Seminar On Differential Geometry:

Seminar on Differential Geometry Shing-Tung Yau, Institute for Advanced Study (Princeton, N.J.), 1982-03-21 This collection of papers constitutes a wide ranging survey of recent developments in differential geometry and its interactions with other fields especially partial differential equations and mathematical physics This area of mathematics was the subject of a special program at the Institute for Advanced Study in Princeton during the academic year 1979-1980 the papers in this volume were contributed by the speakers in the sequence of seminars organized by Shing Tung Yau for this program Both survey articles and articles presenting new results are included The articles on differential geometry and partial differential equations include a general survey article by the editor on the relationship of the two fields and more specialized articles on topics including harmonic mappings isoperimetric and Poincaré inequalities metrics with specified curvature properties the Monge-Ampère equation L^2 harmonic forms and cohomology manifolds of positive curvature isometric embedding and Kähler manifolds and metrics The articles on differential geometry and mathematical physics cover such topics as renormalization instantons gauge fields and the Yang-Mills equation nonlinear evolution equations incompleteness of space-times black holes and quantum gravity A feature of special interest is the inclusion of a list of more than one hundred unsolved research problems compiled by the editor with comments and bibliographical information
