Fulmer, 2003-04-29 The delivery of good medical care often involves professionals from various disciplines working together Interdisciplinary health care teams can be especially valuable in managing patients with complex medical and social needs such as older persons in hospital community or home settings Such teams however can also complicate or even create problems because of their diverse views and responsibilities *Ethical Patient Care A Casebook for Geriatric Health Care Teams* is designed to teach effective and responsible group decision making to clinicians working in teams to treat older patients The editors use the case study method to present ethical dilemmas that team members encounter in the management of geriatric patients Patients with multiple chronic conditions so often require the care of more than one medical specialist and in the introductory chapters the editors suggest ways to resolve conflicts among patients health care professionals and the institutions that support them including hospitals HMOs insurance companies and the government The book is then divided into four sections each dealing with one angle of the team care picture The first section treats the diverse ethical imperatives of various professionals conflicts among disciplinary approaches and and varying attitudes toward end of life decision making Section two focuses on the patient and covers patient confidentiality family decisionmaking and interaction with the healthcare team issues of patient and team nonadherence to the care plan and elder abuse and neglect Section three examines the emerging difficulties of decentralized health care in settings such as hospitals nursing homes and the home including clinician accountability and how ethical dilemmas differ across settings Section four discusses the problems arising from the increasing responsibility of clinicians to manage costs and serve the interests of hospitals and

Health Care Financing Review ,1997 *Autonomy & Paternalism* Thomas Nys,Yvonne Denier,Toon Vandevelde,2007 In recent years the triumph of autonomy has made paternalist interventions increasingly problematic The value of a patient's right to self determination and the practice of informed consent are considered supremely important in present day health care ethics In general the idea of doctor knows best has become more and more suspicious This has left us with a situation in which paternalist medicine seems difficult to reconcile with respect for patient autonomy This book offers a thorough reflection on the relationship between autonomy and paternalism and argues that from both theoretical and practical angles the tension between these concepts is not as acute as it might seem In long term care psychiatry and care for the severely handicapped the principle of respect for autonomy is particularly ill suited This however does not mean that such respect is totally irrelevant but that it should take a different shape Good care in those cases requires us to transcend the sharp dichotomy between autonomy and paternalism In *Autonomy and Paternalism Reflections on the Theory and Practice of Health Care* various acclaimed authors present their views on this interesting and extremely relevant debate **The Cambridge Handbook of Age and Ageing** Malcolm L. will find this essential reading **Our Hands Are Tied** Marshall Kapp,1998-05-12 As a critical examination of the pervasive tension existing between defensive medicine and good ethical patient care this book investigates the impact of legalities on medical treatment Physicians today are apprehensive about the threat of malpractice suits Kapp explores the extent to which this fear is justified He examines where physicians get their ideas about what the law forbids and requires how physicians perceptions of the law and medicine affect medical care and whether these behavioral manifestations benefit or hurt a physician s ability to practice ethically Kapp then suggests ways medical professionals can resolve tension caused by conflicting demands and encourage more ethical care **Handbook of Bioethics:** G. Khushf,2006-04-11 In general the history of virtue theory is well documented Sherman 1997 O Neill 1996 Its relationship to medicine is also recorded in our work and in that of others Pellegrino and Thomasma 1993b 1996 Drane 1994 Ellos 1990 General publications stress the importance of training the young in virtuous practices Still the popularity of education in virtue is widely viewed as part of a conservative backlash to modern liberal society Given the authorship of some of these works by professional conservatives like William Bennett 1993 1995 this concern is authentic One might correspondingly fear that greater adoption of virtue theory in medicine will be accompanied by a corresponding backward looking social agenda Worse yet does reaffirmation of virtue theory lacquer over the many challenges of the postmodern world view as if these were not serious concerns After all recreating the past is the retro temptation of our times Searching for greater certitude than we can now obtain preoccupies most thinkers today One wishes for the old clarity and certitudes Engelhardt 1991 On the other hand the same thinkers who yearn for the past like Engelhardt sometimes seems to do might stress the unyielding gulf between past and present that creates the postmodern reaction to all systems of Enlightenment thought 1996 **Handbook on Ethical Issues in Aging** Tanya F. The Denial of Aging Muriel R. Gillick, 2009-06-30 You've argued politics with your aunt since high school but failing eyesight now prevents her from keeping current with the newspaper Your mother fractured her hip last year and is confined to a wheelchair Your father has Alzheimer's and only occasionally recognizes you Someday as Muriel Gillick points out in this important yet unsettling book you too will be old And no matter what vitamin regimen you're on now you will likely one day find yourself sick or frail How do you prepare What will you need With passion and compassion Gillick chronicles the stories of elders who have struggled with housing options with medical care decisions and with finding meaning in life Skillfully incorporating insights from medicine health policy and economics she lays out action plans for individuals and for communities In addition to doing all we can to maintain our health we must vote and organize for housing choices that consider autonomy as well as safety for employment that utilizes the skills and wisdom of the elderly and for better management of disability and chronic disease Most provocatively Gillick argues against desperate attempts to cure the incurable Care should focus on quality of life not whether it can be prolonged at any cost A good old age writes Gillick is within our grasp But we must reach in the right direction
