Semiconductor Optical Amplifiers:

Semiconductor Optical Amplifiers Niloy K Dutta, Qiang Wang, 2006-02-23 This invaluable book provides a comprehensive treatment of the design and applications of the semiconductor optical amplifier SOA. SOAs are important components for optical communication systems with applications as in line amplifiers and as functional devices in evolving optical networks. The functional applications of SOAs were first studied in the early 1990s since then the diversity and scope of such applications have been steadily growing. *Semiconductor Optical Amplifiers* is self contained and unified in presentation. The treatments in the book are detailed enough to capture the interest of the curious reader and sufficiently complete to provide the necessary background to explore the subject further. It is intended to be used as an advanced text by graduate students and by practicing engineers but is also suitable for non experts who wish to have an overview of optical amplifiers.

Applications of Semiconductor Optical Amplifiers Kyriakos E. Zoiros, 2018-10-11 This book is a printed edition of the Special Issue *Applications of Semiconductor Optical Amplifiers* that was published in *Applied Sciences*.
Semiconductor Optical Amplifiers Michael J. Connelly, 2002-01-31 The semiconductor optical amplifier has emerged as an important component in many optical fibre communication switching and signal processing systems. Some Advanced Functionalities of Optical Amplifiers Sisir Garai, 2015-12-16 With the explosion of information traffic the role of optical amplifiers becomes very significant in fulfilling the demand of faster optical signals and data processing in the field of communication. This book covers different advanced functionalities of optical amplifiers as well as their emerging applications in optical communication networks. The first chapter deals with an efficient and validated time domain numerical modelling of semiconductor optical amplifiers (SOAs) and SOA based circuits while the second chapter is based on the working of gallium nitride based semiconductor optical amplifiers. The role of SOAs for the next generation of high data rate optical packet switched network is presented in Chapter 3. Chapter 4 covers the all optical semiconductor optical amplifier based on quantum dots (QD) SOA and its function as an arithmetic processor. In Chapter 5 the authors have presented the role of SOAs in intensity modulation of the optical pulses and their use in deterministic timing jitter and peak pulse power equalization analysis. In Chapter 6 the investigation of broadband S band to L band erbium doped fibre amplifier (EDFA) module is presented and Chapter 7 includes the optimized design technique of Yb³⁺ Er³⁺ codoped phosphate microring resonator amplifiers. All selected chapters are very interesting and well organized and I hope they will be of great value to postgraduate students, researchers, academics and anyone seeking to understand the advanced functionalities of optical amplifiers in the present scenario.
