Arguments and Fists Mika LaVaque Manty, 2002-03-22 Many theorists have addressed a central concern of current political theory by contending that the dithering intellectualism of left politics prevents genuine political action Arguments and Fists confronts this concern by refuting these arguments and reconciling philosophical debates with the realities of current activism By looking at theorists such as Montesquieu Kant Rousseau the book contradicts current academic debates and also goes against contemporary theory's image of the liberal political agent as a narrowly rational abstraction Mika LaVaque Manty also argues that progressive political philosophy and political action go hand in hand He then ventures past Kant and Rousseau to talk about specific environmental activism finding middle ground between the two while asserting that the liberal urge for political reform stems from sound philosophical considerations about the nature of politics and isn't the cowardly afterthoughts some theorists have called it Arguments and Fists then puts these theoretical insights to use examining environmental justice movements and varieties of environmental radicalism showing how liberal theory illuminates concrete contemporary political practices

in the Twenty-First Century Felix M. Edoho, 2000-12-30 Edoho and his contributors examine the management challenges facing African governments and businesses on the eve of a new millennium. As the authors make clear, Africa's future is defined by how Africa does in the 21st century. For Africa, a major challenge is how to effectively and efficiently manage its vast wealth. Africa is not poor because it is poor; it is poor because it cannot manage its development process. The shortages of managerial knowledge, skills, and talents are pervasive. Consequently, the region lacks the ability to organize production and run operations effectively and efficiently. The task of developing managerial manpower in Africa is not only imperative; it is urgent. After outlining theoretical and applied perspectives on management, the volume examines the public and private sector planning and management. It then explores the globalization of management technology, provides case studies of African management dilemmas, looks at management ethics and morality, and concludes with an analysis of the role of management in African national development. As the authors make clear, abundant resources will not of themselves usher in an African economic renaissance. Africa needs skills to identify and analyze its resources to undertake investment and to establish and run all kinds of organizations. Until Africa develops its indigenous managerial talents, development will continue to be elusive, and the process traumatizing. An important resource for scholars, students, and policy makers involved with African economic development. The Wood-worker, 1908 **Windows 7 All-in-One For Dummies** Woody
