Machine Susan Steinberg, 2019-08-20 A haunting story of guilt and blame in the wake of a drowning the first novel by the author of *Spectacle* Susan Steinberg's first novel *Machine* is a dazzling and innovative leap forward for a writer whose most recent book *Spectacle* gained her a rapturous following *Machine* revolves around a group of teenagers both locals and wealthy out of towners during a single summer at the shore Steinberg captures the pressures and demands of this world in a voice that effortlessly slides from collective to singular as one girl recounts a night on which another girl drowned Hoping to assuage her guilt and evade a similar fate she pieces together the details of this tragedy as well as the breakdown of her own family and learns that no one not even she is blameless A daring stylist Steinberg contrasts semicolon studded sentences with short lines that race down the page This restless approach gains focus and power through a sharply drawn narrative that ferociously interrogates gender class privilege and the disintegration of identity in the shadow of trauma *Machine* is the kind of novel relentless and bold that only Susan Steinberg could have written

The Plot Machine Kai Mikkonen,2021-11-01 This book presents a new and exciting theory of the modern French novel by developing the notion of the narrative as a textual machine Many turn of the century French novels thematically identified their means of narration through the various machines that they depicted The narrative devices that were particularly important in this self reflection included the

temporal order of the plot the question of a narrative's beginning and end the hierarchy of narrative voices and the techniques of the point of view The question of mechanization became central on all these fronts Has the novel become automated or machine like At the same time the machine metaphors in the novels of Alfred Jarry Emile Zola Jules Verne Villiers de l'Isle Adam Raymond Roussel combined the question of the narrative form with new ways to think about man's relationship with technology and the cultural environment The early modernist texts drew upon contradictory notions of technological promise and threat while they also depicted new forms of identity and behavior related to or modeled after machines These texts highlighted cultural assumptions concerning technological innovations and critiqued mainly through parody and through various figures of man-machine fusion the positivistic belief in progress Such writers looked for evidence of advanced forms of consciousness arising out of encounters with new technology such as telephones trains bicycles telegraphy phonographs and electricity This volume will be of interest to anyone working in the field of modern French literary and cultural history It will especially appeal to anyone intrigued with the origins of the modernist novel the history of narrative forms and the question of how the experience of new technology may be portrayed in literary texts **Machine**
