The re-emergence of co-housing in Europe Lidewij Tummers,2017-10-02 Across Europe the number of co housing initiatives is growing and they are increasingly receiving attention from administrators and professionals who hold high expectations for urban liveability Is co housing a marginal idealist phenomenon or the urban middle class answer to the

current housing crisis And has the development of theoretical insight and research kept up with the actual expansion of co housing as a practice These questions were raised during the first European conference on co housing research which took place in Tours France in March 2012 Both the conference and this book aim to move beyond case studies and to look more particularly at the implications and wider perspective of the current co housing trend Using the specific vocabulary of different disciplines and geographic regions the contributions to this book analyse the underlying thinking behind and the expectations projected on diverse models of collaborative housing The authors are aware of the qualities of contemporary co housing but they go beyond advocacy to investigate the conditions under which co housing can be successful as a strategy for housing provision can offer solutions for sustainable urban development or indeed can contribute to involuntary or intentional gentrification This book was originally published as a special issue of the Journal of Urban Research and Practice

New Approaches for Sustainable & Resilient Processes and Products of Social Housing Development in the Arabian Gulf Countries Khaled Galal Ahmed, Mohamed H. Elnabawi Mahgoub, Lindita Bande, Martin Scoppa, 2023-10-16 Social housing has been a forefront research topic especially from its economic and socio cultural factors The nature of social housing in the Arabian Gulf Countries has been distinctive in its approach with usually generous areas and urban sprawl designs Recently most of these Arabian Gulf Countries have gone through profound transformation in their social and housing paradigms influenced by their sustainability adopted agendas Still scholarly documentation and analysis of the processes and products of these transformed paradigms are largely missing or at least fragmented So there is a desperate need to boost research work in this field as related to each city country in this region with largely expected mutual effects that these experiences might have on each other and on the global debate about sustainable and resilient social housing as a whole
