On Moral Considerability An Essay On Who Morally Matters:

On Moral Considerability Mark H. Bernstein, 1998-11-19 In this original study Mark Bernstein ventures into a neglected area of ethics the question of moral enfranchisement to identify the qualities that make an entity deserving of moral consideration In the first part of the book he undertakes a detailed analysis of three influential accounts of moral considerability offering novel arguments to counter two popular theories in defense of a currently unfashionable theory of welfare He develops a qualified mental state account he dubs experientialism the view that having conscious experiences is necessary and sufficient for moral standing and contends that experientialism is superior to both the desire theory and perfectionism In the second part of *On Moral Considerability* Bernstein explores the political implications of accepting the experientialist view Contrary to common philosophical thought he maintains that this position requires us to enlarge our moral sphere to include non human animals And surprisingly he finds that were one to accept either the desire theory or perfectionism these animals still ought to be included in the moral realm Yet he does not seek to expand the moral realm to the extent that deep ecologists champion This contentious look at who morally matters introduces vital new arguments into the fields it touches Its intimate connection between theory and practice will appeal to philosophers of ethics applied ethics and animal ethics And those readers interested in animal rights will be engaged by its discussion of human obligations toward animals **BOOK JACKET**

On Moral Considerability Mark H. Bernstein, 1998-11-19 In this fresh and powerfully argued book Mark Bernstein identifies the qualities that make an entity deserving of moral consideration It is frequently assumed that only normal human beings count Bernstein argues instead for experientialism the view that having conscious experiences is necessary and sufficient for moral standing He demonstrates that this position requires us to include many non human animals in our moral realm but not to the extent that many deep ecologists champion

self that informs this book is the joint product of two multifaceted philosophical strands the constructivist and the hermeneutical Various schools of thought view human beings as self creating by pursuing our goals and promoting our projects and so while abiding by the various norms that guide us in these endeavors we also determine human identity The result is an emphasis on a reciprocal relationship between law and morality on the one side and the composition and boundaries of the self on the other In what medium does this self creation take place and who exactly is the we engaged in it The answer suggested by the hermeneutical tradition provides the book with its second main theme Like plays and novels human beings are constituted by meaning and these meanings vary in their level of abstraction Self creation is a matter of fixing and elaborating these meanings at different levels of abstraction the individual the collective and the universal A key implication of this picture explored in the book is a conception of human dignity as accruing to us qua authors of the values and norms by which we define our selves individually and collectively
