On Rims Ridges The Los Alamos Area Since 188:

On Rims & Ridges Hal Rothman,1997-01-01 New Mexico's Pajarito Plateau encompasses the Bandelier National Monument and the atomic city of Los Alamos On Rims and Ridges throws into stark relief what happens when native cultures and Euro American commercial interests interact in such a remote area with limited resources The demands of citizens and institutions have created a form of environmental gridlock more often associated with Manhattan Island than with the semiurban West writes Hal K Rothman *The Natural West* Dan Flores,2003-03-30 The Natural West offers essays reflecting the natural history of the American West as written by one of its most respected environmental historians Developing a provocative theme Dan Flores asserts that Western environmental history cannot be explained by examining place culture or policy alone but should be understood within the context of a universal human nature The Natural West entertains the notion that we all have a biological nature that helps explain some of our attitudes towards the environment Flores also explains the ways in which various cultures including the Comanches New Mexico Hispanos Mormons Texans and Montanans interact with the environment of the West Gracefully moving between the personal and the objective Flores intersperses his writings with literature scientific theory and personal reflection The topics cover a wide range from historical human nature regarding animals and exploration to the environmental histories of particular Western bioregions and finally to Western restoration as the great environmental theme of the twenty first century **The Face of the Earth** J. Donald Hughes,2015-05-11 Although the organizing principle of virtually every world history text is development the editor of this volume maintains that this traditional approach fails to address the issue of sustainability By adopting the ecological process as their major theme the authors show how the process of human interaction with the natural environment unfolded in the past and offer perspective on the ecological crises in our world at the beginning of the 21st century Topics range from broad regional studies that examine important aspects of the global environment that affect nations to a study of the widespread influence of one important individual on his nation and beyond The authors take different approaches but all share the conviction that world history must take ecological process seriously and they all recognize the ways in which the living and non living systems of the earth have influenced the course of human affairs **Elemental Germans** Christoph Laucht,2012-05-15 Christoph Laucht offers the first investigation into the roles played by two German born emigre atomic scientists Klaus Fuchs and Rudolf Peierls in the development of British nuclear culture especially the practice of nuclear science and the political implications of the atomic scientists work from the start of the Second World War until 1959 **Nevada Historical Society Quarterly** ,1994 **Rocky Mountain Futures** Jill Baron,2002-09 Rocky Mountain Futures presents a comprehensive and wide ranging examination of the ecological consequences of past current and future human activities in the Rocky Mountain region of the United States and Canada *Forthcoming Books* Rose Arny,1992 American Book Publishing Record ,1998 Bones Incandescent Peggy Pond Church,2001 The journals dating from the

1930s are studies in spiritual and psychological response to the landscape that informed Church's sensibilities and creative energy. The plateau she loved became both her subject and the basis of her connection to other women writers, particularly Warner Mary Austin and May Sarton. **BOOK JACKET** **Bibliographie Internationale Des Recensions de la Littérature Savante**, 1995 **Atomic, Molecular, and Optical Physics: Atoms and Molecules**, 1996-05-16 Combined with the other two volumes, this text is a comprehensive treatment of the key experimental methods of atomic, molecular, and optical physics, as well as an excellent experimental handbook for the field. The wide availability of tunable lasers in the past several years has revolutionized the field and led to the introduction of many new experimental methods that are covered in these volumes. Traditional methods are also included to ensure that the volumes will be a complete reference source for the field. **Arts & Humanities Citation Index**, 1994 *Wildfire* Alianor True, 2013-04-10 During the summer of 2000, Americans from coast to coast witnessed the worst fire season in recorded history. Daily news reports brought dramatic images of vast swaths of land going up in smoke from the mountains of Montana and Wyoming to the scrublands of Texas to Los Alamos, New Mexico, where a controlled burn gone awry threatened forests, homes, and even our nation's nuclear secrets. As they have for centuries, wildfires captured our attention and our imagination, reminding us of the power of the natural forces that shape our world. In *Wildfire*, a Reader, nature writer and wildland firefighter Alianor True gathers together for the first time some of the finest stories and essays ever written about wildfire in America. From Mark Twain to Norman Maclean to Edward Abbey, writers featured here depict and record wildfires with remarkable depth and clarity. An ecological perspective is well represented through the works of John Muir, Aldo Leopold, and John McPhee. Ed Engle, Louise Wagenknecht, and Gretchen Yost, firefighters from the front lines, give us exciting first-person perspectives, reliving their on-the-ground encounters with forest fires. The works gathered in *Wildfire* not only explore the sensory and aesthetic aspects of fire but also highlight how much attitudes have changed over the past 200 years. From Native Americans who used fire as a tool to early Americans who viewed it as a frightening and destructive force to Aldo Leopold and other conservationists whose ideas caused us to rethink the value and role of fire, this rich collection is organized around those shifts in thinking. Capturing the fury and the heat of a raging inferno or the quiet emergence of wildflowers sprouting from ashes, the writings included in *Wildfire* represent a vital and compelling addition to the nature writing and natural history bookshelf. Physics Briefs, 1989 Scientific and Technical Aerospace Reports, 1981 *Agriculture Handbook*, 1981 Set includes revised editions of some issues. **The Road Atlas '07** Rand McNally and Company, 2006-08 A general road atlas for the United States, Canada, and Mexico. **High Energy Physics Index**, 1971 **International Aerospace Abstracts**, 1994 **The Road Atlas '04** Rand McNally and Company, 2003 3700 Map updates for traveling through the United States, Mexico, and Canada.
