The Gastric Mucosal Barrier Horace Willard Davenport, 1982

[Serendipity](#) James A. Estes, 2020-11-10 Many of the findings in the book are classics of ecology A rare and delightful insight into timely science

Jane Lubchenco Nature Estes's refreshing narrative deftly weaves rigorous science with personal reflection to create an absorbing and introspective read that is equal parts memoir ecological textbook and motivational guidebook for young ecologists Science To newly minted biologist James Estes the sea otters he was studying in the leafy kelp forests off the coast of Alaska appeared to have an unbalanced relationship with their greater environment Gorging themselves on the sea urchins that grazed among the kelp these small charismatic mammals seemed to give little back in return But as Estes dug deeper he unearthed a far more complex relationship between the otter and its underwater environment discovering that otters play a critical role in driving positive ecosystem dynamics While teasing out the connective threads he began to question our assumptions about ecological relationships These questions would ultimately inspire a lifelong quest to better understand the surprising complexity of our natural world and the unexpected ways we discover it Serendipity tells the story of James Estes's life as a naturalist and the concepts that have driven his interest in researching the ecological role of top level predators Using the relationships between sea otters kelp and sea urchins as a touchstone Estes retraces his investigations of numerous other species ecosystems and ecological processes in an attempt to discover why ecologists can learn so many details about the systems in which they work and yet understand so little about the broader processes that influence these systems Part memoir part natural history and deeply inquisitive Serendipity will entertain and inform readers as it raises thoughtful questions about our relationship with the natural world

Semiotics of Friendship Claus Emmeche, 2025-01-27 A friend should be able to be an attentive listener which made semiotician Roland Barthes wonder in his intriguing dictionary of love cannot friendship be defined as a space with total sonority This volume takes on the encyclopedic task in the sense of Umberto Eco where an encyclopedia is a very complex sign to explore friendship in detail not only as a form of love but in all its complexity as a bond that connects people and forms communities Semiotics the study of signs and meaning making is used alongside insights from a wide range of friendship studies to create a far reaching intellectual resonance or sonority around friendship as a central human experience As a study of the significance of friendship it presents findings from friendship research across the globe enabling new ways of thinking about friends It includes key concepts from semiotics sociology anthropology and other fields briefly explained major models of friendship from antiquity to contemporary societies proverbs and sayings about friendship from Africa America Asia and Europe stories about famous or forgotten friends from mythology fiction and real history summaries of research on friendship from selected academic disciplines bibliographical references for further studies

MediaSpeak Roy F. Fox, 2000-10-30 This book defines and analyzes the content structure and values of three predominant types of public discourse which are labeled Doublespeak Salespeak and Sensationspeak These media messages are examined to determine how they are constructed and how they influence individuals ideology and culture Discussions are illustrated with a diverse range of examples from popular culture magazines Internet sites politics television and film Fox argues that the Information Age has replaced actual reality with representations of reality He states

that electronic media dominates our lives Together these three voices saturate media and technology profoundly influencing American culture Fox suggests specific strategies for recognizing and understanding these coded messages This lively and informative discussion will appeal to anyone who is interested in learning how print and electronic media manipulate both individuals and society as a whole The extensive research will appeal to media communications journalism and cultural studies scholars alike

Reflections on Biochemistry A. Kornberg, B. L. Horecker, L. Cornudella, 2014-05-18 *Reflections on Biochemistry* In Honour of Severo Ochoa offers reflections on a wide range of topics relating to biochemistry including energy metabolism lipids and saccharides regulation nucleic acids and the genetic code protein biosynthesis and cell biology The essays celebrate Severo Ochoa's outstanding contributions to biochemistry spanning nearly half a century This book is comprised of 47 chapters and begins with a biography of Ochoa and his scientific work in the field of biochemistry particularly his research on intermediary metabolism RNA synthesis and the genetic code The discussion then turns to energy metabolism photosynthesis and fermentation touching on topics such as the role of lactic acid in the development of biochemistry and the biosynthesis of cell components from acetate The next section is devoted to lipids saccharides and cell walls and includes chapters that deal with biotin sulfur biochemistry and dipicolinic acid Subsequent chapters explore hormonal regulation of adipose tissue lipolysis the structural relationship between genes and enzymes bacteriophages colicins and ribosomes and cell biology and neurobiology This monograph will be of interest to biochemists and students of biochemistry

The Making of Mathematics Carlo Cellucci, 2022-03-07 This book offers an alternative to current philosophy of mathematics heuristic philosophy of mathematics In accordance with the heuristic approach the philosophy of mathematics must concern itself with the making of mathematics and in particular with mathematical discovery In the past century mainstream philosophy of mathematics has claimed that the philosophy of mathematics cannot concern itself with the making of mathematics but only with finished mathematics namely mathematics as presented in published works On this basis mainstream philosophy of mathematics has maintained that mathematics is theorem proving by the axiomatic method This view has turned out to be untenable because of Gödel's incompleteness theorems which have shown that the view that mathematics is theorem proving by the axiomatic method does not account for a large number of basic features of mathematics By using the heuristic approach this book argues that mathematics is not theorem proving by the axiomatic method but is rather problem solving by the analytic method The author argues that this view can account for the main items of the mathematical process those being mathematical objects demonstrations definitions diagrams notations explanations applicability beauty and the role of mathematical knowledge

Applied Anthropology Sheena Nahm, Cortney Hughes Rinker, 2015-10-16 This collection brings together recent innovative work in applied and practicing anthropology Organised around the theme of unexpectedness it examines some of the novel spaces topics and methods that anthropologists are involved with The volume emphasises non traditional settings and demonstrates the important role of anthropology in

addressing some of the pressing issues facing society today The contributors offer detailed ethnographic examples from their own research and work that give students valuable insight and advice Drawn mainly from the United States the case studies illustrate the diverse arenas in which anthropologists operate from law and finance to education and health care Simultaneous consideration is given to practical applications theoretical reflections and professional experiences The Hunt for the Parathyroids Jörgen Nordenström, 2012-11-05 The Hunt for the Parathyroid Gland is a part fact part fiction overview of the discovery of the parathyroid gland by a Swedish scientist in 1880 The discovery of the parathyroid gland in humans in 1880 by an unknown Swedish medical student Ivar Viktor Sandström ended a 30 year search for its exact location within the human body following its discovery in an Indian rhino 30 years before It is one of the most engaging and remarkable stories in the history of medicine This book offers a fascinating insight into its discovery Endocrinologists and ENT health professionals both in clinical practice and researchers as well as anyone with an interest in the history of medicine will find this a fascinating insight into one of the 19th century's key medical discoveries **The Fifth History of Man** John Bershof, MD, 2024-05-16 In the spirit of medieval writer Chaucer all human activity lies within the artist's scope the History of Man Series uses medicine as a jumping off point to explore precisely that all history all science all human activity since the beginning of time The jumping off style of writing takes the reader the listener into worlds unknown always returning to base only to jump off again History of Man are stories and tales of nearly everything The Fifth History of Man has a few parting shots at viruses but mostly continues with the world of parasites from tick disease that tick us off Old Lyme Connecticut and Lyme disease toxoplasmosis Crazy Cat Lady and her clowder of cats then on into a discussion of the avatar of parasites malaria Our travels will venture down into the valley Valley Girls Valspeak Valley Fever fungus and fungal infections We'll jump into the biology of evolution Darwin Huxley and the great debates the geology of earthquakes volcanos the Ring of Fire and Johnny Cash and then through the homos Homo habilis Homo erectus and Homo sapiens and once the dust cleared how the opposable thumbs walking erect and bigger brains left one man standing one woman too No discussion of human history can leave out the G O A T of French history heck of European history the man the legend Napoleon Bonaparte loved and admired by everyone even his enemies Our path will take us into war military World War I versus the 1918 Swine Flu some Russian history and how Stalin got Lenin wrong *Society of Women Engineers*, 1995 Information Science and Applications Kuinam J. Kim, Hye-Young Kim, 2019-12-18 This book presents selected papers from the 10th International Conference on Information Science and Applications ICISA 2019 held on December 16-18 2019 in Seoul Korea and provides a snapshot of the latest issues regarding technical convergence and convergences of security technologies It explores how information science is at the core of most current research as well as industrial and commercial activities The respective chapters cover a broad range of topics including ubiquitous computing networks and information systems multimedia and visualization middleware and operating systems security and privacy data mining and artificial intelligence

software engineering and web technology as well as applications and problems related to technology convergence which are reviewed and illustrated with the aid of case studies Researchers in academia industry and at institutes focusing on information science and technology will gain a deeper understanding of the current state of the art in information strategies and technologies for convergence security

Bristol Scout 1264 David Bremner, 2018-11-27 In 1913 Frank Barnwell designed the Bristol Scout which was the fastest and most manoeuvrable warplane for the first eighteen months of the First World War and became the prototype single seat fighter from which all later fighters were derived As a result Barnwell became one of the seminal figures in the development of aircraft design In 1916 Flt Sub Lt F D H Bremner RNAS flew Bristol Scouts for No 2 Wing in the eastern Mediterranean In 1983 his grandson David discovered three aircraft parts from Scout no 1264 in his late grandfather's workshop and twenty years later he together with his friend Theo Willford researched the possibility of rebuilding her from these three parts This book interweaves the previously unpublished early life of Barnwell and his brother Harold the operational and technical history of his creation the Bristol Scout Bremner's flying career and the challenges faced by Theo together with David and his brother Rick in recreating 1264 and getting her back in the air Neither Frank Barnwell nor the Bristol Scout have received the acclaim due to them in the history of military aviation and this lavishly illustrated book attempts to put the record straight

Process Engineering Renewal 3 Éric Schaer, Jean-Claude André, 2020-07-17 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries Its success is incontrovertible with the exponential increase in techniques and innovations Rapid advances in new technologies such as artificial intelligence as well as current societal needs sustainable development climate change renewable energy the environment are developments that must be taken into account in industrial renewal Process Engineering Renewal 3 presents a prospective analysis that demonstrates the significant disruptions linked to sustainable development global warming etc These constraints may trigger changes in the social regulation system which in turn applies pressure on actors of process engineering to evolve and adapt to these developments

Recommender Systems Handbook Francesco Ricci, Lior Rokach, Bracha Shapira, Paul B. Kantor, 2010-10-21 The explosive growth of e commerce and online environments has made the issue of information search and selection increasingly serious users are overloaded by options to consider and they may not have the time or knowledge to personally evaluate these options Recommender systems have proven to be a valuable way for online users to cope with the information overload and have become one of the most powerful and popular tools in electronic commerce Correspondingly various techniques for recommendation generation have been proposed During the last decade many of them have also been successfully deployed in commercial environments Recommender Systems Handbook an edited volume is a multi disciplinary effort that involves world wide experts from diverse fields such as artificial intelligence human computer interaction information technology data mining statistics adaptive user interfaces decision support systems marketing and consumer

behavior Theoreticians and practitioners from these fields continually seek techniques for more efficient cost effective and accurate recommender systems This handbook aims to impose a degree of order on this diversity by presenting a coherent and unified repository of recommender systems major concepts theories methodologies trends challenges and applications Extensive artificial applications a variety of real world applications and detailed case studies are included Recommender Systems Handbook illustrates how this technology can support the user in decision making planning and purchasing processes It works for well known corporations such as Amazon Google Microsoft and AT T This handbook is suitable for researchers and advanced level students in computer science as a reference

An Introduction to Medicinal Chemistry

Graham L. Patrick, 2017 For many people taking some form of medication is part of everyday life whether for mild or severe illness acute or chronic disease to target infection or to relieve pain However for most it remains a mystery as to what happens once the drug has been taken into the body how do the drugs actually work Furthermore by what processes are new drugs discovered and brought to market An Introduction to Medicinal Chemistry sixth edition provides an accessible and comprehensive account of this fascinating multidisciplinary field Assuming little prior knowledge the text is ideal for those studying the subject for the first time Part one of the book introduces the principles of drug action via targets such as receptors and enzymes The book goes on to explore how drugs work at the molecular level pharmacodynamics and the processes involved in ensuring a drug meets its target pharmacokinetics Further sections cover the processes by which drugs are discovered and designed and what has to happen before a drug can be made available to the public The book concludes with a selection of current topics in medicinal chemistry and a discussion of various key drug groups The subject is brought to life throughout by engaging case studies highlighting particular drugs and the stories behind their discovery and development The Online Resource Centre features For students DT Multiple Choice Questions to support self directed learning DT Web articles describing recent developments in the field and further information on topics covered in the book DT Journal Club to encourage students to critically analyse the research literature DT Molecular Modelling Exercises with new exercises in Chem3D DT New assignments to help students develop data analysis and problem solving skills For registered adopters of the book DT A test bank of additional multiple choice questions with links to relevant sections in the book DT Answers to end of chapter questions DT Figures from the book ready to download DT Power Point slides to accompany every chapter in the book

Strategic Management in the 21st Century Timothy J. Wilkinson, Vijay R.

Kannan, 2013-05-22 Covering both practical and theoretical aspects of strategic management this three volume work brings the complex topic down to earth and enables readers to gain competitive business advantages in their marketplace This clear insightful and interesting work covers all aspects of strategic management including chapters that discuss SWOT Strengths Weaknesses Opportunities and Threats analysis the Resource Based View transaction cost economics and real options theory Unlike other books this three volume work examines strategic management from different perspectives effectively
