On Our Way To The Water:

On Your Way to a Healthier You Fritz Dorce, 2013-08-14 I can do all things through Christ which strengthened me Philippians 4:13 I decided to write this book because I have encountered so many people who are misinformed about their health and because of that they make poor choices on a daily basis I want to thank God for giving me the knowledge and understanding of this subject in order to share it with others Most of the wisdom cited in this book comes from the greatest book ever written the Bible Thanks be to God I want to give special thanks to my friends Ketia and Daniel Jacques for their constant support to my sister in Christ Samantha Miller for her help and my beautiful mom Alcine Dorce for giving me life I want to thank The Ministry of Healing and all the books articles and resources that contributed to the completion of this book This book does not replace your doctor or any treatment your doctor has prescribed for you This book is intended to educate and make you aware of options available which can help you to make wiser choices concerning your health In everything that you do call on the name of God Almighty to give you direction Prepare yourself to make sacrifices and give your best effort and let God handle the rest Winston Churchill and others have said that failing to plan is planning to fail I wish that you plan to succeed by God's grace

The Lost Art of Finding Our Way John Edward Huth, 2013-05-15 Long before GPS Google Earth and global transit humans traveled vast distances using only environmental clues and simple instruments John Huth asks what is lost when modern technology substitutes for our innate capacity to find our way Encyclopedic in breadth weaving together astronomy meteorology oceanography and ethnography The Lost Art of Finding Our Way puts us in the shoes ships and sleds of early navigators for whom paying close attention to the environment around them was quite literally a matter of life and death Haunted by the fate of two young kayakers lost in a fog bank off Nantucket Huth shows us how to navigate using natural phenomena the way the Vikings used the sunstone to detect polarization of sunlight and Arab traders learned to sail into the wind and Pacific Islanders used underwater lightning and read waves to guide their explorations Huth reminds us that we are all navigators capable of learning techniques ranging from the simplest to the most sophisticated skills of direction finding Even today careful observation of the sun and moon tides and ocean currents weather and atmospheric effects can be all we need to find our way Lavishly illustrated with nearly 200 specially prepared drawings Huth's compelling account of the cultures of navigation will engross readers in a narrative that is part scientific treatise part personal travelogue and part vivid re-creation of navigational history Seeing through the eyes of past voyagers we bring our own world into sharper view
