biological markers with the archaeological record Surprisingly little attention has been paid to migrations population movements and island colonization in the Caribbean islands This volume fills that void Scott M Fitzpatrick is professor of archaeology at the University of Oregon and founding coeditor of the Journal of Island and Coastal Archaeology Ann H Ross is professor of biological sciences at North Carolina State University She is a contributor to Digging Deeper Current Trends and Future Directions in Forensic Anthropology and Archaeology A volume in the series Bioarchaeological Interpretations of the Human Past edited by Clark Spencer Larsen

A Concise History of the Caribbean B. W. Higman, 2021-05-27 A compelling account of Caribbean history from colonization to slavery and revolution through the tumult of hurricanes and climate change      Linguistics and Archaeology in the Americas Eithne B. Carlin, Simon van de Kerke, 2010 This book offers a state of the art overview of current linguistic and archaeological research from the Caribbean and Meso America through Amazonia and the Andes to Argentina ranging from historical comparative through descriptive and socio linguistics to new discoveries in archaeological research

*Ancient Borinquen* Peter E. Siegel, 2005-09-07 Publisher description      *Pre-Columbian Jamaica* Philip Allsworth-Jones, 2008-06-22 Pre Columbian Jamaica represents the first substantial attempt to summarize the prehistoric evidence from the island in a single published account since J E Duerden s invaluable 1897 article on the subject which is also reprinted within this volume      **Bioarchaeology in the Caribbean** Darlene Weston, Yadira Chinique de Armas, 2025-07-14 Bioarchaeology in the Caribbean assembles leading and emerging scholars in Caribbean bioarchaeology offering an overview of current research in genomic analyses deathways demography and health diet and population mobility and research ethics Chapters emphasize the importance of culture in human adaptation and behavior at both population and individual levels The first volume to focus solely on Caribbean bioarchaeology this book is a landmark in this rapidly advancing area of scholarship providing insight into current research methods and theoretical debates The Caribbean region has a long and diverse history and the chapters reflect this discussing Indigenous African and European colonial populations temporally spanning the Archaic period the Early and Late Ceramic periods the time of first European contact and the Colonial period Bioarchaeology in the Caribbean will appeal to undergraduates postgraduates and researchers in bioarchaeology and Caribbean bioarchaeology and archaeology in particular as well as local stakeholders in the Caribbean museum and archaeology professionals      *Food Culture in the Caribbean* Lynn M. Houston, 2005-06-30 Food in the Caribbean reflects both the best and worst of the Caribbean s history On the positive side Caribbean culture has been compared with a popular stew there called callaloo The stew analogy comes from the many different ethnic groups peacefully maintaining their traditions and customs while blending together creating a distinct new flavor On the negative side many foods and cooking techniques derive from a history of violent European conquest the importation of slaves from Africa and the indentured servitude of immigrants in the plantation system Within this context students and other readers will understand the diverse island societies and ethnicities through their food cultures Some highlights include the discussion of the Caribbean concept of making do using whatever is on hand or can be found the unique fruits and starches the one pot meal the technique of jerking meat and the preference for cooking outdoors The Caribbean is known as the cradle of the Americas The Columbian food exchange which brought products from the Caribbean and the Americas to the rest of the world transformed global food culture Caribbean food culture has wider resonance to North Central and South America as

well The parallels in the food related evolution in the Americas include the early indigenous foods and agriculture the import and export of foods the imported food culture of colonizers settlers and immigrants the intricacies of defining an independent national food culture the loss of the traditional agricultural system the trade issues sparked by globalization and the health crises prompted by the growing fast food industry This thorough overview of island food culture is an essential component in understanding the Caribbean past and present

**Formation Processes of Maritime Archaeological Landscapes** Alicia Caporaso, 2017-01-05 Research into the anthropogenic and taphonomic processes that affect the formation of maritime archaeological resources has grown significantly over the last decade in both theory and the analysis of specific sites and associated material culture The addition of interdisciplinary inquiry investigative techniques and analytical modeling from fields such as engineering oceanography and marine biology have increased our ability to trace the unique pathways through which archaeological sites progress from initial deposition to the present yet can also link individual sites into an integrated socio environmental maritime landscape This edited volume presents a global perspective of current research in maritime archaeological landscape formation processes In addition to classically considered submerged material culture and geography or those that can be accessed by traditional underwater methodology case studies include less often considered sites and landscapes These landscapes for example require archaeologists to use geophysical marine survey equipment to characterize extensive areas of the seafloor or go above the surface to access maritime archaeological resources that have received less scholarly attention
