

A dramatic landscape featuring a sunset or sunrise over a range of mountains. The sky is filled with warm, orange and yellow clouds, and the sun is visible on the left side. The mountains in the foreground are dark and silhouetted against the bright sky. A quote is overlaid in the center of the image.

Our human flesh needs touch  
and intimacy, what we get, or  
should get, from a mother –  
Woman. Shouts and whispers.

**Original Skin** Maryrose Cuskelly,2011-06-01 Like the air we breathe we take our skin for granted Yet it is remarkable it mitigates and ameliorates the sometimes harsh world we dwell in and is at the interface of so much of what we encounter It is our border the edge of ourselves the point where we meet our universe Original Skin is at times a scientific study remarking on the biological magic behind the human body s largest organ At others it becomes an anthropological survey dissecting separate societies attitudes towards bare bodies and the motives behind cultural rituals such as tattoos However Original Skin is above all a celebration of the human body its tone one of absolute awe for the simultaneously protective and fragile membrane that divides us all from the world that surrounds us Maryrose Cuskelly s book in its examinations of everything from tickling to Botox to books bound in human derma is a delightful meditation on skin

*Sculpture and Touch* Peter Dent, 2017-07-05 Since the Renaissance at least the medium of sculpture has been associated explicitly with the sense of touch Sculptors philosophers and art historians have all linked the two often in strikingly different ways In spite of this long running interest in touch and tactility it is vision and visuality which have tended to dominate art historical research in recent decades This book introduces a new impetus to the discussion of the relationship between touch and sculpture by setting up a dialogue between art historians and individuals with fresh insights who are working in disciplines beyond art history The collection brings together a rich and diverse set of approaches with essays tackling subjects from prehistoric figurines to the work of contemporary artists from pre modern ideas about the physiology of touch to tactile interaction in the museum environment and from the phenomenology of touch in recent philosophy to the experimental findings of scientific study It is the first volume on this subject to take such a broad approach and as such seeks to set the agenda for future research and collaboration in this area

*Sensory Experience and the Metropolis on the Jacobean Stage (1603/1625)* Hristomir A. Stanev, 2016-04-01 At the turn of the seventeenth century Hristomir Stanev argues ideas about the senses became part of a dramatic and literary tradition in England concerned with the impact of metropolitan culture Drawing upon an archive of early modern dramatic and prose writings and on recent interdisciplinary studies of sensory perception Stanev here investigates representations of the five senses in Jacobean plays in relationship to metropolitan environments He traces the significance of under examined concerns about urban life that emerge in micro histories of performance and engage the involuntary and sometimes pre rational participation of the five senses With a dominant focus on sensation he argues further for drama s particular place in expanding the field of social perception around otherwise less tractable urban phenomena such as suburban formation environmental and noise pollution

epidemic disease and the impact of built in city space The study focuses on ideas about the senses on stage but also to the extent possible explores surviving accounts of the sensory nature of playhouses The chapters progress from the lower order of the senses taste and smell to the higher hearing and vision before considering the anomalous sense of touch in Platonic terms The plays considered include five city comedies a romance and two historical tragedies playwrights whose work is covered include Shakespeare Jonson Webster Fletcher Dekker and Middleton Ultimately Stanev highlights the instrumental role of sensory flux and instability in recognizing the uneasy manner in which the London writers and perhaps many of their contemporaries approached the rapidly evolving metropolitan environment during the reign of King James I

**Violence and the Genesis of the Anatomical Image** Rose Marie San Juan, 2022-11-28 Nothing excited early modern anatomists more than touching a beating heart In his 1543 treatise Andreas Vesalius boasts that he was able to feel life itself through the membranes of a heart belonging to a man who had just been executed a comment that appears near the woodcut of a person being dissected while still hanging from the gallows In this highly original book Rose Marie San Juan confronts the question of violence in the making of the early modern anatomical image Engaging the ways in which power operated in early modern anatomical images in Europe and to a lesser extent its colonies San Juan examines literal violence upon bodies in a range of civic religious pedagogical and exploratory contexts She then works through the question of how bodies were thought to be

constituted systemic or piecemeal singular or collective and how gender determines this question of constitution In confronting the issue of violence in the making of the anatomical image San Juan explores not only how violence transformed the body into a powerful and troubling double but also how this kind of body permeated attempts to produce knowledge about the world at large Provocative and challenging this book will be of significant interest to scholars across fields in early modern studies including art history and visual culture science and medicine
