National Library of Medicine Current Catalog National Library of Medicine (U.S.), **Psychosocial Conceptual Practice Models in Occupational Therapy** Moses N. Ikiugu, Elizabeth A. Ciaravino, 2007-01-01 This book examines the occupational therapy paradigm its focal viewpoint core constructs and values as well as the role of complexity chaos theory as a scientific framework for occupational therapy research and practice Unlike other current OT texts this book uses clinical case examples to illustrate application of proposed changes to make procedures consistent with the latest Occupational Therapy Practice Framework The reader walks away with a clear grasp of the theoretical principles guiding his or her treatment interventions the explanations behind those principles and the applicable intervention for said techniques and procedures An emphasis on clinical reasoning skills including information on different types of reasoning skills as well as the MAPP model of teaching helps the student and clinician translate theoretical principles into practice The section on specific interventions addresses each of the conceptual practice models according to a consistent chapter template which enables the reader to apply conceptual practice models in real world contexts Preview questions at the beginning of each chapter alert the reader to important concepts in the upcoming text Critical analysis of the theoretical core provides suggested modifications to increase consistency with the new occupational therapy paradigm **Care of the Long-Stay Elderly Patient** Michael J. Denham, 2013-11-11 Since the first edition of this book was published there have been considerable changes in continuing care NHS nursing homes have been created enthusiasts have developed new initiatives and attempts have been made to improve attitudes The recent White Paper on Community Care is likely to accelerate the transfer of large

numbers of elderly patients from long stay hospital beds to private sector accommodation a move often accompanied by much anxiety about standards of care Although Health Authorities visit private nursing homes and apply the National Association of Health Authorities standards to them anxieties continue Unfortunately for the patients who remain in hospital many Health Authorities seem reluctant to apply these same standards to their own long stay departments since many would fail abysmally The 1987 annual report of the Health Advisory Service see Chapter 3 presents a damning indictment of the care given to old people A recent review of twelve consecutive HAS Reports on services for older people in hospitals shows that long stay wards consistently offered environments which were unable to offer privacy homely surroundings personal space and possessions or adequate furniture In the twelve districts there was not one comprehensive personalised clothing service Half of the reports commented on the lack of effective management of continence Catering was often provided according to the needs of the institution rather than those of the resident patients
