child's understanding of hundreds of early vocabulary items separated into semantic categories such as animal names, household items, and action words. Parents mark the words understood or used, and the forms yield separate indexes of words understood and words produced. The second part of each form asks parents to record the communicative and symbolic gestures the child has tried or completed. Note: The Spanish and English forms were developed separately to reflect the vocabulary and grammatical structure of each language. A words and sentences form. Both CDI Words and Sentences and Inventario II Palabras y Enunciados are for use with children ages 16-30 months. In the first part of each form, parents document the child's production and use of hundreds of words divided into semantic categories. The second part analyzes the early phases of grammar, including the child's understanding of word forms and the complexity of the child's multi-word utterances. Parents identify the words the child has understood or used and provide written examples of the child's three longest sentences. Note: Vocabulary checklists in the Inventarios were adapted to reflect linguistic and cultural differences, and the grammar section was modified to fit certain features of the Spanish language, such as the existence of four definite articles. User's Guide and Technical Manual. The manuals for CDIs and Inventarios are both in English, but each has been tailored to the content of its corresponding tool. Both provide detailed instructions for administering, scoring, and interpreting the forms; various uses of the inventories for clinical and research purposes; background information on the development of the forms; technical reports on reliability and validity; and tables and graphs of norming data. **MacArthur-Bates**

Inventario I Primeras Palabras y Gestos, sold in packages of 25 for easy re-ordering, is one of the two standardized parent-completed report forms that make up the Spanish adaptation of the MacArthur Communicative Development Inventories (CDIs), which was designed by top language researchers to assess language and communication skills in young children ages 8-30 months. With the Inventarios, professionals can tap into parents' invaluable day-to-day knowledge about their children's language and communication skills and respond to legislation that requires parental input in child evaluations. The forms focus on current behaviors and salient emergent behaviors that parents can recognize and track. Numerous studies document the reliability and validity, clinical utility, and research potential of the CDIs and Inventarios. The CDIs were normed on approximately 1,800 children in three locations, and the Inventarios were normed on more than 2,000 children. The CDI and Inventario forms were developed separately to reflect the vocabulary and grammatical structure of each language.
