littered with evidence of humanity's fascination with drugs and the pursuit of altered states. From early Romanticism to late nineteenth century occultism and from fin de siècle Paris to contemporary psychedelic shamanism, psychoactive substances have played a catalyzing role. Yet serious analysis of the religious dimensions of modern drug use is still lacking. The use of drugs and the pursuit of transcendence from the nineteenth century to the present day. Beginning with the Romantic fascination with opium, it chronicles the discovery of anesthetics, the psychiatric and religious interest in hashish, the bewitching power of mescaline and hallucinogenic fungi, the more recent uses of LSD, as well as the debates surrounding drugs and religious experience. This fascinating and wide-ranging sociological and cultural history fills a major gap in the study of religion in the modern world and our understanding of the importance of countercultural thought, offering new and timely insights into the controversial relationship between drugs and mystical experience.

Tales of Power Carlos Castaneda, 2013-04-23 Carlos Castaneda takes the reader into the very heart of sorcery, challenging both imagination and reason, shaking the very foundations of our belief in what is natural and logical. The sixth book in the acclaimed series explores the mysterious force known as the Eagle, a cosmic entity that bestows and reclaims consciousness. At birth, don Juan says, a universal force gives each of us a spark of awareness, which through careful discipline we must fight to retain beyond the end of our lives. This thought-provoking book is essential for anyone yearning to unlock the mysteries of the universe and enrich their understanding of consciousness.

The Aging Body in Dance Nanako Nakajima, Gabriele Brandstetter, 2017-01-06 What does it mean to be able to move? *The Aging Body in Dance* brings together leading scholars and artists from a range of backgrounds to investigate cultural ideas of movement and beauty, expressiveness and agility. Contributors focus on Euro-American and Japanese attitudes towards aging and performance, including studies of choreographers, dancers and directors from Yvonne Rainer, Martha Graham, Anna Halprin and Romeo Castellucci to Kazuo Ohno and Kikuo Tomoeda. They draw a fascinating comparison between youth-oriented Western cultures and dance cultures like Japan's, where aging performers are celebrated as part of the country's living heritage. The first cross-cultural study of its kind, *The Aging Body in Dance* offers a vital resource for scholars and practitioners interested in global dance cultures and their differing responses to the world's aging population.

Ordaining Reality Made Easy Joseph E. Donlan, 2009 Many people believe in the Power of Positive Thinking, but no one has succeeded in credibly explaining how mere thoughts can tangibly influence future occurrences. To explain the connection, this book presents a new paradigm of nature and couples it with a convincing explanation of how our

right brain hemispheres have a unique ability to tap into the hidden domain of the metaphysical To support this premise the reader is lightly exposed to the divergent worlds of physics and metaphysics and is then introduced to a new view of nature that undeniably links mind to matter Important to its charge the new perspective makes the case that the future can only be created with thoughts In the final analysis the author brings his readers through the necessary steps to put this knowledge to work to help them create their own realities
