Interdisciplinary Phenomenology D. Ihde, Richard M. Zaner, 2013-06-29 Historically philosophy has been the point of origin of the various sciences However once developed the sciences have increasingly become autonomous although often taking some paradigm from leading philosophies of the era As a result in recent times the relationship of philosophy to the sciences has been more by way of dialogue and critique than a matter of spawning new sciences This volume of the *Selected Studies* brings together a series of essays which develop that dialogue and critique with special reference to the insights of phenomenological philosophy Phenomenology in its own way has been interfaced with the sciences from its outset Perhaps the most widely noted relation due in part to Edmund Husserl's characterization of the beginning steps of phenomenology as a descriptive psychology has been with the various psychologies It is well known that the early Gestaltists were influenced by Husserl and later the Existential psychologies acknowledged the impact of Martin Heidegger and Jean Paul Sartre to mention but two philosophers And of course Husserl's lifetime concern for the foundations of logic and mathematics especially as these the former in particular were developed into a foundational theory of science has figured prominently in these dialogues

2 INTRODUCTION Less directly but more currently the impact of phenomenology upon the disciplines has begun to be felt in a whole range of the sciences

In the Beginning was the Deed Harry Redner, 2024-06-04 Now that the collective death of mankind has become a possibility no other thought can remain unimpaired Harry Redner traces historically the onset of this acute state of Nihilism from what might be called the Faustian revolution symbolized by Faust's pronouncement In the beginning was the Deed Redner reflects on the passage of the three main Faustus from Marlowe's to Goethe's to Thomas Mann's and this reflection serves as the dramatic metaphor for a review of the relationship of Progress to Nihilism in modern civilization Starting with an exposition of the key Faustian thinkers Marx Nietzsche Wittgenstein and Heidegger the book proceeds by examining the dominant modern ideas on Man Time and Nihilism with reference to Foucault Derrida and Althusser It focuses on Language which is a key preoccupation of all these thinkers but has not yet been taken far enough to afford a basis for the explanation of fundamental changes in civilization Language in its creative and destructive functions as constituting both the conscious and unconscious of a culture is reconceived so as to account for the hidden link between Progress and Nihilism The author then explores sociologically the dominant aspects of Progress in terms of the ideas of Weber Adorno and Marcuse on Technology Subjectivity and Activism Finally an extensive literary study of the three main Faustus concludes with a coda on the future of music In the Beginning Was the Deed is lucid and direct tinged with wry humor Redner represents Man in the nuclear age and reflects on that

Walter Schmitz,1990 Signifcs is one of those by no means exclusively sign theoretically relevant movements which arose at the turn of the century It established a philosophical tradition which from its very inception was interlaced with widely varying movements ranging for example from Breal s semantics to Carnap s and Neurath s logical empiricism In this volume an international group of well known scholars from various disciplines undertakes a broad re evaluation of signifcs and its development which promises also to yield a better knowledge of research approaches in linguistics semiotics philosophy and psychology with which signifcs was related or vied for acceptance Contributions deal with Lady Welby s biography and socio cultural background the intellectual context of the signifc movement at the turn of the century and the relationships between Welby s semiotic and philosophical ideas on the one hand and those of her contemporaries Breal Peirce Schiller Vailati etc and followers Ogden Van Eeden Mannoury etc on the other Descriptions of the historiographically most important archive materials a bibliography of publications on Lady Welby and her signifcs and an index of names conclude the volume **Signifying and Understanding** Susan Petrilli,Lady Victoria Welby,2009 This book introduces and provides commentary on a selection of published and unpublished works by Victoria Welby and exponents of the Signific Movement in the Netherlands Beyond offering an important contribution to the reconstruction of a neglected phase in the history of ideas it evidences the theoretical topicality of signifcs in particular the focus on the relation of signs to value meaning and understanding on verbal and nonverbal behavior and on language and communication **Beyond Meaning** Elly Ifantidou,Louis de Saussure,Tim Wharton,2021-11-15 Despite the fact that they are often crucial to our understanding the vague ineffable elements of language use and communication have received much less attention from linguists than the more concrete effable ones This has left a range of important questions unanswered How might we account for the communication of non propositional phenomena such as moods emotions and impressions What type of cognitive response do these phenomena trigger if not conceptual or propositional Do creative metaphors and unknown words in second languages and other pointers to conceptual regions communicate concepts learned from language alone How might the descriptive ineffability of interjections free indirect speech etc be accommodated within a theory of communication What of those working on the aesthetics of artworks music and literature What can evolution tell us about ineffability The papers in this volume address these fascinating questions head on They represent a range of different attempts to answer them and in so doing allow us to pose exciting new questions The aim to bring the ineffable firmly within the grasp of theoretical pragmatics *The Significance of Sense* Roger Wertheimer,1972 **Sign Studies and**

Semioethics Susan Petrilli, 2014-10-09 This book examines the issues surrounding the problematic perpetuation of dominant sign systems through the framework of semioethics Semioethics is concerned with using semiotics as a powerful tool to critique the status quo and move beyond the reproduction of the dominant order of communication The aim is to present semioethics as a method to engage semiotics in an active rethink of our ability as humans to affect change **Signs of Humanity / L'homme et ses signes** Gérard Deledalle, Michel Balat, Janice Deledalle-Rhodes, 2019-05-20 No detailed description available for Signs of Humanity L'homme et ses signes **Necessity and Truthful Fictions** Amihud Gilead, 2009-01-01 This book discovers areas and themes especially in philosophical psychology for novel observations and investigations the diversity of which is systematically unified within the frame of the author's original metaphysics panenmentalism The book demonstrates how by means of truthful fictions we may detect meaningful possibilities as well as their necessary relationships that otherwise could not be discovered *The Encyclopædia Britannica* Hugh Chisholm, James Louis Garvin, 1926 **Positive Psychology in Search for Meaning** Dmitry Leontiev, 2016-03-17 What are the ways in which we can understand the meaning of the psychology of meaning in people's lives In the last century mainstream psychology has largely neglected the topic of meaning More recently the concept has become an academically legitimate one within positive psychology and in some other speciality areas of psychology This book contains a collection of theoretical methodological and empirical papers written by the acknowledged experts systematically working on the problems of personal meaning within the positive psychology framework The authors investigate the possibilities and limitations of a scientific study of personal meaning and new perspectives that this concept brings to the field This book was originally published as a special issue of The Journal of Positive Psychology *What is Meaning?* Lady Victoria Welby, 1983 In *What is Meaning* 1903 the author elaborates on the fundamental tenets of her theory of sign to which she gives the overall term signification One of the main obstacles to an adequate theory of meaning in Lady Welby's opinion is the unfounded assumption of fixed sign meaning There is strictly speaking no such thing as the Sense of a word but only the sense in which it is used the circumstances state of mind reference universe of discourse belonging to it The Meaning of a word is the intent which it is desired to convey the intention of the user The Significance is always manifold and intensifies its sense as well as its meaning by expressing its importance its appeal to us its moment for us its emotional force its ideal value its moral aspect its universal or at least social range This facsimile of the 1903 edition of *What is Meaning* is accompanied by an essay on Signification as a Fundamental Science by Achim Eschbach and A Concise History of Signification by G Mannoury **Semiotics and its Masters.
