Creativity and Convention Rosa E. Vega Moreno, 2007-08-15 This book offers a pragmatic account of the interpretation of everyday metaphorical and idiomatic expressions Using the framework of Relevance Theory it reanalyses the results of recent experimental research on figurative utterances and provides a novel account of the interplay of creativity and convention in figurative interpretation showing how features emerge during metaphor comprehension and how literal meaning contributes to idiom comprehension The central claim is that the mind is rather selective when processing information and that in the pragmatic interpretation of both literal and figurative utterances this selectivity often results in

the creation of new ad hoc concepts or the standardization of pragmatic routines With this approach the comprehension of metaphors and idioms requires no special pragmatic principles or procedures not required for the interpretation of ordinary literal utterances but follows from an automatic tendency towards selective processing which is itself a by product of Sperber and Wilson s Cognitive Principle of Relevance *Cross-linguistic Influences in the Second Language Lexicon* Janusz Arabski,2006-02-28 This volume contains a selection of papers analyzing language transfer a phenomenon which results from language contact in bilingual and multilingual language acquisition and learning contexts The main focus of the volume is on the lexical aspects of language transfer *Stylistic Use of Phraseological Units in Discourse* Anita Naciscione,2010

Phraseology in English Academic Writing Peter Andrew Howarth, 2013-05-22. This study examines the use of one category of prefabricated language: restricted lexical collocations in native and non-native academic English in the social sciences in an attempt to throw light on a neglected aspect of learner competence. It first surveys the existing theoretical viewpoints on word combinations and then reviews experimental research into the psycholinguistic processing of prefabricated language which suggests that the role of conventional expressions is to facilitate fluent production and rapid comprehension. A computer-based corpus of native academic writing is analysed to discover to what extent and how such collocations are used in formal written English. Conventionality of style, it is suggested, aids precision of expression, clearly a quality highly valued in academic argument. A corpus of non-native writing is then subjected to a similar analysis. While the collocational errors learners make do not on the whole seriously destroy intelligibility, they can lead to a lack of precision and obscure the clarity of expression required in academic communication. Pedagogical implications are then considered and it is seen that for the most part published teaching materials have failed to recognize the nature of collocations in general and offer little help. The final part of the study examines the treatment of restricted collocations in both general and phraseological dictionaries for learners. These are evaluated on their selection and presentation of collocations shown by the preceding research to be problematic for advanced learners. The conclusion suggests that for such learners who are mostly studying the language independently, good reference works are needed in the form of specialist collocational dictionaries. The results of this research help to establish principles for the design of such dictionaries.

Traductio Dirk Delabastita, 2016-04-08. Nothing like wordplay can make difference between languages look so uncompromising, can give such a sharp edge to the dilemma between forms and effects, can so blur the line between translation and adaptation or can cast such harsh light on our illusion of complete semantic stability. In the pun, the whole language system may resonate and so may literary traditions and ideological discourses. It follows that the pun does not only put translators to the test; it also poses a challenge to the views and concepts of those who study translation. This book brings together experts on translation and the pun as well as researchers representing a variety of other relevant disciplines and schools of thought ranging from theology to deconstruction and from contrastive linguistics to feminism. It can be read as a companion volume to *Wordplay and Translation*, a special issue of *The Translator* Volume 2 Number 2 1996, also edited by Dirk Delabastita.

Conceptual Structure in Lexical Items Kristel Proost, 2007. This volume deals with the occurrence of lexical gaps in the domain of linguistic action verbs. Though these constitute a considerable proportion of the verb inventory of many languages, not all concepts of verbal communication may be expressed by lexical items in any particular one of them. Introducing a conceptual system which allows gaps to be searched for systematically, this study shows which concepts of verbal communication are

and which are not lexicalised in English German and Dutch The lexicalisation patterns observed shed light on the way in which verbal behaviour is conceptualised in a particular speech community To complete the picture the volume also addresses the question of whether communication concepts which may not be expressed by verbs may be lexicalised by fixed multiword expressions

Food and Drink Idioms in English Laura Pinnavaia, 2019-01-10 Idioms carry an aura of mystery for all speakers owing to the discrepancy between their literal and non literal meanings This book clears up some of these ambiguities by examining a series of expressions that have derived from the most instinctive and essential of all human behaviour eating and drinking The quantity and quality of 276 food and drink idioms are explored investigating two hundred and fifty years of English monolingual lexicography and forty years of usage as attested by contemporary linguistic corpora The examination of these idioms syntactic semantic pragmatic historical social and cultural characteristics will foster in speakers a whole new approach to idiom comprehension and usage and will constitute thought provoking ground for further research in other idiom domains

Politics as Text and Talk Paul Chilton, Christina Schäffner, 2002-10-31 Human beings are political animals They are also articulate mammals How are these two aspects linked This is a question that is only beginning to be explored The present collection makes a contribution to the investigations into the use of language in those situations which informally and intuitively we call political Such an approach is revealing not only for politics itself but also for the human language capacity Each chapter outlines a particular method or analytic approach and illustrates its application to a contemporary political issue institution or mode of political behaviour As a whole the collection aims to give a sample of current research in the field It will interest those who are beginning to carry the research paradigm forward as well as provide an introduction for newcomers whether they come from neighbouring or remote disciplines or from none
