Negation and Negative Concord Viviane Déprez, Fabiola Henri, 2018-12-15 While universally present in languages negation is well known to manifest a surprising cross linguistic diversity of forms In creole languages however negation and negative dependencies have been regarded as largely uniform Creole languages as Bickerton claims in *Roots of Language* generally exhibit negative concord a construction popularly dubbed double negation where several expressions each negative on its own come together with a logic defying single negation interpretation While this construction problematic for compositionality if the meaning of sentences emerge from the meaning of their parts has fostered much research the fertile data terrain that creole languages offer for its understanding is rarely taken into account Aiming at bridging this gap this book offers a wealth of theoretically informed empirical investigations of negative relations in a wide variety of creole languages Uncovering a far more complex negative landscape than previously assumed the book reveals the challenging richness that a thorough comparative study of creoles delivers

The Evolution of Negation Pierre Larrivée, Richard Ingham, 2011-12-23 Why do grammars change The cycle of negation proposed by Jespersen is crucially linked to the status of items and phrases The definition of criteria establishing when a polarity item becomes a negative element and the identification of the role of phrases for the evolution of negation are the two objectives pursued by the contributions to this volume The contributions look at the emergence of negative items and their relation within a given sentence with particular reference to English and French The comparative perspective supports the documentation of the fine grained steps that shed light on the factors that i determine change and those that ii accompany actuation which are considered through a dialogue between functionalist and formalist approaches By looking at the place of negation in the architecture of the sentence they take up the debate as to the relevance of phrasal projections and consider the role of features Focusing on the make up of individual items makes it possible to re conceptualise the Jespersen cycle as the apparent result of the documented evolution patterns of individual series of items This novel perspective is solidly grounded on an extensive use of the complete up to date bibliography and will contribute to shape future research

Negation and Polarity Laurence R. Horn, Yasuhiko Katō, 2000 Negation is a central feature of language and cognition interacting with all areas of grammar as well as with the philosophy of language Whereas there is a cross linguistic uniformity in logical and semantic aspects of negation there is a diversity of syntactic and morphological forms and rules This asymmetry in function and form poses problems for syntactic and universal grammar theory and for the study of the interface between syntax and discourse It is particularly evident in negative polarity words and phrases which can appear only in negative sentences The exploration of negation and negative polarity phenomena and their implications for linguistic theory are the main themes of this book
