On Sham, Vulnerability and Other Forms of Self-destruction Jules Henry, 1973 **On Sham, Vulnerability and Other Forms of Self-destruction** Jules Henry, 1973 **The Roots of Ethics** Daniel Callahan, 2013-03-09 OUR AGE IS

CHARACTERIZED by an uncertainty about the nature of moral obligations about what one can hope for in an afterlife and about the limits of human knowledge These uncertainties were captured by Immanuel Kant in his Critique of Pure Reason where he noted three basic human questions what can we know what ought we to do and what can we hope for Those questions and the uncertainties about their answers still in great part define our cultural perspective In particular we are not clear about the foundations of ethics or about their relationship to religion and to science This volume brings together previously published essays that focus on these interrelationships and their uncertainties It offers an attempt to sketch the interrelationship among three major intellectual efforts determining moral obligations the ultimate purpose and goals of man and the cosmos and the nature of empirical reality Though imperfect it is an effort to frame the unity of the human condition which is captured in part by ethics in part by religion and in part by the sciences Put another way this collection of essays springs from an attempt to see the unity of humans who engage in the diverse roles of valuers believers and knowers while still remaining single individual humans Self-deception and Morality Mike W. Martin, 1986 This book systematically explores the moral issues surrounding self deception While many articles and books have been written on the concept of self deception in recent years Martin's gives much greater emphasis to self deception as a significant topic for both ethical theory and applied ethics Self deception is perplexing from a moral point of view It seems tailor made to camouflage and foster immorality Does all self deception involve some guilt and is it among the most abhorrent evils as some moralists and theologians have charged Or is it only wrong sometimes such as when it has bad consequences Could it on occasion be permissible or even desirable to deceive ourselves just as we are sometimes justified in deceiving other people Are self deceivers perhaps more like innocent victims than perpetrators of deceit and as such deserving of compassion and help Or paradoxically are they best viewed with ambivalence culpable as deceivers and simultaneously innocent as victims of deception from the introduction Martin develops a conception of self deception as the purposeful evasion of acknowledging to oneself truths or one's view of truth He details a systematic framework for understanding the main moral perspectives and traditions concerning self deception that have emerged in western philosophy In so doing he clarifies related concepts like sincerity authenticity honesty hypocrisy weakness of will and self understanding Ranging across traditions both philosophical Kant Kierkegaard and Sartre and non philosophical Freud Eugene O'Neill and Henrik Ibsen Martin shows why self deception is as morally complex as any other major form of behavior The appeal of this book is broad The volume will challenge professional philosophers and psychologists yet it is organized and written to be accessible to students in courses on ethics philosophy of mind and philosophy of literature Martin's numerous literary examples should also interest literary critics

Emails From the Year 2002 Andreas Daniel Fogg, 2013-10-31 Society's interest in the preservation of persistent social problems That society or cultures often have an unspoken often unrecognized interest and some sort of gratification from the continued existence of most persistent and loudly decried social and economic even political problems Since this appears to be the case one way of attempting to solve such problems is to attempt to articulate or otherwise indicate which specific interests and needs are being served as a result of society's ongoing inability to formulate or agree upon any specific course of legislation policy making or even some sort of specific discourse whose utilization might lay the groundwork for some sort of improvement Consider the possibility that humanity might while engaging in ever more efficient and less expensive modes of computerization and automation effectively destroy real human economic activity The possibility exists that as human work comes to be defined as ever less efficient and necessary for the production of goods and services that real people will begin to be paid less and less Eventually however humanity's ability to purchase these ever more mechanized goods and services will begin to be seriously depleted So that a point could theoretically arrive when a vast plethora of goods and services would be available for sale however the numbers of available purchasers would be constantly diminishing to the point where civility would begin to disappear theft would become rampant The scene would not be pretty

Power and the Self Jeannette Marie Mageo, 2002-01-24 Power and the Self first published in 2002 deals with an important but neglected topic the ways in which power is experienced by individuals both as agents and as objects of the exercise of power Each contributor presents a series of case studies drawn from a variety of cultural contexts including the analysis of the appeal of Japanese superhero toys for American children the conditions that lead to dehumanising treatment of patients in an American nursing home the experiences of a Turkish immigrant woman in the Netherlands a contribution relating theories

about the capacity to commit genocidal violence to everyday forms of violence and other cases from New Guinea and Samoa The introduction provides a readable historical review and synthesis of the theoretical ideas that provide the context for the work presented in the book **Adult episodes in Japan (=JAAS X,1-2)** Plath,2022-05-16 **Caring for the Elderly in Japan and the US** Susan Orpett Long,2013-01-11 In an era of changing demographics and values this volume provides a cross national and interdisciplinary perspective on the question of who cares for and about the elderly The contributors reflect on research studies experimental programmes and personal experience in Japan and the United States to explicitly compare how policies practices and interpretations of elder care are evolving at the turn of the century **Schoolishness** Susan D. Blum,2024-05-15 In Schoolishness Susan D Blum continues her journey as an anthropologist and educator The author defines schoolishness as educational practices that emphasize packaged learning unimaginative teaching uniformity constant evaluation by others arbitrary forms predetermined time and artificial boundaries resulting in personal and educational alienation dependence and dread Drawing on critical progressive and feminist pedagogy in conversation with the anthropology of learning and building on the insights of her two previous books Blum proposes less schoolish ways of learning in ten dimensions to lessen the mismatch between learning in school and learning in the wild She asks if learning is our human superpower why is it so difficult to accomplish in school In every chapter Blum compares the fake learning of schoolishness with successful examples of authentic learning including in her own courses which she scrutinizes critically Schoolishness is not a pedagogical how to book but a theory based phenomenology of institutional education It has moral psychological and educational arguments against schoolishness that as Blum notes rhymes with foolishness

wilderness survival does not favor the fully exposed or conspicuously transparent self As our minds have evolved as practical intelligence has become more refined as we have learned the subtleties of substituting words and symbols for weapons and violence deception has come to play a central and complex role in social life The Varnished Truth takes us beyond philosophical speculation and clinical analysis to give a sense of what it really means to tell the truth As Nyberg lays out the complexities involved in leading a morally decent life he compels us to see the spectrum of alternatives to telling the truth and telling a clear cut lie A life without self deception would be intolerable and a world of unconditional truth telling unlivable His argument that deception and self deception are valuable to both social stability and individual mental health boldly challenges popular theories on deception including those held by Sissela Bok and Daniel Goleman Yet while Nyberg argues that we deceive among other reasons so that we might not perish of the truth he also cautions that we deceive carelessly thoughtlessly inhumanely and selfishly at our own peril **Japanese Society Since 1945** Edward R.
