Sartre and Magic Daniel O'Shiel, 2019-06-27 Jean Paul Sartre s technical and multifaceted concept of magic is central for understanding crucial elements of his early philosophy 1936 1943 not least his conception of the ego emotion the imaginary and value Daniel O Shiel follows the thread of magic throughout Sartre s early philosophical work Firstly Sartre s work on the ego 1936 shows a personal reflective form of consciousness that is magically hypostasized onto the pre reflective level Secondly emotion 1938 is inherently magical for Sartre because emotive qualities come to inhere in objects and thereby transform a world of pragmatism into one of captivation Thirdly analyses of The Imaginary 1940 reveal that anything we imagine is a spontaneous creation of consciousness that has the power to enchant and immerse us even to the point of images holding sway over us Culminating with Sartre s ontological system of Being and Nothingness 1943 O Shiel argues that Sartre does not do away with the concept but in fact provides ontological roots for it This is most evident in Sartre s analyses of value possession and language A second part shows how such Sartrean magic is highly relevant for a number of concrete case studies the arts advertising racism and stupidity and certain instances of

psychopathology O Shiel shows that Sartre's magical being is important for any contemporary philosophical anthropology because it is essentially at work at the heart of many of our most significant experiences both creative and damaging
