**Horizons of Authenticity in Phenomenology, Existentialism, and Moral Psychology** Hans Pedersen, Megan Altman, 2014-11-10 This volume centers on the exploration of the ways in which the canonical texts and thinkers of the phenomenological and existential tradition can be utilized to address contemporary concrete philosophical issues In particular the included essays address the key facets of the work of Charles Guignon and as such honor and extend his thought and approach to philosophy To this end the four main sections of the volume deal with the question of authenticity i.e. what it means to be an authentic person the ways in which the phenomenological and existential traditions can impact the sciences how best to understand the fact of human mortality and finally the ways philosophical reflection can help address current questions of value The volume is designed primarily to serve as a secondary resource for students and specialists interested in rediscovering the practical application of existential and phenomenological thought The collection of scholarly essays then could be used in conjunction with some of the more recent scholarship concerning the practical value of philosophy Along with contributing to previous scholarship the essays in this proposed volume attempt to update and expand the scope of phenomenological and existential inquiry

**SCM Core Text: Theological Hermeneutics** Alexander S. Jensen, 2013-02-11 This book introduces theological hermeneutics by giving a historical account of the development of hermeneutical thinking It defines hermeneutics as the analysis of the obstacles to understanding The history of hermeneutical thinking and responses to obstacles is told here beginning with the allegorical interpretation of myths in Hellenism through to the contemporary view of the hermeneutical problem as universal Following the opening chapters on the history of hermeneutical thought the book

presents an overview of the various contemporary hermeneutical schools of thought and shows their rootedness in different parts of the hermeneutical tradition. The focus is clearly on biblical interpretation; however, it does also take account of developments outside the field of theology as they influence the theological reflection on the hermeneutical problem. The questions raised and the possible answers suggested in this volume will be of interest to students of other disciplines such as philosophy and literature.

Hegel's Phenomenology of Spirit Martin Heidegger, 1988. A text of a 1930/ETH 1931 lecture course on the opening chapters of Hegel's *Phenomenology of Spirit*; this title contains some of Heidegger's most crucial statements about temporality, ontological difference and dialectic and being and time in Hegel. It is useful for students of Heidegger and Hegel and of contemporary Continental philosophy.

**The Politics of Attention and the Promise of Mindfulness** Lawrence Berger, 2023-09-27. It is evident from recent political campaigns such as that of Donald Trump that the deployment of attention is crucial for political outcomes. Indeed, Trump's presidency came about in part due to realities that were produced by the media themselves, which required in turn the engagement of public attention. The implication is that the instability and capriciousness that is often associated with attention can be an important influence on the outcomes that are so produced. Drawing on the thought of Martin Heidegger, Lawrence Berger puts forward a new conception of attention as human presence, showing how its state determines the efficacy of public spaces in articulating and achieving visions of the common good. As politicians seek to amass power by capturing attention, citizens can engage in disciplines of attention such as mindfulness in producing a public power that is more appropriately oriented to the welfare of all. Berger argues that the practice of mindfulness can enable enhanced ontological bonds to form between individuals, which can be the basis for more stable and effective political realities. Such bonds are not given structures but are rather contingent upon the state of attention, which comes about holistically by way of a hermeneutical circle of attention, language and bodily understanding. This book is a valuable resource for scholars and students of philosophy of mind, political philosophy, phenomenology and cognitive science.

*American Phenomenology* E.F. Kaelin, Calvin O. Schrag, 1988-12-31. THEODORE KISIEL. Date of birth: October 30, 1930. Place of birth: Brackenridge, Pennsylvania. Date of institution of highest degree: PhD, Duquesne University, 1962. Academic appointments: University of Dayton, Canisius College, Northwestern University, Duquesne University, Northern Illinois University. I first left the university to pursue a career in metallurgical research and nuclear technology. But I soon found myself drawn back to the university to round out an overly specialized education. It was along this path that I was waylaid into philosophy by teachers like H. L. Van Breda and Bernard Boelen. The philosophy department at Duquesne University was then, 1958-1962, a veritable little Louvain, and the Belgian-Dutch connection exposed me to, among other visiting scholars, Jean Ladrière and Joe Kockelmans, who planted the seeds which eventually led me to the hybrid discipline of

a hermeneutics of natural science and prompted me soon after graduation to make the first of numerous extended visits to Belgium and Germany The endeavor to learn French and German led me to the task of translating the phenomenological literature bearing especially on natural science and on Heidegger The talk in the sixties was of a continental divide in philosophy between Europe and the Anglo American world But in designing my courses in the philosophy of science I naturally gravitated to the works of Hanson Kuhn Polanyi and Toulmin without at first fully realizing why I felt such a strong kinship with them beyond their common anti positivism *The Routledge Handbook of Contemporary Existentialism* Kevin Aho,Megan Altman,Hans Pedersen,2024-04-18 Of the philosophical movements of the twentieth century existentialism is one of the most powerful and thought provoking Its engagement with the themes of authenticity freedom bad faith nihilism and the death of God captured the imagination of millions However in the twenty first century existentialism is grappling with fresh questions and debates that move far beyond traditional existential preoccupations ranging from the lived experience of the embodied self intersectionality and feminist theory to comparative philosophy digital existentialism disability studies and philosophy of race The Routledge Handbook of Contemporary Existentialism explores these topics and more connecting the ideas and insights of existentialism with some of the most urgent debates and challenges in philosophy today Eight clear sections explore the following topics methodology and technology social and political perspectives environment and place affectivity and emotion death and freedom value existentialism and Asian philosophy aging and disability As well as chapters on key figures such as Kierkegaard Nietzsche Heidegger Sartre and Beauvoir the Handbook includes chapters on topics as diverse as Chicana feminism ecophilosophy and the environment Latina existentialism Black nihilism the Kyoto school and southeast Asian existentialism and the experiences of aging disability and death Essential reading for students and researchers in the areas of existentialism and phenomenology The Routledge Handbook of Contemporary Existentialism will also be of interest to those studying ethics philosophy and gender philosophy of race the emotions and philosophical issues in health and illness as well as related disciplines such as Literature Sociology and Political Theory **SCM Core Text:**

**The Multidimensionality of Hermeneutic Phenomenology** Babette Babich, Dimitri Ginev, 2014-01-15 This book offers new reflections on the life world from both phenomenological and hermeneutic perspectives. It presents a prism for a new philosophy of science and technology, especially including the social sciences, but also the environment as well as questions of ethics and philosophical aesthetics, in addition to exploring the themes of theology and religion. Inspired by the many contributions made by the philosopher Joseph Kockelmans, this book examines the past, present, and future prospects of hermeneutic phenomenology. It raises key questions of truth and method as well as highlights both continental and analytic traditions of philosophy. Contributors to *The Multidimensionality of Hermeneutic Phenomenology* include leading scholars in the field as well as new voices representing analytic philosophers of science, hermeneutic and phenomenological philosophers of science, scholars of comparative literature, theorists of environmental studies, specialists in phenomenological ethics, and experts in classical hermeneutics. *Intimations of Mortality* David Farrell Krell, 1990-10-01 Heidegger's thinking has an underlying unity, this book argues, and has cogency for seemingly diverse domains of modern culture, philosophy, and religion: aesthetics and literary criticism, intellectual history, and social theory. The theme of mortality, finite human existence, pervades Heidegger's thought in the author's words before, during, and after his magnum opus *Being and Time*, published in 1927. This theme is manifested in Heidegger's work not as funereal melodramatics or as despair and destructive nihilism, but rather as a thinking within anxiety. Four major subthemes in Heidegger's thinking are explored in the book's four parts: the fundamental ontology developed in *Being and Time*; the lighting and clearing of Being understood as unconcealment; the history of philosophy with emphasis on Heraclitus, Hegel, and Nietzsche interpreted as the destiny of Being; and the poetics of Being explicated as the fundamental experience of mortality. Neither an introduction nor a survey, this book is a close reading of a

wide range of Heidegger's books, lectures and articles including extensive material not yet translated into English informed by the author's conversations with Heidegger in 1974-76. Each of the four subthemes is treated critically. The aim of the book is to push its interrogations of Heidegger's thought as far as possible in order to help the reader toward an independent assessment of his work and to encourage novel, radically conceived approaches to traditional philosophical problems.

**Hermeneutic Phenomenology in Health and Social Care Research** Susan Crowther, Gill Thomson, 2022-08-23 This book explores how, why and when hermeneutic phenomenology can be used as a methodology in health and social research. Providing actual examples of doing robust hermeneutic phenomenology and a focus on praxis, the book demonstrates how philosophical or theoretical notions can inform, enrich and enhance our research projects. The chapters offer examples of many different research designs and interpretive decisions in order to illustrate the unbounded and creative nature of this type of inquiry whilst also demonstrating the trustworthiness of the scientific processes adopted. The chapter authors invite the reader on a unique journey that highlights how they made individual and tailored decisions throughout their projects, emphasising the challenges and joys they encountered. This book is a valuable resource for all students and academics who wish to explore the meaningfulness of human lived experiences across the multitude of phenomena in health and social care.

*Phenomenology* Shaun Gallagher, 2022-08-23 With a focus on phenomenological methods, this new edition of Shaun Gallagher's highly regarded textbook provides a comprehensive introduction to phenomenology considered as a philosophical and interdisciplinary practice. *Phenomenology 2e* encompasses both the classic 20th-century explications of phenomenology as well as recent developments in the practical and scientific uses of phenomenology. Key features: Explores debates about naturalizing phenomenology and reviews recent extensions of phenomenological methodology. Relates the phenomenological analysis of intentionality to discussions of enactive perception. Includes a discussion of the phenomenology of performance and a new chapter on critical phenomenology. Examines specialized topics in phenomenology including Husserl's concept of hyletic data, embodiment, time, consciousness, action, intersubjectivity and self-consciousness. Each chapter concludes with suggestions for further reading. This book is essential reading for all undergraduate and graduate philosophy students taking courses in phenomenology. **Existential Medicine** Kevin Aho, 2018-04-23 Existential Medicine explores the recent impact that the philosophies of existentialism phenomenology and hermeneutics have had on the health care professions A growing body of scholarship drawing primarily on the work of Martin Heidegger and other influential twentieth century figures such as Maurice Merleau Ponty Jean Paul Sartre and Hans Georg Gadamer has shaped contemporary research in the fields of bioethics narrative medicine gerontology enhancement medicine psychiatry and psychotherapy and palliative care among others By regarding the human body as a decontextualized object the prevailing paradigm of medical science often overlooks the body as it is lived As a result it fails to critically engage the experience of illness and the core questions of what it means and what it feels like to be ill With work from emerging and renowned scholars in the field this collection aims to shed light on these issues and the crucial need for clinicians to situate the experience of illness within the context of a patient's life world To this end Existential Medicine offers a valuable resource for philosophers and medical humanists as well as health care practitioners

**Merleau-Ponty and Nishida** Adam Loughnane, 2019-12-19 Places the phenomenologies of Merleau Ponty and Nishida in dialogue and uncovers a demand for a motor perceptual form of faith in both philosophers meditations on artistic expression In Merleau Ponty and Nishida Adam Loughnane initiates a fascinating new dialogue between two of the twentieth century's most important phenomenologists of the Eastern and Western philosophical worlds Throughout the book the reader is guided among the intricacies and innovations of Merleau Ponty's and Nishida's ontological approaches to artistic expression with a focused look at a rarely explored connection between faith and negation in their philosophies Exploring the intertwining of these concepts in their broader ontologies invokes a reappraisal of the ambiguous status of religion and art in the writings of both thinkers Measuring these ambiguities the ontologies of Flesh and Basho are read in depth alongside great artworks and the motor perceptual practices of seminal landscape artists such as C zanne Sessh Taiga and Hasegawa as well as other major figures of European Chinese and Japanese art history Loughnane studies these artists bodily practices focusing on the intimate relations realized with the landscapes they paint and illuminating a valence of their expressive disciplines as a motor perceptual form of faith Merleau Ponty and Nishida is an exciting intercultural reading expanding two philosophers projects toward new horizons of research revealing incitements in their writings that challenge unambiguous distinctions between art philosophy faith and ultimately philosophy East and West Loughnane illuminates the ambiguous chiasmic and dynamic relationality between the body and the world providing concrete examples from art history East and West He not only skillfully explains Nishida's and Merleau Ponty's ontological notions but also puts their philosophy to the test of art works proving that their thinking reveals an important truth of art Takeshi Kimoto Chukyo University
